Regionalization of the Law of the Sea Law of the Sea Institute. Conference,1978 The Role of Regional Organizations in the Context of Climate Change Michael H. Glantz,2013-06-29 The past two decades have seen a remarkable broadening of interest in global warming from a research concern on the part of a limited number of scientists to a political problem on a worldwide scale The nature of this transformation would itself be a fruitful study for a mixed team of social scientists and natural scientists It would be valuable to assess the differing nature of the staging posts along this road the First World Climate Conference in 1979 which was a meeting of scientists talking to scientists the Villach Assessment of 1985 which was a meeting of scientists whose report was given attention by the policy advisers of a number of governments the Second World Climate Conference of 1990 which consisted of a scientific meeting followed by a Ministerial Meeting and the United Nations Framework Convention on Climate Change of 1992 signed by 158 countries at the UN Conference on Environment and Development in June 1992 The present publication is a welcome contribution of the followup to UNCED By focusing on a specific problem it avoids the pitfall of undue generalization and provides the basis for fruitful discussion between natural scientists social scientists and policymakers To choose as the area of concentration a particular scale also helped to produce meaningful discussion likely to lead to action *Canadian Perspectives on Economic Relations with Japan*

Ocean Boundary

Making Douglas M. Johnston, Phillip Saunders, 2024-05-01 Originally published in 1988 this book was written at a time when many nations were engaged in various forms of ocean boundary making This created new regional pressures and the need for collective regional responses to these issues This book examines the issues at stake and the boundary making processes It discusses these in a general way showing how the Third UN conference on the Law of the Sea helped resolve the problems whilst leaving some issues unresolved The book goes on to examine the issues and boundary making processes in 7 important areas of the world

Maritime Regime Building Mark J. Valencia, 2001-06-20 The past few decades have witnessed the emergence of a vast array of regional arrangements and institutions dealing with all aspects of ocean management The level of cooperation ranges from minimal dispute avoidance to relatively comprehensive ocean governance at the regional level As concrete examples reasonably successful and comprehensive regional regimes have been created for the Baltic the North and the Mediterranean Seas and the South Pacific And attempts at regional regime building are ongoing in Southeast Asia the South China Sea and the Indian Ocean Although there are broad similarities between the semi enclosed seas of Western Europe and Northeast Asia no regional maritime regime has yet been initiated in Northeast Asia The papers in this volume are authored by leading authorities on not only the maritime affairs of their particular region of focus but on maritime policy in general They describe and explain existing or incipient regional maritime regimes in an unusually broad comparative context and extract lessons learned that may be applicable elsewhere including Northeast Asia The case studies are neatly sandwiched between an introduction to concepts and principles on regional co operation and concluding chapters on lessons learned and their applicability to Northeast Asia Moreover the papers raise and address several questions of relevance to policy For example what factors are conducive to maritime regime initiation expansion and positive evolution and which constrain regime formation and evolution Why has maritime regime building been successful in Europe and largely unsuccessful in Asia And which if any lessons learned in the European context are applicable in Asia Given the growing interest in regime formation and effectiveness in general and maritime regimes in particular this book will be of considerable interest to both analysts and policymakers
