Regional International Organizations:

Regional International Organizations / Structures and Functions Paul A. Tharp, 1971-06-18 Regional Security Rodrigo Tavares, 2009-12-16 This book is the first systematic study of the capacities of the most recognized intergovernmental organizations with a security mandate Interactions between Regional and Universal Organizations Laurence Boisson de Chazournes, 2016-11-01 Cooperation through international organizations is fundamental to the international legal order International organizations are nowadays ubiquitous and come in many different manifestations each allowing for different levels of international cooperation The profile of regional and universal organizations may vary greatly from one organization to another At the same time they do not live apart and this has led to the creation of a complex network of relationships These relationships have seldom been the object of scholarship and this book seeks to address that gap In general the relationships between international organizations can give rise to such issues as the conditions placed upon one organization by another demarcations of competence membership of other organizations and various forms of collaboration involving the conclusion of agreements between organizations Optimal coexistence cooperation and coherence all play a role in optimizing the relations between international organizations The volume concludes by analysing current challenges including those of legal identity responsibility and accountability as well as making proposals for reform such as through the development of a common law between organizations *International Organization in the Modern World* Paul Graham Taylor, 1993 **Exit Threats in Regional International Organizations** Diana Panke, Lukas Grundseld, Pawel Tverskoi, 2025-09-30 Available open access digitally under CC BY NC ND licence This book offers a comprehensive analysis of why and when member states threaten to withdraw from regional international organizations RIOs A unique dataset covers over 120 exit threats across RIOs from all world regions The book explains variation as a result of limited specific and diffuse support such as the inability to exert influence or prevail under majority decision making as well as a lack of democratic socialization With nationalism and populism on the rise this timely study unpacks crucial pressure points in international institutions offering invaluable insights into how they can maintain stability in the face of internal contestations

Authoritarian Regionalism in the World of International Organizations Anastassia V. Obydenkova, OBYDENKOVA & LIBMAN., The post Cold War world has witnessed the extensive development of regional international organizations world wide The relationship between their membership and democratization remains a topic of intense scholarly debate This book opens up a new aspect of the debate by examining regional organization as set up by autocracies e g Iran Saudi Arabia Venezuela Russia and China referring to them as non democratic regional organizations How do these newly emerged organizations counteract and confront the democratization process in their own member states and beyond their borders How and why do the political regimes the economic development and the cultures of their member states impact the foundation and development of these organizations What influence do these organizations have on migration trade conflicts

and democratization The book addresses these questions by developing a new theory of authoritarian regionalism Employing quantitative analysis of authoritarian regionalism world wide and its historical development since the 1950s as well as analysing case studies of post Soviet Eurasia the book argues that authoritarian regionalism is a new phenomenon in world politics and that modern non democratic organizations differ from their historical predecessors and that their influence has radically increased in terms of geographic scope and intensity in the last few years As such authoritarian regionalism is an important addition to studies of comparative regionalism and the international dimension of authoritarianism From the policy perspective non democratic regional organizations pose a challenge for Western actors in promoting democracy around the world

Regional Cooperation, and the Role of International Organizations and Regional Integration Maurice W. Schiff, L. Alan Winters, 2002

Non-Governmental Interests in International Regional Organizations Elisa Tino, 2018-03-20 International organizations are typically intergovernmental in nature and endowed with a bipolar institutional structure where organs of States are usually juxtaposed with the Secretariat On these premises in Non Governmental Interests in Regional Organizations The Role of Parliamentary Socio Economic and Territorial Institutions Elisa Tino aims at analysing the unexplored phenomenon of institutional multipolarism of regional organizations namely the trend to establish institutions representing non governmental interests Particularly illustrating their diffusion in various geographic areas explaining rationales underlying their establishment and investigating their institutional aspects Elisa Tino pinpoints the contribution of these institutions to the development of regional organizations both according to the functionalist approach and the constitutionalist one Thus she aims at providing food for thought in the study of international organizations

The Oxford Handbook of International Organizations Jacob Katz Cogan, Ian Hurd, Ian Johnstone, 2016-11-10 Virtually every important question of public policy today involves an international organization From trade to intellectual property to health policy and beyond governments interact with international organizations in almost everything they do Increasingly individual citizens are directly affected by the work of international organizations Aimed at academics students practitioners and lawyers this book gives a comprehensive overview of the world of international organizations today It emphasizes both the practical aspects of their organization and operation and the conceptual issues that arise at the junctures between nation states and international authority and between law and politics While the focus is on inter governmental organizations the book also encompasses non governmental organizations and public policy networks With essays by the leading scholars and practitioners the book first considers the main international organizations and the kinds of problems they address This includes chapters on the organizations that relate to trade humanitarian aid peace operations and more as well as chapters on the history of international organizations The book then looks at the constituent parts and internal functioning of international organizations This addresses the internal management of the organization and includes chapters on the distribution of decision making power within the organizations the structure of their assemblies the role of

