This book is intended to help college faculty create conditions in which students learn to construct knowledge in their disciplines and achieve self authorship A significant and often overlooked dimension mediating learning and self authorship centers on learners ways of knowing or their assumptions about the nature limits and certainty of knowledge A learner who assumes that all knowledge is certain expects to hear answers from an authority figure in contrast a learner who views knowledge as relative expects to explore multiple viewpoints By taking a constructive developmental approach the author demonstrates how students ability to construct knowledge is intertwined with the development of their assumptions about
