Regional City New Urbanism And The End Of Sprawl:

Alabaster Cities John Rennie Short, 2006-12-05 With keen insight and exhaustive research John Rennie Short narrates the story of urban America from 1950 to the present revealing a compelling portrait of urban transformation Short chronicles the steady rise of urbanization the increasing suburbanization and the sweeping metropolitanization of the U S uncovering the forces behind these shifts and their consequences for American communities Drawing on numerous studies first hand anecdotes census figures and other statistical data Short s work addresses the globalization of U S cities the increased polarization of urban life in the U S the role of civic engagement and the huge role played by the public sector in shaping the character of cities With deft analysis the author weaves together the themes of urban renewal suburbanization and metropolitan fragmentation race and ethnicity and immigration presenting a fascinating and highly readable account of the U S in the second half of the twentieth century *The Humanists versus the Reactionary Avant Garde* Charles Siegel, 2016-02-09 Modernist architects were part of a larger social movement that believed technology would bring a better future Today we can see that we need to make selective use of technology using technologies that are beneficial and controlling those that are destructive Beginning in the 1970s postmodern architects were part of a larger social movement to use technology for human purposes But today s avant gardists have rejected this humanist impulse and regressed to the modernist fascination with technology for its own sake even if their designs are cold and sterile and even if their designs are so antihuman that they make people feel sick The avant gardists are conservatives celebrating the status quo of our technological economy Neotraditional architects are the real progressives trying to humanize our economy With its new view of the history of architecture its hilarious examples of antihuman avant gardist designs and its inspiring examples of designs that learn from traditional models this book will convince you that the emperors of today s architecture have no clothes Among the books on this topic that I have read yours is by far the most sophisticated and the most up to date Andres Duany principal of DPZ Partners Siegel makes a clear and intelligent case based not on romantic nostalgia but on the pressing issues of contemporary society I recommend this book in the strongest possible terms Prof Nikos Salingaros author of A Theory of Architecture *The City Reader* Richard T.
