Concept Maps

A concept map is a visual organizer that can enrich students' understanding of a new concept. Using a graphic organizer, students think about the concept in several ways. Most concept map organizers engage students in answering questions such as, "What is it? What is it like? What are some examples?" Concept maps deepen understanding and comprehension.

Why use a concept map?

- It helps children organize new information.
- It helps students to make meaningful connections between the main idea and other information.
- They're easy to construct and can be used within any content area.

How to use a concept map

Note: It is important that teachers spend time introducing younger students to charts and diagrams prior to using this strategy.

There are several ways to construct concept maps. Most include the following steps:

1. Model how to identify the major ideas or concepts presented in a selection of text as you read.
2. Organize the ideas into categories. Remind students that your organization may change as you continue to read and add more information.
3. Use lines or arrows on the map to represent how ideas are connected to one another, a particular category, and/or the main concept. Limit the amount of information on the map to avoid frustration.
4. After students have finished the map, encourage them to share and reflect on how they each made the connections between concepts.
5. Encourage students to use the concept map to summarize what was read.

Teach All Children Through Balanced Literacy Sandra F. Rief, Julie A. Heimburge, 2007-08-17 How to Reach and Teach All Children Through Balanced Literacy offers you a handbook for teaching literacy to diverse students in grades 3-8. The balanced literacy method combines the best practices of phonics and other skill-based language instruction with the holistic literature-based approach in order to help you teach reading, writing, and speaking in a clear and approachable format. This dynamic resource offers an easily accessible research-based approach to balanced literacy that is grounded in the innovative ideas developed by authors Sandra F. Rief and Julie A. Heimburge. The book includes detailed descriptions of what a balanced literacy classroom looks like and shows how to create a program from the ground up or give your existing program a boost. The book can be used across content areas and is filled with reproducible worksheets, activities, and other handy classroom tools. Some topics covered include Shared book experiences, Reading aloud, Oral language and vocabulary development, Guided reading for comprehension, Modeled writing, Reading and writing conferences, Book clubs, Content area reading and writing, Ongoing assessments, Enhancing literacy through technology.

Trends and Prospects in Metacognition

Research Anastasia Efklides, Plousia Misailidi, 2010-09-08 Trends and Prospects in Metacognition presents a collection of chapters dealing principally with independent areas of empirical Metacognition research. These research foci such as animal metacognition, neuropsychology of metacognition, implicit learning, metacognitive experiences, metamemory, young children's Metacognition, theory of mind, metacognitive knowledge, decision making, and interventions for the enhancement of metacognition have all emerged as trends in the field of metacognition. Yet the resulting research has not converged, precluding an integration of concepts and findings. Presenting a new theoretical framework, Trends and Prospects in Metacognition extends the classical definitions offered by Flavell and Nelson to carry the prospect of more integrated work into the future. By opening the possibility to cross the boundaries posed by traditionally independent research areas, this volume provides a foundation for the integration of research paradigms and concepts and builds on the relationship between metacognition and consciousness while integrating basic with applied research.

Equitable Literacy Instruction for Students in Poverty Doris Walker-Dalhouse, Victoria J. Risko, 2024-09-27

Differences in performance between students living in poverty and more advantaged students are reflective of an opportunity gap as opposed to a gap in student ability. This book argues that significant attention must be given to eliminating the barriers that produce educational inequities in student achievement. Walker-Dalhouse and Risko focus on disparities in literacy achievement that might be attributed to color-blind practices, deficit mindsets, low expectations, or context-neutral practices. Situating literacy learning within a comprehensive view of literacy development, they provide a set of instructional practices that will best support students living in poverty. Specifically, vignettes from kindergarten through middle school classrooms are used to demonstrate practices that address critical areas of the reading process, are responsive to students' racial, ethnic, cultural, gender, and linguistic histories and assets, attend to students' strengths and needs, and go beyond short

term gains on high stakes tests to support optimal and sustainable learning Educators and school leaders can use this resource to transform schools into nurturing and vibrant communities that are committed to change equity and diversity

Book Features Provides recommendations and detailed guidance for enacting literacy instruction that will close opportunity gaps for students living in poverty Includes vignettes from leading literacy educators and researchers including Elizabeth Baker Susan Cantrell Jill Lewis Spector Allison Skerrett and Kelly Wissman Demonstrates high quality literacy instruction implemented in K 8 classrooms Presents instruction that is responsive to differences and honors the languages literacies and cultural resources that students bring to their learning Offers specific recommendations and practices that can guide advocacy for change

Text In Education And Society Sunita A Abraham,Desmond Michael Allison,Zhiming Bao,Lionel Wee,1998-09-09 The central place of text as a means of organising language in order to construct what people come to think of as knowledge is a phenomenon affecting all educators students and citizens of modern societies

This volume offers various voices and perspectives including those of Ron Carter and Michael Halliday on the role of text in education and society The chapters on text in education explore some ways in which texts can create bonds or raise barriers between educational knowledge and common sense knowledge while the chapters on text in society focus on how personalities and societies are themselves constructed through texts Learning to unpack texts and to consider alternatives is a crucial goal for education and growth especially so in the context of fast changing contemporary societies This book should be of special interest to educators students of language and readers interested in the dynamic relationship between text education and society

Social Problem Solving Maurice J. Elias, Steven E. Tobias, 1996-03-08 This volume describes proven practical techniques for promoting key skills in students for everyday social academic familial and vocational success Based on the work of a highly acclaimed 15 year ongoing multisite project the approach is designed to help professionals encourage the development of enduring life tools and prevent substance abuse HIV infection violence and other behavior related problems The program is directed toward children in primarily K 8 populations at high moderate and low levels of risk in both regular and special education contexts
