Regional Advantage Culture And Competition In Silicon Valley And Route 128:

Regional Advantage AnnaLee Saxenian,1996-03 The result of numerous interviews with executives entrepreneurs and policy makers this analysis highlights the importance of local sources of competitive advantage in a volatile world economy It also underscores the need to develop regional as well as national and sectoral economic policies Regional Advantage AnnaLee Saxenian,1996 Regional Advantage AnnaLee Saxenian,2000 **Understanding Silicon Valley** Martin Kenney,2000 This text explores the factors that have made Silicon Valley such a fertile breeding ground for new technologies and new firms It looks at how its pioneering achievements began and the forces that have propelled its unprecedented growth The Silicon Valley Edge Chong-Moon Lee,2000 Looks at Silicon Valley's business environment and what features have made it a fertile ground for start up companies who develop radical and disruptive technologies **Social Culture and High-Tech Economic Development** F. Phillips,2006-04-12 Techno regions have generated most of the new jobs in the past decade and this technology is driving economic development however problems persist This book highlights the potential pitfalls and suggests methods by which a sustainable distinctive and prosperous technology based regional economy can exist Serendipitous and Strategic Innovation Shantha Liyanage,2005-12-30 Innovation is a time consuming process that involves invention as a beginning and a marketable service or product as an end But innovation itself once concluded is not necessarily a constructive act as some innovations yield positive and some negative results The way we recognize and develop innovation so often a serendipitous and almost invisible act in its beginning is thus a matter of primary importance in today's world where new thoughts and products play such a crucial role in economies across the globe Nowhere is the general support structure required for success in innovation more starkly illuminated than in the fields of science and medicine where human well being is so manifestly at stake In this work which draws together the perspectives of a multidisciplinary group of professionals medical doctors innovation policy analysts and academics in business management Shantha Liyanage and his colleagues provide a thorough examination of the technology innovation process and display its critical links with organizational functions so the innovative capacities of organizations can be better prepared to meet the rapid changes of our age Circuits, Packets, and Protocols James L. Pelkey,Andrew L. Russell,Loring G. Robbins,2022-04-19 As recently as 1968 computer scientists were uncertain how best to interconnect even two computers The notion that within a few decades the challenge would be how to interconnect millions of computers around the globe was too far fetched to contemplate Yet by 1988 that is precisely what was happening The products and devices developed in the intervening years such as modems multiplexers local area networks and routers became the linchpins of the global digital society How did such revolutionary innovation occur This book tells the story of the entrepreneurs who were able to harness and join two factors the energy of computer science researchers supported by governments and universities and the tremendous commercial demand for Internetworking computers The centerpiece of this history comes from unpublished

interviews from the late 1980s with over 80 computing industry pioneers including Paul Baran J C R Licklider Vint Cerf Robert Kahn Larry Roberts and Robert Metcalfe These individuals give us unique insights into the creation of multi billion dollar markets for computer communications equipment and they reveal how entrepreneurs struggled with failure uncertainty and the limits of knowledge *Global Cyber Security Labor Shortage and International Business Risk* Christiansen, Bryan, Piekarz, Agnieszka, 2018-10-05 Global events involving cybersecurity breaches have highlighted the ever growing dependence on interconnected online systems in international business The increasing societal dependence on information technology has pushed cybersecurity to the forefront as one of the most urgent challenges facing the global community today Poor cybersecurity is the primary reason hackers are able to penetrate safeguards in business computers and other networks and the growing global skills gap in cybersecurity simply exacerbates the problem *Global Cyber Security Labor Shortage and International Business Risk* provides emerging research exploring the theoretical and practical aspects of protecting computer systems against online threats as well as transformative business models to ensure sustainability and longevity Featuring coverage on a broad range of topics such as cybercrime technology security training and labor market understanding this book is ideally designed for professionals managers IT consultants programmers academicians and students seeking current research on cyber security s influence on business education and social networks *Handbook of Research on Entrepreneurial Development and Innovation Within Smart Cities* Carvalho, Luisa Cagica, 2017-01-25 While the population continues to grow and expand many people are now making their homes in cities around the globe With this increase in city living it is becoming vital to create intelligent urban environments that efficiently support this growth and that simultaneously provide friendly progressive environments to both businesses and citizens alike *The Handbook of Research on Entrepreneurial Development and Innovation Within Smart Cities* is a comprehensive reference source that discusses social economic and environmental issues surrounding the evolution of smart cities It provides insightful viewpoints on a range of topics such as entrepreneurial ecosystems competitive tourism city efficiency corporate social responsibility and smart destinations This publication is ideal for all researchers academics and practitioners that wish to expand their knowledge on the emerging trends and topics involving smart cities *Comparative Labor Law* Matthew W. Finkin, Guy Mundlak, 2015-07-31 Economic pressure as well as transnational and domestic corporate policies has placed labor law under severe stress National responses are so deeply embedded in institutions reflecting local traditions that meaningful comparison is daunting This book **The Institutions of Local Development** Fabio Sforzi, Ash Amin, 2018-05-08 This title was first published in 2003 Development is a complex and heterogeneous phenomenon driven by the expansion of one or more sectors and their influence on the others It is the outcome of local interdependencies among firms households and institutions which give rise to specific territorial patterns of local systems Policies of development cannot therefore restrict themselves to undifferentiated intervention from the centre to the periphery but must be able to stimulate and sustain

