Yehua Dennis Wei

Regional Policy Of China 1949-85:

Regional Policy of China, 1949-85 Kjeld Allan Larsen, 1992 *Regional Development in China* Yehua Dennis Wei, 2013-04-15 This study systematically examines uneven regional development in China focusing on three central agents the foreign investor the state and the region Wei's findings have important implications for theories of and policy towards Chinese regional development This book is a vital resource for those with an interest in transition economies China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions This book responds to this challenge by looking at the development of China's regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the role of China's regions in the globally focused belt and road initiative launched by the Chinese government in late 2013 The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations China's Campaign to 'Open Up the West' David S. G. Goodman, 2004-11-08 The 2004 volume examines the newly adopted Chinese government policy designed to aid the development of China's western regions It considers the political and economic context of the campaign and then examines its potential impact in seven provincial level jurisdictions Xinjiang Qinghai Sichuan Shaanxi Chongqing Yunnan and Guizhou China's Provinces in Reform David Goodman, 2002-11-01 China is a far larger and more diverse country than many people in the West realise The provinces that make up the country are considerable social economic and political systems in their own right They are comparable in size and complexity to European states China's Provinces in Reform is concerned with the impact of economic reform and social and political change within the provinces at the immediate sub central level of the People's Republic of China One of the main aims of this book is to question over generalizations about China's development in the reform era However the provincial analysis of social and political change in China also has the potential to reveal even more in a comparative perspective This is the first volume of a series and covers Guangxi Hainan Liaoning Shandong Shanghai Sichuan and Zhejiang It is part of a project conducted by the Institute for International Studies at the University of Technology Sydney that will provide the most thorough and up to date analysis of China's provinces yet published **Provincial Strategies of Economic Reform in Post-Mao China** Peter T.Y. Cheung, Jae Ho Chung, Zhimin Lin, 2016-12-05 Focusing on the role of provincial leadership in the initiation and implementation of economic reform this text studies economic decentralization in eight Chinese provinces In each area resource allocation and acquisition of foreign capital and investment

are investigated **Critical Issues in Contemporary China** Czeslaw Tubilewicz, 2006-09-27 This informative and up to date text takes a multidisciplinary approach in examining contemporary China It provides students with a comprehensive analysis of a number of the social political and economic problems that China faces as it enters the twenty first century The chapters cover key issues including critical developments in Chinese politicsuneven economic developmentprivatization in Chinaenvironmental problemsdemography and food productionethnic minoritiescross strait relationsocio cultural issues

China's Urban Champions Kyle A. Jaros, 2019-07-23 An exploration of how key provinces in China shape urban and regional development The rise of major metropolises across China since the 1990s has been a double edged sword although big cities function as economic powerhouses concentrated urban growth can worsen regional inequalities governance challenges and social tensions Wary of these dangers China's national leaders have tried to forestall top heavy urbanization However urban and regional development policies at the subnational level have not always followed suit China's Urban Champions explores the development paths of different provinces and asks why policymakers in many cases favor big cities in a way that reinforces spatial inequalities rather than reducing them Kyle Jaros combines in depth case studies of Hunan Jiangxi Shaanxi and Jiangsu provinces with quantitative analysis to shed light on the political drivers of uneven development Drawing on numerous Chinese language written sources including government documents and media reports as well as a wealth of field interviews with officials policy experts urban planners academics and businesspeople Jaros shows how provincial development strategies are shaped by both the horizontal relations of competition among different provinces and the vertical relations among different tiers of government Metropolitan oriented development strategies advance when lagging economic performance leads provincial leaders to fixate on boosting regional competitiveness and when provincial governments have the political strength to impose their policy priorities over the objections of other actors Rethinking the politics of spatial policy in an era of booming growth China's Urban Champions highlights the key role of provincial units in determining the nation's metropolitan and regional development trajectory **China's Regional Development** David S. G. Goodman, 2013-11-05 First published in 1989 This book considers two major aspect of China's economic reform the open policy towards the West aimed at attracting technology and skills into the country and the emphasis on regionalization which established market orientated rather than bureaucratically controlled patterns of economic development *The Australian Journal of Chinese Affairs* ,1994 *Shanghai's Role in the Economic Development of China* Gang Tian, 1996-11-25 This pioneering work presents for the first time a comprehensive study of the role of Shanghai in the economic development of China Shanghai experienced stagnation and setbacks in comparison with other big cities and provinces in South China with the open door policy of 1979 and other economic reforms In terms of export volume use of foreign capital and overall economic growth Shanghai remained behind Guangdong and Jiangsu The fundamental question of why Shanghai maintained a lead position in the national economy and how it was neglected in the Special Economic Zones established in early 1980 is

examined herein In addition the benefits of trade reform comparative advantage and foreign direct investment in Shanghai's recent expansion is discussed

China's Tibet Policy Dawa Norbu, 2001-09-27 This major study analyses the traditional modes of Sino Tibetan relations in order to unearth general patterns beyond partisan points of view It sheds light on contemporary issues in the Sino Tibetan dialogue and discerns possible future structures for conflict resolution in occupied Tibet With its economic reforms China is changing and will change

International Current Awareness Services, 1993 Indexes current publications in anthropology including material too ephemeral for its parent annual the International bibliography of social and cultural anthropology and has only limited coverage of monographs

Zhejiang in Reform Keith Forster, 1998 This text is the first in a series which provides a detailed introduction to the economic financial and trade environments in each of China's provinces

China in the 1980s S. Breslin, 1996-02-12 This book analyses the changing nature of centre province relations in China in a period of rapid economic change It aims to show how leadership conflicts over the nature and scope of economic change gave rise to an incremental and reactive reform process The resulting partially reformed economic system not only gave many provincial leaders the ability to ignore central economic commands but the perceived consequences of reform also increased the desire of some local leaders to assert their independence
