

## Today's Challenge to Save Tigers

The challenge we face to increase the number of tigers in the wild in India is huge! Furthermore, we are running out of time. With all the threats facing these beautiful creatures, only education and real commitment will give us a chance of saving them.

Conservation bodies and scientists are starting to work together to study the behavior of tigers in order to understand them better. They hope this will help us find and protect areas where tiger populations live. However, the difficulty is that tigers usually live and hunt alone over enormous areas. So, what can be done?

One option is to fit tigers with satellite collars. These collars allow scientists to track the movements of the tiger. As result, they are able to measure the size of the tigers' territory. In addition, camera traps are being used to help track tigers. These traps use infrared sensors. The sensors are activated by an animal's movements and body heat. Researchers work 24 hours a day recording images (photos and videos) that we would not normally be able to see.

The information from these images provides scientists with vital information about tiger habitats. Hopefully, this information will prove crucial in the fight to save the tiger from extinction.

**Reading Green in Early Modern England** Leah Knight, 2016-04-08 Green in early modern England did not mean what it does today but what did it mean Unveiling various versions and interpretations of green this book offers a cultural history of a color that illuminates the distinctive valences greenness possessed in early modern culture While treating green as a panacea for anything from sore eyes to sick minds early moderns also perceived verdure as responsive to their verse sympathetic to their sufferings and endowed with surprising powers of animation Author Leah Knight explores the physical and figurative potentials of green as they were understood in Renaissance England including some that foreshadow our paradoxical dependence on and sacrifice of the green world Ranging across contexts from early modern optics and olfaction to horticulture and herbal health care this study explores a host of human encounters with the green world both the impressions we make upon it and those it leaves with us The first two chapters consider the value placed on two ways of taking green into early modern bodies and minds by seeing it and breathing it in while the next two address the manipulation of greenery by Orphic poets and medicinal herbalists as well as grafters and graffiti artists A final chapter suggests that early modern modes of treating green wounds might point toward a new kind of intertextual ecology of reading and writing Reading Green in Early Modern England mines many pages from the period not literally but tropically metaphorically green that cultivate a variety of unexpected meanings of green and the atmosphere and powers it exuded in the early modern world
