New Thinking in Complexity for the Social Sciences and Humanities

A Marxist Critique of Latin American Colonial Studies

Malcolm K. Read, 2019-01-21 During the mid 1980s Latin American colonial studies came to be dominated by the various post movements post structuralism post modernism post Marxism characterized by their promotion of discursivity as the ultimate horizon of sociality This volume confronts discourse theory and examples of its colonial application with an alternative Althusserian problematic that foregrounds modes of production and class struggle to which end it further promotes a view of colonial societies as split not along a horizontal geographic axis that offsets the New World against Europe but vertically through the opposition between dominant tributary feudal formations and their emergent capitalist equivalent Its fundamental claim is that the radical sounding rhetoric of the various post movements far from energizing the politics of resistance to the forces of imperialism actually greases the mechanisms of finance capital

Foundations and Practice of Research Andrew Basden, 2019-10-11

Many of the issues on which meaningful research is founded are seldom discussed for example the role of everyday experience diversity and coherence of meaning in the world the meaningfulness and wider mandate of research the very nature and validity of theoretical thought and the deep presuppositions of philosophy and how they undermine the success of research Such questions are material to the philosophies that guide research thinking in all fields and since they cannot be satisfactorily addressed in a piecemeal fashion this book employs the radically different philosophy of Herman Dooyeweerd to

consider them together Parts I and II discuss these issues theoretically and philosophically while Part III discusses them practically specifically the adventures that researchers across the world have had using Dooyeweerd's philosophy Foundations and Practice of Research assembles a wide range of experiences of using Dooyeweerd's philosophy in research in the fields of mathematics the natural sciences the social sciences design sciences and the humanities Case studies demonstrate how Dooyeweerd's philosophy has been found fruitful in most stages of research and the philosophical discussion backs this up This book challenges researchers to join the adventures including suggestions of potential research that could be carried out as well as questions still left unanswered

Contradictions of Archaeological Theory Sandra Wallace, 2012-01-30 Is current archaeological theory stuck at an impasse Sandra Wallace argues that archaeological theory has become mired as a result of logical and ontological contradictions By showing that these contradictions are a result of common underlying philosophical assumptions and fallacies this book is able to show how a fresh approach to this discipline is necessary to resolve them even if this requires re-examining some of the tenants of orthodox archaeology This fresh approach is achieved by using Critical Realism as an under labourer to philosophically evaluate archaeological theory Starting by assessing the historical impact of philosophy on the discipline and then looking at the current relationship between archaeology and the ontology of the material this book facilitates the construction of discipline specific theory by archaeologists The result is an approach to archaeology that allows both students and practitioners to free themselves from endemic contradictions and re-discover their approach to archaeological theory
