the days of authoritative star architects today's practice is a brand and requires the full input of every member of the team. This book builds off of a two year AIA research project to provide a blueprint for effective leadership: the ability, awareness, and commitment to lead project teams who work together to accomplish the project's goals. Both group and individual hands-on exercises help facilitate implementation, and extensive case studies show how these techniques have helped real world firms build exemplary success through collaborative teamwork and leadership. Highly illustrated and accessible, this approach is presented from the practicing architect's point of view, but the universal principles and time tested methods also provide clear guidance for owners, contractors, engineers, project managers, and students. Build a culture of collaboration, commitment, and interpersonal awareness. Adopt effective leadership techniques at the team, project, or practice level. Handle conflict and resolve communication issues using tested approaches. Learn how real world projects use effective leadership to drive success. The last decade has seen a sea change in architectural leadership. New practices no longer adopt the name and identity of a single person, but create their own identity that represents the collaborative work of the entire group. Shifts in technology and changing workplace norms have made top down management structures irrelevant, so what does it now mean to lead?
