Regional And Sectoral Development In Mexico As Alternatives To Migration:

Regional And Sectoral Development In Mexico As Alternatives To Migration Sergio Diaz-briquets, Sidney Weintraub, 2019-07-11 This volume examines a number of regional and sectoral developments in Mexico and assesses how they are related to undocumented migration to the United States representing efforts to identify productive alternatives to the problem of migration

Aid in Place of Migration? W. R. Böhning, International Labour Office, 1994 This book contains a selection of case studies prepared for an ILO UNHCR meeting on international aid as a means to reduce the need for emigration It considers international assistance to and migration from Eastern Europe the Horn of Africa Central America the Philippines Tunisia and Turkey as well as looking more generally at refugee policy in the post Cold War world and at reducing emigration pressure through foreign aid

Mexico and its Diaspora in the United States Alexandra Délano, 2011-06-06 In the past two decades changes in the Mexican government's policies toward the 30 million Mexican migrants living in the US highlight the importance of the Mexican diaspora in both countries given its size its economic power and its growing political participation across borders This work examines how the Mexican government's assessment of the possibilities and consequences of implementing certain emigration policies from 1848 to 2010 has been tied to changes in the bilateral relationship which remains a key factor in Mexico's current development of strategies and policies in relation to migrants in the United States Understanding this dynamic gives an insight into the stated and unstated objectives of Mexico's recent activism in defending migrants rights and engaging the diaspora the continuing linkage between Mexican migration policies and shifts in the US Mexico relationship and the limits and possibilities for expanding shared mechanisms for the management of migration within the NAFTA framework

Constructed Movements Ragini Shah, 2024-12-03 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more At once theoretically sophisticated and poignantly written *Constructed Movements* centers stories from communities in Mexico profoundly affected by emigration to the United States to show how migration extracts resources along racial lines Ragini Shah chronicles how three interrelated dynamics the maldistribution of public resources the exploitation of migrant labor and the US immigration enforcement regime entrench the necessity of migration as a strategy for survival in Mexico She also highlights the alternative visions elaborated by migrant community organizations that seek to end the conditions that force migration Recognizing that reform without recompense will never right an unjust migratory system Shah concludes with a forceful call for the US and Mexican governments to make abolitionist investments and reparative compensation to directly counteract this legacy of extraction

Ambivalent Journey Richard C. Jones, 2022-09-13 The changing political and economic relationships between Mexico and the United States and the concurrent US debate over immigration policy and practice demand new data on migration and its economic effects In this innovative study Richard C

Jones analyzes migration patterns from two subregions of north central Mexico Coahuila and Zacatecas to the United States He analyzes and contrasts the characteristics of the two migrant populations and interprets the economic impacts of migration upon both home of migration upon both home areas Jones s findings refute some common assumptions about Mexican migration while providing a strong model for further research Jones s study focuses on the ways in which U S migration affects the lives of families in these two subregions Migrants from Zacatecas have traditionally come from rural areas and have gone to California and Illinois Migrants from Coahuila on the other hand usually come from urban areas and have almost exclusively preferred locations in nearby Texas The different motivations of both groups for migrating and the different economic and social effects upon their home areas realized by migrating form the core of this book The comparison also lends the book its uniqueness since no other study has made such an in depth comparison of two areas Jones addresses the basic dichotomy of structuralists who maintain that dependency and disinvestment are the rule for families and communities in sending areas and functionalists who believe that autonomy and reinvestment are the case of migrants and their families in home regions Jones finds that much of the primary literature is based on uneven and largely outdated data that leans heavily on two sending states Jalisco and Michoacan His fresh analysis shows that communities and regions of Mexico rather than families only account for differing migration patterns and differing social and economic results of these patterns Jones s study will be of value not only to scholars and practitioners working in the field of Mexican migration but also for its innovative methodology to anthropologists sociologists political scientists and historians whose interests include human migration patterns in any part of the world