endogenous bottom up growth by means of specific programmes Thus individuals and organizations public or private interact take decisions and devise strategies in a context that is simultaneously co operative and competitive The first in a series this volume brings together a team of leading international social scientists from the IGU study group on local development Illustrated by a wide range of global case studies it analyses what knowledge is required for industrial production and how best to organize this knowledge embedded as it is in physical human and social capital It focuses on the formation of social capital and the various forms into which this may evolve in particular the sets of institutions which regulate relationships within and among firms

Global Competition and Local Networks Rod B. McNaughton,2018-02-06 This title was first published in 2002 The interest in becoming globally competitive through network strategies particularly networks between small and medium sized firms in local business communities is high among academic researchers economic development agencies and growth orientated firms Important contributions to our understanding of the strategic use of networks are coming from a number of disciplinary and theoretical perspectives This volume provides a unique opportunity to both synthesize this diverse literature and report the results of original research It is particularly relevant to scholars of business and management geography and economics

Knowledge Economy in the Megalopolis T. R. Lakshmanan,William P. Anderson,Yena Song,2015-10-05 In recent decades urban regions around the world have engaged in a new process of development based on the creation of new knowledge Amidst the globalization of economic activities and the arrival of transformative technologies knowledge has become the key driver of competitiveness and is profoundly reshaping the patterns of economic growth and activity This book offers a comprehensive new model of the rise of a Knowledge Economy and its evolutionary development in the Megalopolis These regions are developing new institutions and governance mechanisms to adapt disseminate and utilize available knowledge to promote continuing development of their Knowledge Economies However such developments are accompanied by increasing inequalities in incomes and in urban services This book examines the resilience of some urban regions and their recent emergence as vibrant Knowledge Economies It also reviews the recent renewal and growth in the Megalopolis stretching along the Atlantic Seaboard along the metropolitan areas of Boston New York Philadelphia Baltimore and Washington DC This book will appeal to researchers and professionals interested in urban and regional development and to business groups interested in economic development

Beyond Territory Harald Bathelt,Maryann Feldman,Dieter F. Kogler,2012-03-29 The main purpose of the book is to discuss new trends in the dynamic geography of innovation and argue that in an era of increasing globalization two trends seem quite dominant rigid territorial models of innovation and localized configurations of innovative activities The book brings together scholars who are working on these topics Rather than

focusing on established concepts and theories the book aims to question narrow explanations rigid territorializations and simplistic policy frameworks it provides evidence that innovation while not exclusively dependent on regional contexts can be influenced by place specific attributes The book will bring together new empirical and conceptual work by an interdisciplinary group of leading scholars from areas such as economic geography innovation studies and political science Based on recent discussions surrounding innovation systems of different types it aims to synthesize state of the art know how and provide new perspectives on the role of innovation and knowledge creation in the global political economy *Anchoring Innovation Districts* Costas Spirou, 2021-05-18 This book draws on case studies that explore the role that technological innovation guided by entrepreneurialism in higher education can have on economic development and urban change This framework of sociological analysis with illustrative cases of successes and failures provides insights into the transformational power of higher education in the built environment The book s target audience includes university administrators board members and regents local and state government officials and entrepreneurs
