Engineering Leslie Jackson, Thomas D. Morton, 2006-07-31 This eighth volume of Reed's Marine Engineering Series prepares students for the Department of Transport Certificates of Competency in General Engineering Knowledge. It also covers the syllabus for Engineer Cadet courses in the subject. The syllabus and principles involved are virtually the same for all examinations but questions set in Class One require the most detailed answers. The book follows the same pattern as the other volumes in this series which has proved so successful: emphasis on basic principles, extensive illustrations, worked examples included in the text, practice examples at the end of each chapter and specimen exam questions at the end.

Centralized and Automatic Controls in Ships D Gray, 2014-06-28 Centralized and Automatic Controls in Ships provide a non-mathematical basic introduction to the subject of control engineering applied in the marine field. This book is composed of 20 chapters that cover the basic principles of the equipment in ships. The opening chapters deal with ship components, construction and commissioning routine for certain automated plant. The next chapters consider the basic principles of automatic control and controllers. These topics are followed by discussions on logic units and data processing equipment, other control elements, steam turbines and diesel engines. Other chapters illustrate the application of control techniques to the major areas of the ship's machinery. The final chapters examine ship and ship's control system commissioning and maintenance. This book is an invaluable source for marine engineers and marine engineering students.

Reeds Vol 7: Advanced Electrotechnology Edmund G.R. Kraal, 2006-01-01 A companion to Volume 6 Basic Electrotechnology for Engineers, this book covers more aspects of the theory of Electrotechnology. The syllabus is close to that of Electrical Engineering for Marine Engineer Cadets Phase 3 of the Alternative Training Scheme and covers more fully the requirements of the DoT syllabus for Class 1 and Class 2 Marine Engineers. Students studying for the Extra First Class Engineers Certificate will also find it of value. It anticipates future extensions of these syllabuses and deals with brushless AC generators, excitation systems for marine alternators and semiconductor theory relating to the diode, transistor and the thyristor. Numerous fully worked problems are included in the text as well as test examples and typical examination questions with solutions.