Special Report ,1992

The Making of Citizens Bryan Roberts, 2020-11-25 Originally published as *Cities of Peasants* this highly acclaimed account of the expansion of capitalism in the developing world has now been extensively rewritten and updated Focusing on Latin America Bryan Roberts traces the evolution of developing societies and their economies to the present Taking account of the move towards more open economies a shrinking of the state and various transitions towards democracies he shows how urban growth has produced new patterns of social stratification creating opportunities for social mobility but doing little to decrease income inequality or political and social pressures Underlying social changes have broadened the practice of citizenship in developing countries limiting authoritarian rule but within a context of entrenched social inequalities and persisting political instability This book conveys both the flavour of life in the cities of the third world and the immediacy of their problems

Women in the Age of Economic Transformation Nahid Aslanbeigui, Steven Pressman, Gale Summerfield, 2005-08-04 Changes are sweeping the world economy and are most apparent in post socialist Europe and in the developing world This volume examines the impact these changes are having on women The authors discuss the evidence of gender bias and reach some telling if unsurprising conclusions Regardless of the country involved the findings point to consistent female disadvantage in the transformation process

Employment Effects of the North American Free Trade Agreement (NAFTA) DIANE Publishing Company, 1994 Examines worker dislocation and immigration effects of NAFTA Includes recommendations on worker adjustment assistance programs that address the adverse employment effects of NAFTA and migrant and seasonal farmworker programs that address the short term increases in Mexican immigration that are likely to result from NAFTA Charts tables and graphs

The Employment Effects of the North American Free Trade Agreement United States. National Commission for Employment Policy, 1992 Scottish psychiatrist R D Laing gained a reputation in the late 60's for his radical objection to conventional psychiatry After 35 years of professional practice he agreed to be videotaped in public lectures and private conversations

The Health of Aging Hispanics Jacqueline L. Angel, Keith E. Whitfield, 2007-08-06 The emergence of the

Hispanic population in the United States and the increasing profile of Latin America on the North and South American continents have raised the profile of Latino issues in the American consciousness. Much of this attention, however, has revolved around trends in culture, art, food, and music, or pathological concerns about poverty, crime, drugs, and immigration. At best, the scholarly and policy assessments of the implications of the impact of Latinos in the United States revolve around Mexican Americans, Puerto Ricans, and Central Americans, as well as the children of an older Cuban population and their struggles to achieve a measure of education, healthcare, employment, and civil rights. What have not been adequately addressed are the demographic trends affecting Latinos in the United States. Mexico and Latin America, particularly the aging of the Hispanic population and its resultant health and long-term care needs. That Latinos are living longer and shifting from a youthful population to an increasingly older cohort is little known, except among the small cadre of Hispanic gerontologists. Ironically, this invisibility of aging Hispanics is juxtaposed to the almost picked response of the U.S. media and public toward the aging of the general U.S. population and the social and political controversies over Social Security, Medicare, and health care costs. The policy debates of an aging U.S. population as a whole arise from substantial research and policy analysis, a level of attention not seen with regard to the aging of the Hispanic population.

The Global Governance of Food Sara R. Curran, April Linton, Abigail Cooke, Andrew Schrank, 2013-09-13

Food provides a particularly exciting and grounded research site for understanding the mechanisms governing global transactions in the 21st century. While food is intimately and fundamentally related to ecological and human well-being, food products now travel far-flung trade routes to reach us. International trade in food has tripled in value and quadrupled in volume since 1960, and tracing the production, movement, transformation, and consumption of food necessitates research that situates localities within global networks and facilitates our capacity to see the trees and the forest by zooming from the global to the local and back to the global. Our need for food is a constant; how we acquire food is a variable, and the production, commercialization, and consumption of food therefore offer an invaluable window onto the globalization of the world we inhabit. Food provides an ideal site for answering the fundamental questions of governance of central concern to globalization debates. This book presents recent and interdisciplinary scholarship about the variety of mechanisms governing global food systems and their impacts on human and environmental well-being. This book was previously published as a special issue of *Globalizations*.

Temporary Workers or Future Citizens? Tadashi Hanami, Myron Weiner, 1997-11-19

Japan and the United States are under global and domestic pressures to simultaneously expand and to restrict immigration. In both countries, migration, refugee, and citizenship policies have become highly contentious political issues. Myron Weiner and

Tadashi Hanami have brought together a distinguished group of American and Japanese experts to examine the very different approaches of these two societies in dealing with employer demand for labour control over illegal migration the challenge of incorporating immigrants the legal rights and social benefits of foreign residents and illegal migrants and the claims of refugees and asylum seekers
