  Reflection and Software Engineering Walter Cazzola,Robert J. Stroud,Francesco Tisato,2000-06-28 This book presents the state of the art of research and development of computational reflection in the context of software engineering Reflection has attracted considerable attention recently in software engineering particularly from object oriented researchers and professionals The properties of transparency separation of concerns and extensibility supported by reflection have largely been accepted as useful in software development and design reflective features have been included in successful software development technologies such as the Java language The book offers revised versions of papers presented first at a workshop held during OOPSLA 99 together with especially solicited contributions The papers are organized in topical sections on reflective and software engineering foundations reflective software adaptability and evolution reflective middleware engineering Java based reflective languages and dynamic reconfiguration through reflection   *Reflection and Software Engineering* Walter Cazzola,Robert J.    Philosophy and Engineering: Reflections on Practice, Principles and Process Diane P Michelfelder,Natasha McCarthy,David E. Goldberg,2014-01-13 Building on the breakthrough text Philosophy and Engineering An Emerging Agenda this book offers 30 chapters covering conceptual and substantive developments in the philosophy of engineering along with a series of critical reflections by engineering practitioners The volume demonstrates how reflective engineering can contribute to a better understanding of engineering identity and explores how integrating engineering and philosophy could lead to innovation in engineering methods design and education The volume is divided into reflections on practice principles and process each of which challenges prevalent assumptions and commitments within engineering and philosophy The volume explores the ontological and epistemological dimensions of engineering and exposes the falsity of the commonly held belief that the field is simply the application of science knowledge to problem solving Above all the perspectives collected here demonstrate the value of a constructive dialogue between engineering and philosophy and show how collaboration between the disciplines casts light on longstanding problems from both sides The chapters in this volume are from a diverse and international body of authors including philosophers and engineers and represent a highly select group of papers originally presented in three different conferences These are the 2008 Workshop on Philosophy and Engineering WPE 2008 held at the Royal Academy of Engineering the 2009 meeting of the Society for Philosophy and Technology SPT 2009 at the University of Twente in the Netherlands and the Forum on Philosophy Engineering and Technology fPET 2010 held in Golden Colorado at the Colorado School of Mines   **Object-Oriented Technology: ECOOP 2000 Workshop Reader**
