Thinking about the Emotions Alix Cohen, Robert Stern, 2017-05-26 Philosophical reflection on the emotions has a long history stretching back to classical Greek thought even though at times philosophers have marginalized or denigrated them in favour of reason Fourteen leading philosophers here offer a broad survey of the development of our understanding of the emotions The thinkers they discuss include Aristotle Aquinas Ockham Descartes Malebranche Spinoza Hobbes Hume Shaftesbury Hutcheson Kant Schiller Schopenhauer Nietzsche James Brentano Stumpf Scheler Heidegger and Sartre Central issues include the taxonomy of the emotions the distinction between emotions passions feelings and moods the relation between the emotions and reason the relationship between the self and the emotions At a metaphilosophical level the collection also raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns Thinking about the Emotions is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act

Wildlife Films Derek Bousé, 2011-11-29 If as many argue movies and television have become Western culture s premier storytelling media so too have they become for most members of society the primary source of encounters with the natural world particularly wild animals The television fare offered nightly by national and cable networks such as PBS and the Discovery Channel provides millions of viewers with their only experience of the wilderness and its inhabitants The very films that so many viewers take as accurate portrayals of wildlife however have evolved primarily as a

form of entertainment following the established codes and conventions of narrative exposition The result has been not the representation of nature but its wholesale reconstruction and reconfiguration according to film and television conventions audience expectations and the demands of competition in the media marketplace Wildlife Films traces the genealogy of the nature film from its origins as the animal locomotion studies that mark the very beginnings of motion pictures themselves to the founding of the Animal Planet cable channel that boasts all animals all the time The narrative and thematic elements that unite wildlife films as a genre have their roots not in the documentary film tradition but in the older traditions of oral and written animal fables as reflections of human society Derek Bous contends that classic wildlife films often portray animal protagonists living in families modeled on an ideal of the human nuclear family and working in communities that resemble an ideal of bucolic human society In these stories presented as documentaries animals are motivated by human emotions and conduct relationships according to human customs This imposition of culturally satisfying narrative patterns upon the lives of animals has not only led to the misrepresentation of the natural world it has promoted the notion that our values our moral vision our models of society and family structure derive from nature rather than being cultural formations **Jade** Roger Keverne, 2012-12-06 FOREWORD RECUMBENT HORSE Chinese Ming Dynasty 1 Length 3 2 in 9 em The formation of the head with its marked convexity of outline resembles that of one depicted on a mural painting in a Northern Song tomb discovered at Pai Sha in Honan Despite its size this horse has a strong sculptural quality Worked from pale green jade with light brown markings it has been said that a single daily issue of a newspaper effort to survey the jade scene worldwide These volumes such as The New York Times Neue Zürcher Zeitung or Le Monde were bigger than was necessary considering the amount of information contained more than someone text included measuring 24 x 18 inches 61 x 46 cm and living in the 17th century would have faced in a lifetime weighing 110 lb 50 kg together and Bishop was not Jade scholarship cannot escape the information explosion interested in wide dissemination of the subject He printed of our century Our knowledge on the subject of jade has only 106 copies none of which was for sale and then has been radically expanded in two directions from the past trove of the plates The copies were sent to important libraries and in the present and a definitive survey bringing together museums and crowned heads around the world As the latest research from around the world is long overdue
