Building Regions Luk Van Langenhove, 2016-04-08 Regions How they emerge and how they are dramatically changing the appearance of the present world of states and its related forms of governance from local to global levels is analysed in this monograph But what are regions Regions can be small or huge They can be part of a single state be composed out of different states or stretched out across borders They can be important recognized economic social or cultural entities or they can be largely ignored by the people who live on a region's territory They can be well defined with clear cut boundaries as is the case in so called constitutional regions or they can be fuzzy as for instance in cross border regions In sum they are not a natural kind and defining regions is not a simple task Luk Van Langenhove advances the concept of region building as an alternative to the construction of regions with three issues of region building being explored Why are regions built in a world of states How do region building processes take place How are regions transforming the present world order Crossing disciplinary boundaries this book is an exercise in theorizing regions and brings together under one conceptual framework different processes and concepts such as regional integration devolution federalism and separatism and refines the social constructionist view on regions

Global Politics of Regionalism Mary Farrell, Björn Hettne, Luk Van Langenhove, 2005-08-20 This book explores the phenomenon of regionalism In a seeming contradiction to globalization there is a growing tendency for countries to enter into regional arrangements as a response to the pressures of operating in a global marketplace But regionalism is also emerging as a phenomenon in its own right serving distinct purposes and taking different forms in different areas The contributors explore how these patterns impact on wider issues such as global governance democracy and trade The book reviews the major theoretical approaches to regional cooperation including perspectives from international relations political economy economics and sociology It is divided into

three main sections theoretical approaches to regionalism issues of regional cooperation such as security monetary issues identity and integration and an exploration of specific case studies including the Middle East Africa the Americas China Europe Asia and the Pacific With an international range of contributors including Bjorn Hettne Louise Fawcett and Andrew Hurrell this in depth and multi disciplinary guide will be of interest to students across the social sciences and to the wider policy community

Politics and Globalisation Martin Shaw,2003-09-02 Globalisation is widely understood as a set of processes driven by technological economic and cultural change Few have successfully defined the changing character and role of politics in global change Political institutions such as the nation state have been seen as undermined by globalisation or needing to respond to it This book clarifies the tensions which global change has provoked in our understanding of politics Politics and Globalisation suggests that globalisation is a process which is politically contested and even politically constituted The volume presents five key intellectual and political contests in globalisation the extent and political significance of globalising changes in economy and society how and how far the relations and forms of nation state organisation are transformed whether the given concepts and methods of political science as a discipline can be applied to global and regional politics and whether they require radical reformulation the role and significance of ethical questions in global change whether global change is constituted by or denies radical political agency

China and India Jonathan Holslag,2010-01-22 For all their spectacular growth China and India must still lift a hundred million citizens out of poverty and create jobs for the numerous laborers Both powers hope trade and investment will sustain national unity For the first time Jonathan Holslag identifies these objectives as new sources of rivalry and argues that China and India cannot grow without fierce contest Though he recognizes that both countries wish to maintain stable relations Holslag argues that success in implementing economic reform will give way to conflict This rivalry is already tangible in Asia as a whole where shifting patterns of economic influence have altered the balance of power and have led to shortsighted policies that undermine regional stability Holslag also demonstrates that despite two decades of peace mutual perceptions have become hostile and a military game of tit for tat promises to diminish prospects for peace Holslag therefore refutes the notion that development and interdependence lead to peace and he does so by embedding rich empirical evidence within broader debates on international relations theory His book is down to earth and realistic while also taking into account the complexities of internal policymaking The result is a fascinating portrait of the complicated interaction among economic political military and perceptual levels of diplomacy

Integration in Asia and Europe Paul J.J. Welfens,2006 Broadening and deepening of economic and political integration are hallmarks of the EU and ASEAN Analysing the economic and institutional changes in both Europe and Asia this book emphasizes on banking financial market dynamics ICT and macroeconomic policies The legal aspects are combined with historical and economic perspectives
