Reducing Delinquency: A Strategic Planning Approach

By Gregory P. Falkin

Lexington, Massachusetts: Lexington Books, 1979, 212 + xix pp., \$20.95

Gregory Falkin has attempted to address one of the major social and political problems regarding children today, that of reducing juvenile delinquency. His attempt is a heroic one as he uses a policy science research framework to present a rationale and a simulation model to be used for the dual purpose of (1) describing and understanding the current status of a juvenile justice system and (2) making positive, programmatic changes in that system to reduce juvenile delinquency. Falkin's presentation is a scholarly one, well reasoned, well organized, and well written. He uses an interesting technique of periodically summarizing his material to keep the reader organized in thinking through both the theory and model presented. However, the value of Falkin's book, no matter how well presented, lies in the answer to the three basic questions of (1) whether or not such a strategic planning model is needed; (2) whether or not the model presented is a valid one; and (3) whether or not the model presented would be used by those involved in juvenile justice planning and policy formulation.

The need for a model for rational planning in the juvenile justice system cannot be questioned when the allocation of funds and the development of programs is examined at the local, state, and federal levels of government. Like many other systems, or combinations of systems, planning is carried out through a combination of political, arbitrary, and emotional decisions; in most cases only a soupçon of rationality prevails through the efforts of a dedicated few who fight long enough and hard enough to be heard. Although most decision makers recognize the need for a knowledge base and a systematic approach to planning, it seems that frequently misinformation, partial understanding, and response to crises are mistaken for a rational process. In 1967, the President's Commission on Law Enforcement and the Administration of Justice identified the need for system-wide planning regarding criminal justice. In 1968, criminal justice planning agencies were mandated and funded as part of

Taxman,April Pattavina,2013-06-05 The use of simulation modeling in criminal justice dates back to the 1970s Early models

were developed to capture the realities of the criminal justice system to identify what changes were needed and how small changes would affect the overall picture. Significant time and effort were devoted to these projects and although they achieved some success, the complex nature of the criminal justice system and the difficulties associated with improving and maintaining the models prohibited wide spread adoption in the field. Some of the problems with early simulation projects were the lack of data to validate models, the lack of technical skills needed by staff to design and build the models, and the technical difficulties with software programming to transform models into computerized representations. As simulation modeling has become a more popular technique across many disciplines and technology as well as the technical skills of researchers has improved, this book revisits the concept of simulation modeling with new applications for the criminal justice system. The wider availability of data has made for more opportunity to verify and validate models, computing software has become more available and easier to use, and the capacity for visualization and communication of models shows promise for the future of simulation in criminal justice. The time has come to examine the past, present, and future contributions of simulation modeling to the field of criminal justice. This work provides a central resource of information for the current state of simulation modeling and overview of existing techniques and cases of success and directions for future development. This work will be an important resource for researchers in criminal justice and related fields as well as those studying policy related topics.

Juvenile Justice Administration Peter C. Kratcoski, 2023-02-01. This second edition textbook focuses on the duties of juvenile justice administrators, featuring more illustrations, examples of programs, and interviews of juvenile justice administrators. The edition is updated to address critical issues in the field, including Recruitment, Training, and retention of juvenile justice personnel; Reducing violence; Providing security for youth housed in juvenile correctional facilities; Diversion programs; Viable community corrections programs; Mass media and the community as it relates to juvenile justice administrators. Divided into five distinct sections, this book is ideal for graduate students, researchers, and practitioners studying or working with young offenders or juvenile justice administration.

Youth Gangs and Community

Intervention Robert Chaskin, 2010-01-29. Although a range of program and policy responses to youth gangs exist, most are largely based on suppression implemented by the police or other criminal justice agencies. Less attention and fewer resources have been directed to prevention and intervention strategies that draw on the participation of community organizations, schools, and social service agencies in the neighborhoods in which gangs operate. Also underemphasized is the importance of integrating such approaches at the local level. In this volume, leading researchers discuss effective intervention among youth gangs, focusing on the ideas behind approaches to and evidence about the effectiveness of community based youth gang interventions. Treating community as a crucial unit of analysis and action, these essays reorient our understanding of gangs and the measures undertaken to defeat them. They emphasize the importance of community both as a context that shapes opportunity and as a resource that promotes positive youth engagement. Covering key themes and debates, this book explores

the role of social capital and collective efficacy in informing youth gang intervention and evaluation the importance of focusing on youth development within the context of community opportunities and pressures and the possibilities of better linking research policy and practice when responding to youth gangs among other critical issues *Journal of Police Science and Administration* ,1980 *Strategic Plan* United States.
