belief One particular view about propositional content has been dominant in analytic philosophy namely the Fregean conception of propositions as abstract mind independent objects that come with truth conditions But propositions in this sense raise a range of issues which have become a center of debate in current philosophy of language In particular how should propositions as abstract objects be understood and how can they represent things and be true or false A number of philosophers in contemporary analytic philosophy as well as in early analytic philosophy and phenomenology have approached the notion of a propositional content in a different way not by starting out with an abstract truth berarer but by focusing on cognitive acts of agents such as acts of judging It is in terms of such acts that the notion of a propositional content on their view should be understood The act based perspective historically goes back to the work of Central European philosophers in particular that of Husserl Twardowski Meinong and Reinach However their work has been unduly neglected and is in fact largely inaccessible to contemporary analytic philosophers The volume presents a central selection of work of these philosophers that bear on an act based conception of philosophical content some of which in new translations one paper by Reinach some of which published in English for the very first time two papers by Twardowski In addition the volume presents new work by leading contemporary philosophers of language pursuing or discussing an act based conception of propositional content Moreover the book contains a crosslinguistic study of nominalizations for actions and products a distinction that plays a central role in the philosophy of language of Twardowski   Discourse Particles in Asian Languages Volume II Hiroki Nomoto,Elin McCready,2023-08-29 This volume is the second in a two part collection of research on discourse particles focusing exclusively on the languages of Asia from the perspective of formal as well as non formal semantics and pragmatics Despite increasing interest in discourse particles most research in the area particularly within formal semantics and pragmatics focuses on a restricted set of languages and there has been little consensus on the proper formal treatment of particles The term discourse particles has been used to cover a broad range of phenomena including such things as sentence final particles discourse adverbs and other related phenomena In recent years there has been extensive development of the formal approach to discourse particles which often treats these words as devices for marking information updates It is vital however to extend this data to non Western languages like Malay Thai or Vietnamese These two volumes are the first to give an exclusive focus on particles in non European languages in this case Asian languages from the perspective of formal and non formal semantics and pragmatics This second volume includes chapters on Tagalog Kimaragang Dusun Malaysia Malay Singlish Colloquial Singapore English Thai and Vietnamese The chapters are informed by recent theoretical work in formal and non formal semantics and pragmatics relating to the meaning of particles The collection contributes to our theoretical understanding of the meaning of discourse particles and to empirical knowledge of discourse particles in the languages of Asia It will be of interest to postgraduate students and scholars of semantics and pragmatics   **Thai** David Smyth,2025 This third edition of Thai An Essential Grammar provides an up to date and concise
