

# Chapter-CELL

Class IX

	<b>endosmosis.</b> The cell may burst if kept for long time.	the process of <b>exosmosis.</b>
Plant cell	The cell gains water and swells up but do not burst due to the cell wall.	The cell loses water and will shrink. The protoplasm will move away from the cell wall and the cell is plasmolysed. This process is known as <b>plasmolysis</b>

**Q16. Give examples from nature where the process of osmosis is used.**

1. Unicellular freshwater organisms and most plant cells tend to gain water through osmosis.
2. Absorption of water by plant roots.

**Notes from the Chalkboard** J. TERRY HALL,2012-07-17 In Notes From The Chalkboard Teacher Tales From The Mountains Of North Carolina I have attempted to capture the essence of North Carolina mountain teachers and administrators It is a tragedy for people to live to be eighty ninety or even one hundred years old and when they die to allow their wonderful experiences to die with them Oral history is rapidly dying across our nation With the explosion of instant communication we have lost the art of passing on everyday events of interest to future generations There was a time not very long ago when families would sit around the fireplace and relate memories from days gone by Regrettably that day is long in the past Thus the idea for this book was formed The purpose is to provide an avenue for common everyday folks who would most likely never be mentioned in history books to relate memories that are meaningful in their lives and allow these same memories to be passed on through time **Notes and Queries** ,1918 **Biology** Sylvia S.
