Reading Human Geography Trevor J. Barnes,Derek Gregory,1997

Focusing on post positive geography Reading Human Geography makes available in a single volume some of the key texts that have informed its contemporary thought and practice The readings include some of the most important contributions by geographers to conceptual and methodological debates during the last fifteen years Paying special attention to writings by human geographers rather than philosophers and other social scientists makes the collection unusually accessible to undergraduates unfamiliar with other vocabularies and other concerns Editorial introductions to each section draw attention to connections inside and outside the discipline they provide both a context for and a summary of the essays that follow together with a detailed bibliography and suggestions for further reading There is also a glossary and an index

Writers Directory NA NA, 2016-03-05 *Social Science in America* Charles M. Bonjean, Louis Schneider, Robert L. Lineberry, 2014-07-03 This outstanding symposium concerns the development of the social sciences in the United States over

its first two hundred years and was brought together by the editors of Social Science Quarterly as the journal's contribution to the nation's Bicentennial celebration. Six prominent scholars representing history, economics, sociology, political science, anthropology, and geography were invited to write essays about the general topic of the progress of the social sciences and to pursue original lines of thought as well. Each was asked to address three key questions regarding their own discipline: 1) the distinctive contributions made to each discipline by American scholars; 2) the impact of these contributions upon American society; and 3) the relationship of these contributions to the character or nature of life in the United States. The result is a coherent collection of considerable breadth and exceptional quality. The essays include "Time's American Adventures: American History and Historical Writing since 1776" by William Goetzmann; "Economics: Its Direct and Indirect Impact in America 1776-1976" by Joseph J. Spengler; "Sociology in America: The Experience of Two Centuries" by Robin M. Williams; "Understanding Political Life in America: The Contribution of Political Science" by Heinz Eulau; "Anthropology in America" by Walter Goldschmidt; and "Geography As a Social Science: Recent American Experience" by Kevin Cox.

Social and Economic Factors Affecting Intercity Travel Vogt, Ivers & Associates, 1969. A research study was conducted to define the social and economic factors affecting intercity travel and to use the resulting relationships with existing traffic prediction tools to predict intercity travel. Data used were the external origin and destination surveys of 22 cities. Another source of data was the U.S. census. Trip data from the origination-destination studies were summarized by trip purposes and by increasing time rings from the study area centroids. A stepwise regression analysis computer program was used to determine the relationship between trips and social and economic data. In an alternate analysis procedure, the survey data were utilized to determine the amount and characteristics of intercity trip generation.
