*Reflection of Ultra-violet Light by Various Pigments* Paul Dobson Bales, 1928

*Lilith's Reflection* Brigitte Wynn Karey, 2012-06 Lilith's Reflection explores the concept of possibilities rather than facts. If facts dominate most of our daily thinking we'd leave out possibilities that might exist in our lives the unseen from other dimensions that intercept our paths of life. Things or events exist for a reason and there is more than one way to look into every situation. Lilith was introduced as an orphan and a tragic victim who was abandoned by her psychopathic father at the age of six. She was mentally not well she thought at first. Now she realized her condition has never been that simple. Her illness wasn't strong enough to poison her mind but something else was. Her mental illness was just the image she portrayed to others but her true self was far beyond her sickness. Love in this novel is represented in an unnoticeable and unusual way rather than in a traditional way. There is no such thing as the correct or the wrong way of loving someone. Love could be in holiness or love could be in such sinfulness but love is love. Lilith after countless struggles with her search for true love she had found not only her greatest love of all but also her true soul mate not for one life but for eternity. Author Brigitte Wynn Karey is a lover of words. The author expresses her thoughts not only to her audiences but also to herself. Her ability to use words to express her thoughts creatively in her own way was excellent. The imagination created in this book would let the audiences enjoy their mental imaginary visions as well as to open up the possibilities that they might have missed out.

Edward

Burne-Jones on Nature Liana De Girolami Cheney, 2021-05-21 This volume studies some of Edward Burne Jones's paintings focusing specifically on his approach to nature both through his observations about the real physical world and through his symbolic interpretations of earthly and celestial realms Burne Jones's appreciation for natural formations grew from his interests in astronomy and geography and was expanded by his aesthetic sensibility for physical and metaphysical beauty His drawings and watercolors carefully recorded the physical world he saw around him These studies provided the background for a collection of paintings about landscapes with flora and fauna and ignited an artistic furor that inspired the imagery he used in his allegorical fantasy and dream cycles about forests winding paths and sweet briar roses This study focuses on two main ideas Burne Jones's concept of ideal and artificial or magical nature expressed and represented in his drawings and paintings and the way in which he fused his scientific knowledge about nature with some of the symbolism in his paintings
