A Real Good War Sam Halpert, 1999 WLA, 2003 **Living-Room War** Michael J. Arlen, 1997-10-01 One doesn't have to be a panjandrum of Communications to realize that television does something to us Michael Arlen former TV critic of The New Yorker writes in the Introduction to Living Room War He continues Television has a transforming effect on events It has a transforming effect on the people who watch the transformed events it's just hard to know what that is Living Room War is Arlen's valiant and entertaining attempt to figure out exactly what exactly television does to us This timeless collection of essays provides a poetic look at 1960s television culture ranging from the Vietnam war to Captain Kangaroo from the 1968 Democratic convention to televised sports *The War Dogs Trilogy* Greg Bear, 2017-09-12 Collected in a single volume for the first time the epic War Dogs trilogy of interstellar war from a master of science fiction The Gurus made their presence on Earth known thirteen years ago Providing technology and scientific insights far beyond what mankind was capable of they became indispensable advisors and promised even more gifts that we just couldn't pass up But they were followed by mortal enemies the Antagonists from sun to sun planet to planet and now the Gurus are stretched thin and they need humanity's help Our first bill has come due Skyrines like Michael Venn have been volunteered to pay the price They face insidious enemies who were already inside the solar system establishing a beachhead on Mars Venn and his comrades will be lucky to make it out alive let alone preserve the future of all of mankind **World War III Blues** J.F. Donahue, 2014-01-31 Is it possible for one man to save a country with just the words he had written What if this man were actually a prophet and his songs had meaning far beyond that which he had originally intended Bob Dylan finds himself exploring these questions after an unexpected disaster has left much of the United States underwater and bitter political philosophies have forced the survivors into a Civil War He is now one of these survivors and the Legend discovers that he may possess the only secret that can truly bring peace and reunite America **The War on Learning** Elizabeth Losh, 2024-02-06 An examination of technology based education initiatives from MOOCs to virtual worlds that argues against treating education as a product rather than a process Behind the lectern stands the professor deploying course management systems online quizzes wireless clickers PowerPoint slides podcasts and plagiarism detection software In the seats are the students armed with smartphones laptops tablets music players and social networking Although these two forces seem poised to do battle with each other they are really both taking part in a war on learning itself In this book Elizabeth Losh examines current efforts to reform higher education by applying technological solutions to problems in teaching and learning She finds that many of these initiatives fail because they treat education as a product rather than a process Highly touted schemes video games for the classroom for example or the distribution of iPads let students down because they promote consumption rather than intellectual development Losh analyzes recent trends in postsecondary education and the rhetoric around them often drawing on first person accounts In an effort to identify educational technologies that might actually work

she looks at strategies including MOOCs massive open online courses the gamification of subject matter remix pedagogy video lectures from Randy Pausch to the Baked Professor and educational virtual worlds Finally Losh outlines six basic principles of digital learning and describes several successful university based initiatives Her book will be essential reading for campus decision makers and for anyone who cares about education and technology War!
