Reforming Eu Farm Policy Lessons From New Zealand:

Reforming EU Farm Policy R. W. M. Johnson, 2000 This Occasional Paper uses the reforms of agriculture in New Zealand to offer pointers to the reform of the Common Agricultural Policy New Zealand's agricultural reforms have been some of the most radical and successful anywhere and suggest a way out of the cycle of waste inefficiency and corruption that characterize agriculture in Europe Executive Summary New Zealand is one of the few countries which has embarked on free trade for agriculture New Zealand farmers were heavily protected by price supports and other measures in the 1970s and early 1980s but protection was greatly reduced in the economic reforms of the mid 1980s Experience in New Zealand shows that agricultural markets do adjust by themselves and that farmers do not bear all the costs of reforms Farmers incomes dropped after the reforms were introduced but farmers then adapted to their new environment Adjustment in product and factor markets took about six years Farm land prices fell after the reforms but have now returned to a normal relationship with product earnings New Zealand would like to see similar reforms in countries whose subsidised output competes with its own It is also concerned about the growth of environmental obstacles to trade The Common Agricultural Policy is damaging to the interests of consumers and taxpayers in the EU and burdensome to farmers outside the EU EU farm protection has been increasing The nominal tariff equivalent in the EU is now 82 per cent compared to 1 per cent in New Zealand The CAP costs a family of four about AGBP1000 per year The CAP has encouraged higher output and environmental damage But farmers incomes have fallen sharply in recent years Although past EU reform efforts have been ineffective a free market agriculture would be perfectly feasible The New Zealand example should be emulated **Making**

Reform Happen Lessons from OECD Countries OECD, 2010-05-26 This collection of essays analyses the reform experiences of the 30 OECD countries in nine major policy domains in order to identify lessons pitfalls and strategies that may help foster policy reform in the future **OECD Sustainable Development Studies Subsidy Reform and Sustainable Development Economic, Environmental and Social Aspects** OECD, 2006-04-19 These proceedings present an overview of approaches for assessing subsidies and associated taxes and look at country experiences in reforming subsidies in agriculture fisheries industry and transport *Quarterly Essay 80 The High Road* Laura Tingle, 2020-11-28 Australia and New Zealand are often considered close cousins But why despite being so close do we know so little about each other And now in the wake of COVID 19 is it time to change that In this wise and illuminating essay Laura Tingle looks at leadership character and two nations in transition In the past half century both countries have remade themselves amid shifting economic fortunes New Zealand has been held up as a model for everything from privatisation to the conduct of politics to the response to COVID Tingle considers how both countries have been governed and the different way each has dealt with its colonial legacy What could Australia learn from New Zealand And New Zealand from Australia This is a perceptive often amusing introduction to two countries alike in some ways but quite different in others Jacinda Ardern is not

the first reason we have had to look across the Tasman and wonder whether there is another way of doing things New Zealand perhaps the only place in the world that has suffered isolation and the tyranny of distance more than Australia has repeatedly jumped out of its comfort zone and changed direction harder faster and for longer than Australia has done in the past half century Laura Tingle *The High Road*

European Integration, 1950-2003 John Gillingham, 2003-06-02 Integration is the most significant European historical development in the past fifty years eclipsing in importance even the collapse of the USSR Yet until now no satisfactory explanation is to be found in any single book as to why integration is significant how it originated how it has changed Europe and where it is headed Professor Gillingham s work corrects the inadequacies of the existing literature by cutting through the genuine confusion that surrounds the activities of the European Union and by looking at his subject from a truly historical perspective The late twentieth century has been an era of great though insufficiently appreciated accomplishment that intellectually and morally is still emerging from the shadow of an earlier one of depression and modern despotism This is a work then that captures the historical distinctiveness of Europe in a way that transcends current party political debate
