Media Regulation, Public Interest and the Law Mike Feintuck, 2006-07-10 Regulation of the media has traditionally been premised upon claims of the public interest yet the term itself remains contested and generally ill defined In the context of technological development and convergence as well as corporate conglomeration traditional public service values in British broadcasting are challenged by market values With such ongoing trends continuing apace regulators must increasingly justify their interventions The communication industries commercialisation and privatisation pose a fundamental threat to democratic values Media Regulation Public Interest and the Law argues that regulators will only successfully protect such values if claims associated with citizenship are recognised as the rationale and objective for the regulatory endeavour While such themes are central to the book this second edition has been substantially revised and updated to take account of matters such as European Directives the UK s Communications Act 2003 the process of reviewing the BBC s Charter and relevant aspects of the reform

Public Law in a Multi-Layered Constitution Nicholas Bamforth, Peter Leyland, 2003-10-30 How is the distribution of power between the different levels of the contemporary constitution to be policed What is the emerging contribution of the courts in regard to EC law the Human Rights Act 1998 and devolution What roles should be played by the legislative and judicial bodies at each level Who should have access to the courts in public law disputes and on what grounds should the courts regulate the exercise of public power Can a coherent distinction be maintained between public and private law These essays by leading public law scholars explore the allocation and regulation of public power in the United Kingdom At the beginning of the twenty first century it appears that the traditional Diceyan model of a unitary constitution has been superseded as power has come to be distributed particularly in the post 1997 period between institutions at European national devolved and local level Furthermore the courts have come to play a powerful role at all levels through judicial review while forms of regulation and contracting together with other informal techniques of governance have emerged The contemporary constitution can be characterised as involving a multi layered distribution of power a situation which raises many key questions about the role of public law The essays in this important collection tackle

such questions from a variety of perspectives aiming between them to provide a dynamic picture of the role of public law in the contemporary multi layered constitution

The British Regulatory State Michael Moran, 2003-08-14 For the first two thirds of the twentieth century British government was among the most stable in the advanced industrial world In the last three decades the governing arrangements have been in turmoil and the country has been a pioneer in economic reform and in public sector change In this book Michael Moran examines and explains the contrast between these two epochs What turned Britain into a laboratory of political innovation Britain became a formal democracy at the start of the twentieth century but the practice of government remained oligarchic From the 1970s this oligarchy collapsed under the pressure of economic crisis The British regulatory state is being constructed in its place Moran challenges the prevailing view that this new state is liberal or decentralizing Instead he argues that it is a new threatening kind of interventionist state which is colonizing dominating and centralizing hitherto independent domains of civil society The book is essential reading for all those interested in British political development and in the nature and impact of regulation

F. Forsyth, William Wade, Christopher Forsyth, Julian Ghosh, 2023 Wade Forsyth's Administrative Law is the definitive account of the principles of judicial review and the administrative arrangements of the United Kingdom Firmly established among the foremost rank of legal textbooks it stands unparalleled in both scope and detail National Regulation and Trade Liberalization in Services Markus Krajewski, 2003-01-01 Like tariffs and other border measures national regulatory barriers impede international trade Unlike tariffs however such barriers usually indicate an important domestic policy choice This conflict of interest has emerged as a crucial issue in international law particularly with regard to services such as telecommunications and health services This study is the first to analyze the potential impact of incompatibilities between national regulatory regimes and the rules and obligations imposed by the General Agreement on Trade in Services GATS In the process of arriving at his challenging concluding theses the author investigates such relevant concepts as the following the political and ideological dynamics of GATS negotiations services trade liberalization in regional integration systems particularly in EC law policies common to diverse national regulatory systems the notions of deregulation and privatization the human rights implications of international trade law the GATS obligations of market access national treatment and most favoured nation treatment the role of the WTO's dispute settlement organs GATS transparency obligations Professor Krajewski's study is of enormous significance to specialists in regulatory policies and instruments at all national and sectoral levels especially in the context of ongoing GATS negotiations As the author warns Unless GATS negotiators and national regulators have a thorough understanding of the relationship between GATS obligations and regulatory policies and instruments they cannot effectively use the flexible elements of GATS and could reach an agreement which they may later regret *Law and Administration* Carol Harlow, Richard Rawlings, 2006 **From the "Democratic Deficit" to a "Democratic Surplus"** Athanasios Psygkas, 2017-10-17 Challenging the conventional narrative that the European Union suffers from a democratic deficit Athanasios Psygkas argues that EU mandates have enhanced the democratic accountability of national regulatory agencies This is because EU law has created entry points for stakeholder participation in the operation of national regulators these avenues for public participation were formerly either not open or not institutionalized to this degree By focusing on how the EU formally adopted procedural mandates to advance the substantive goal of creating an internal market in electronic communications Psygkas demonstrates that EU requirements have had significant implications for the nature of administrative governance in the member states Drawing on theoretical arguments in favor of decentralization traditionally applied to substantive policy making this book provides insight into regulatory processes to show how the decentralized EU structure may transform national regulatory authorities

into individual loci of experimentation that might in turn develop innovative results. It thus contributes to debates about federalism, governance and public policy as well as about deliberative and participatory democracy in the United States and Europe. This book informs current understandings of regulatory agency operations and institutional design by drawing on an original dataset of public consultations and interviews with agency officials, industry and consumer group representatives in Paris, Athens, Brussels and London. The on the ground original research provides a strong foundation for the directions the case law could take and small and larger scale institutional reforms that balance the goals of democracy, accountability and efficiency.

Routledge Handbook of Media Law Monroe E. Price, Stefaan Verhulst, Libby Morgan, 2013-01-04. Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence; rather, it provides a better understanding of the forces that generate media rules, norms and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including Media Law and Evolving Concepts of Democracy, Network neutrality and traffic management, Public Service Broadcasting in Europe, Interception of Communication and Surveillance in Russia, State secrets, leaks and the media. A variety of rule making institutions are considered, including administrative and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and Director of the Howard M. Squadron Program in Law, Media and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously, he was the co-founder and co-director with Professor Monroe Price of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University as well as senior research fellow at the Centre for Socio-Legal Studies.
