Reed College Creative Review Spring 2005:

Constructing Black Education at Oberlin College Roland M. Baumann, 2014-07-31 In 1835 Oberlin became the first institute of higher education to make a cause of racial egalitarianism when it decided to educate students irrespective of color Yet the visionary college's implementation of this admissions policy was uneven In *Constructing Black Education at Oberlin College A Documentary History* Roland M Baumann presents a comprehensive documentary history of the education of African American students at Oberlin College Following the Reconstruction era Oberlin College mirrored the rest of society as it reduced its commitment to black students by treating them as less than equals of their white counterparts By the middle of the twentieth century black and white student activists partially reclaimed the Oberlin legacy by refusing to be defined by race Generations of Oberlin students plus a minority of faculty and staff rekindled the college's commitment to racial equality by 1970 In time black separatism in its many forms replaced the integrationist ethic on campus as African Americans sought to chart their own destiny and advance curricular change Oberlin's is not a story of unbroken progress but rather of irony of contradictions and integrity of myth and reality and of imperfections Baumann takes readers directly to the original sources by including thirty complete documents from the Oberlin College Archives This richly illustrated volume is an important contribution to the college's 175th anniversary celebration of its distinguished history for it convincingly documents how Oberlin wrestled over the meaning of race and the destiny of black people in American society

A Better Way to Build Michael R. Adamson, 2013-01-15 While architects have been the subject of many scholarly studies we know very little about the companies that built the structures they designed This book is a study in business history as well as civil engineering and construction management It details the contributions that Charles J Pankow a 1947 graduate of Purdue University and his firm have made as builders of large often concrete commercial structures since the company s foundation in 1963 In particular it uses selected projects as case studies to analyze and explain how the company innovated at the project level The company has been recognized as a pioneer in design build a methodology that involves the construction company in the development of structures and substitutes negotiated contracts for the bidding of architects plans The Pankow companies also developed automated construction technologies that helped keep projects on time and within budget The book includes dozens of photographs of buildings under construction from the company s archive and other sources At the same time the author analyzes and evaluates the strategic decision making of the firm through 2004 the year in which the founder died While Charles Pankow figures prominently in the narrative the book also describes how others within the firm adapted the business so that the company could survive a commercial market that changed significantly as a result of the recession of the 1990s Extending beyond the scope of most business biographies this book is a study in industry innovation and the power of corporate culture as well as the story of one particular company and the individuals who created it

Thomas Cole's Journey Elizabeth Mankin Kornhauser, Tim Barringer ,2018-01-29 Thomas Cole 1801 1848 is celebrated as the greatest American landscape artist of his generation Though previous scholarship has emphasized the American aspects of his formation and identity never before has the British born artist been presented as an international figure in direct dialogue with the major landscape painters of the age Thomas Cole s Journey emphasizes the artist s travels in England and Italy from 1829 to 1832 and his crucial interactions with such painters as Turner and Constable For the first time it explores the artist s most renowned paintings The Oxbow 1836 and The Course of Empire cycle 1834 36 as the culmination of his European experiences and of his abiding passion for the American wilderness The four essays in this lavishly illustrated catalogue examine how Cole s first hand knowledge of the British industrial revolution and his study of the Roman Empire positioned him to create works that offer a distinctive even dissident response to the economic and political rise of the United States the

ecological and economic changes then underway and the dangers that faced the young nation A detailed chronology of Cole s life focusing on his European tour retraces the artist s travels as documented in his journals letters and sketchbooks providing new insight into his encounters and observations With discussions of over seventy works by Cole as well as by the artists he admired and influenced this book allows us to view his work in relation to his European antecedents and competitors demonstrating his major contribution to the history of Western art **Drawn to Design** Eric Jenkins,2022-04-19 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design for instance issues of fa ade are illustrated with sketch diagrams that show how fa ades can be explored and sketched through a series of specific questions and step by step procedures In the expanded and updated edition a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing Bible Review ,2004 *The American Economic Review* ,1948 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association *MLA International Bibliography of Books and Articles on the Modern Languages and Literatures* ,2007