Secretaries General and other heads budgets and finance and other elements of complex bureaucracies at the international level This book is essential reading for scholars practitioners and students alike *International Organizations* John McCormick, 2024-02-22 What role do humanitarian organizations play in crises such as those in Ukraine and the Middle East How does policing work at an international level Why has the US only ratified three of the seven major human rights treaties Who guides the international response to climate change and is it working This new textbook introduces readers to the nature structure and purpose of international organizations IOs Taking a broad issues based approach the book goes beyond a conventional focus on topics like security and finance to cover global health migration food security and technology In addition to providing cases of the best known intergovernmental organizations such as the UN and the World Trade Organization this text gives space to a wide variety of other bodies including international non governmental organizations non state actors and multinational enterprises It looks at the motivations behind regional cooperation with case studies of the European Union and the African Union and at human rights with reference to bodies as diverse as the International Criminal Court and Amnesty International Assuming no prior knowledge of the subject *International Organizations* uses a range of pedagogical tools and visual features to guide understanding These include graphs to illustrate key trends regional and world maps to illustrate wealth democracy and development tables of major international treaties and organizations chapter previews and lists of key terms and organizations The text also makes use of IOs in Theory IOs in Action and Spotlight boxes to answer focused questions and provide more detail on how IOs operate in different parts of the world This contemporary survey is an essential text for those studying global governance and international organizations

International Organization in the Anarchical Society Tonny Brems Knudsen, Cornelia Navari, 2018-05-23 This book takes up one of the key theoretical challenges in the English School's conceptual framework namely the nature of the institutions of international society It theorizes their nature through an analysis of the relationship of primary and secondary levels of institutional formation so far largely ignored in English School theorizing and provides case studies to illuminate the theory Hitherto the School has largely failed to study secondary institutions such as international organizations and regimes as autonomous objects of analysis seeing them as mere materializations of primary institutions Building on legal and constructivist arguments about the constitutive character of institutions it demonstrates how primary institutions frame secondary organizations and regimes but also how secondary institutions construct agencies with capacities that impinge upon and can change primary institutions Based on legal and constructivist ideas it develops a theoretical model that sees primary and secondary institutions as shared understandings enmeshed in observable historical processes of constitution reproduction and regulation

Sustainable Development, Regional Governance, and International Organizations Anastassia Obydenkova, 2024-06-28 This book aspires to establish a dialogue among the studies of sustainable development global environmental politics comparative regionalism and area studies of Eurasia The chapters in this book reflect deep knowledge

of the authors of the main trends in environmental politics at global international and national levels before the invasion in Ukraine in 2022 First the book looks into the role and impact of international organizations such as the European Union EU European Bank for Reconstruction and Development EBRD Arctic Council AC and Global Forums on Climate Action on post Communist states but also the role of nation states e g Russia Kazakhstan and China Second the book explores relatively new international organizations such as the Eurasian Economic Union EAEU the Eurasian Development Bank and the Shanghai Cooperation Organization SCO How do the EAEU EDB and the SCO matter if at all in promoting an environmental agenda How do the EU EBRD and the AC advance the environmental agenda across the post Communist region This book aspires to answer these questions and to shed more light on the challenges to sustainable development in post Communist Europe Central Asia and Eurasia With a new foreword and afterword this book will appeal to students scholars and researchers of political science international relations area studies as well as practitioners and policymakers working in international organizations and dealing with challenges of sustainable development The other chapters were originally published as a special issue of Problems of Post Communism Regional Cooperation, and the Role of International Organizations and Regional Integration Maurice Schiff,2016 Schiff and Winters examine regional cooperation among neighboring countries in the area of regional public goods These public goods include water basins such as lakes rivers and underground water infrastructure such as roads railways and dams energy and the environment Their analysis focuses on developing countries and the potentially beneficial role that international organizations and regional integration may play in bringing the relevant countries to a cooperative equilibrium A major problem in reaching a cooperative solution is likely to be the lack of trust If neighboring countries do not trust each other because of past problems they may fail to reach a cooperative solution as each tries to maximize its gain from the regional public good These strategies typically do not account for spillover effects and ultimately leads to losses for all parties Other constraints on reaching a cooperative solution are its complexity and the financial requirements Two types of institutions may help resolve some or all of these problems International organizations can help with trust expertise and financing The United Nations and the World Bank have been involved in a number of such projects in Africa Asia and elsewhere and have been successful in helping parties reach cooperative solutions Regional integration agreements though not necessary for regional cooperation may also be helpful by embedding the negotiations on regional cooperation in a broader institutional framework The authors examine these issues with the support of both analysis and a number of case studies This paper a product of Trade Development Research Group is part of a larger effort in the group to examine the role and effects of regional integration Maurice Schiff may be contacted at mschiff@worldbank.org

International Organizations and the Management of Regime Complexity

Diana Panke, Sören Stapel, 2025-05-15 Regime complexity which is characterized by overlap between international organizations IOs concerning both policy competencies and member states has been increasing over time It is a defining feature of today s international system As the regime complexity literature points out overlaps between IOs carry potential negative effects such as duplicated efforts or incompatible norms This book argues that IOs can actively manage regime complexity and potentially avoid negative side effects or even create positive benefits Yet overlapping IOs differ in how they react To explain under what conditions IOs disregard overlaps or manage them by resorting to confrontation or collaboration this book addresses the following research questions Why do organizations differ in their responses to overlaps Why do some opt for disregard while others choose confrontation or engage in collaboration These questions are answered by studying a subset of IOs namely regional international organizations RIOs which recruit their member states on the basis of geographic criteria It introduces a novel theoretical selection model on three junctures saliency ideological fit and contextual uncertainties This influences whether overlapping RIOs disregard one another and do not actively manage regional regime complexity low

saliency when they choose confrontation high saliency but low ideological fit and when they opt for one of two ways to engage in collaboration namely coordination high saliency high ideological fit limited contextual uncertainty or cooperation high saliency high ideological fit high contextual uncertainty The corresponding hypotheses are comprehensively analyzed in qualitative case studies from Africa the Americas Asia and Europe Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks It brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford
