Safar, Michael F. O'Rourke, Edward D. Frohlich, 2014-07-30 In cardiovascular prevention there is classically a small number of cardiovascular risk factors to treat such as hypertension, diabetes, hyperlipidemia, and smoking, excess which are widely detected and treated. Recently it has been widely recognized that new mechanical factors should be detected and treated and involves specifically pulsatile arterial hemodynamic parameters such as arterial stiffness, pulse pressure, and to a lesser extent augmentation index and pulse pressure amplification. The pedagogic aspect of this new CV specialty involves 3 principal parts: a. Basic concepts and pathophysiological mechanisms of PAH; b. Clinical aspects and end organ damage in PAH; c. Clinical pharmacology and therapeutics of PAH. This book represents the first that spans basic science and clinical management of this new CV subspecialty. Much has been learned regarding the management of these patients in recent years and this book presents extensive data on the techniques needed to maximize outcomes. *Permanent Blood Stain* Alan Hines, 2020-06-22 The things that were arranged and rearranged that became the bloodshed of pouring rain poetry. **McDonald's Blood Flow in Arteries** Charalambos Vlachopoulos, Michael O'Rourke, Wilmer W. Words in Blood, Like Flowers Babette E. Babich, 2007-06-01 Why did Nietzsche claim to have written in blood? Why did Heidegger remain silent after World War II about his participation in the Nazi Party? How did Hölderlin's voice and the voices of other more ancient poets come to echo in philosophy? *Words in Blood, Like Flowers* is a classical expression of continental philosophy that critically engages the intersection of poetry, art, music, politics and the erotic in an exploration of the power they have over us. While focusing on three key figures, Hölderlin, Nietzsche and Heidegger, this volume covers a wide range of material from the Ancient Greeks to the vicissitudes of the politics of our times and approaches these and other questions within their hermeneutic and historical contexts. Working from primary texts and a wide range of scholarly sources in French, German and English, this book is an important contribution to philosophy's most ancient quarrels, not only with poetry but also with music and erotic love
