*Anthropological Genetics* Michael H. Crawford,2007 Volume detailing the effects of the molecular revolution on anthropological genetics and how it redefined the field      Biofictions Josie Gill,2020-02-20 This book is open access and available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com) It is funded by Knowledge Unlatched Winner of the 2020 British Society for Literature and Science book prize In this important interdisciplinary study Josie Gill explores how the contemporary novel has drawn upon and intervened in debates about race in late 20th and 21st century genetic science Reading works by leading contemporary writers including Zadie Smith Kazuo Ishiguro Octavia Butler and Colson Whitehead *Biofictions* demonstrates how ideas of race are produced at the intersection of science and fiction which together create the stories about identity racism ancestry and kinship which characterize our understanding of race today By highlighting the role of narrative in the formation of racial ideas in science this book calls into question the apparent anti racism of contemporary genetics which functions narratively rather than factually or objectively within the racialized contexts in which it is embedded In so doing *Biofictions* compels us to rethink the long asked question of whether race is a biological fact or a fiction calling instead for a new understanding of the relationship between race science and fiction      **Tabula Raza** Duana Fullwiley,2024-04-23 Duana Fullwiley has penned an intimate chronicle of laboratory life in the genomic age She presents many of the influential scientists at the forefront of genetics who have redefined how we practice medicine and law and understand ancestry in an era of big data and waning privacy Exceedingly relatable and human the scientists in these pages often struggle for visibility teeter on the tightrope of inclusion and work tirelessly to imprint the future As they actively imagine a more equal and just world they often find themselves ensnared in reproducing timeworn conceits of race and racism that can seed the same

health disparities they hope to resolve Nothing dynamic can live for long as a blank slate an innocent tabula rasa But how the blank slate of the once raceless human genome became one of racial differences in various forms of what Fullwiley calls the tabula raza has a very specific and familiar history one that has cycled through the ages in unexpected ways

for the varying strength of the taboo for the incestuous dyads of the nuclear family the different rates of incest of these dyads and the dramatic differences the psychological pathology incest has on its younger victims Synthesizing findings from biology sociobiology neurology primatology clinical psychology anthropology and sociology the authors weave together a scenario of how natural selection initially generated mechanisms of sexual avoidance and then as the nuclear family emerged in hominid and human evolution how sociocultural selection led to the development of the incest taboo Children of Time Anne H. Weaver,2012-04-15 The stories in this book bring our distant ancestors to life through the eyes of their children Each carefully researched chapter is based on an actual child fossil a baby a five year old a young adolescent and teenagers The stories are made up but they are based on real bones teeth stone tools ashes pollen and Ice Age art From publisher description The Myth of Post-Racial America H.
