the university where we teach is to create teachers who are scholars and leaders While the intent of that mission is basically sound in theory we instill the idea that teachers at all levels are professionals always learning and growing in knowledge that theory that philosophical underpinning does not insure that the students who complete our program are confident about the act or performance of teaching In our unique program students work closely with one teacher and classroom for the entire senior year and then are supervised and mentored during their first semester of teaching the program is heavily field based and it depends on the effectiveness of mentoring throughout the methods coursework and the first semester of full time teaching Students tell us this guidance and support is invaluable and yet we feel the disjuncture between university and school just as many of you in more traditional student teaching settings Students hear best practice information from us in methods classes and they receive ample exposure to the research supporting our field but have a hard time implementing research based practices in their cla room settings and an even harder time finding it in the classrooms around them The English Record ,2005 Choice Words Peter Johnston, 2023-10-10 In productive classrooms teachers don't just teach students math and reading skills they build emotionally and relationally healthy learning communities Teachers create intellectual environments that produce not only technically competent students but also caring secure actively literate human beings Choice Words How Our Language Affects Children's Learning shows how teachers can accomplish this by using their most powerful teaching tool language Throughout this book author Peter Johnston provides examples of seemingly ordinary words phrases and uses of language that are pivotal in the orchestration of the classroom Grounded in a study by accomplished literacy teachers the book demonstrates how and what we say and don't say have surprising consequences for what children learn and for who they become as literate people Students learn how to become strategic thinkers not merely learning the literacy strategies but adapting them to their lives outside of the classroom In addition Johnston examines the complex learning that teachers produce in classrooms that is hard to name and thus is not recognized by tests by policy makers by the general public and often by teachers themselves yet is vitally important This book will be enlightening for any teacher who wishes to be more conscious of the many ways their language helps children acquire literacy skills and view the world their peers and themselves in new ways Teaching City Kids Kecia Hayes, 2007 Textbook Literacy and Learning in the Content Areas Sharon Kane, 2017-07-05 The 3rd Edition of Literacy Learning in the Content Areas helps readers build the knowledge motivation tools and confidence they need
