Regulation And Entry Into Telecommunications Markets:

Regulation and Entry into Telecommunications Markets Paul de Bijl, Martin Peitz, 2003-01-09 This book analyses telecommunications markets from early to mature competition filling the gap between the existing economic literature on competition and the real life application of theory to policy Paul De Bijl and Martin Peitz focus on both the transitory and the persistent asymmetries between telephone companies investigating the extent to which access price and retail price regulation stimulate both short and long term competition They explore and compare various settings such as non linear versus linear pricing facilities based versus unbundling based or carrier select based competition non segmented versus segmented markets On the basis of their analysis De Bijl and Peitz then formulate guidelines for policy This book is a valuable resource for academics regulators and telecommunications professionals It is accompanied by simulation programs devised by the authors both to establish and to illustrate their results

Telecommunication Markets Brigitte Preissl, Justus Haucap, Peter Curwen, 2009-06-12 Telecommunication markets are characterized by a dynamic development of technology and market structures The specific features of network based markets convergence of previously separate spheres and the complex task of market regulation put traditional theoretical approaches as well as current regulatory policies to the test This book sheds light on some of the challenges ahead It covers a vast range of subjects from the intricacies of market regulation to new markets for mobile and internet related services The diffusion of broadband technology and the emergence of new business strategies that respond to the technological and regulatory challenges are treated in the book's 24 chapters

OECD Review of Telecommunication Policy and Regulation in Mexico OECD, 2012-01-30 This publication reviews the telecommunication market in Mexico examines the current policy and regulatory framework of the sector and puts forward proposals for reform in order to develop competition in the market

Building Telecom Markets Whasun Jho, 2013-08-27 The mobile telecommunication industry has been one of the fastest growing industries in the global economy since the late 1990s As the first country to offer commercial Code Division Multiple Access CDMA cellular service in the world Korea was able to jump right into the digital mobile markets enhancing its status as a leading manufacturer of mobile equipment While the growth of the telecom industry occurred with the emergence of worldwide market oriented regulatory reform and liberalization in telecommunications the state market relationship in Korea evolved from state monopoly toward centralized governance and later toward flexible governance which is substantially different from liberal governance of the US This book examines the uniqueness of Korean regulatory reforms of the mobile telecommunication sector and argues that the market oriented regulatory reform and liberalization should be explained by focusing on the interactions among the state the private sector and international political economic environment It will appeal to scholars and policy makers alike concerned with market regulation Asian development and political economy

Global Markets and Government Regulation in Telecommunications Kirsten Rodine-Hardy, 2013-03-25 This book shows the surprising ways in which

globalization has led to the spread of liberal reforms in the telecommunications sector around the world This book argues that international organizations rather than just markets structure this diffusion of policy innovation by providing information sharing policy standards and developing regulatory networks The book aims to disaggregate the concept of globalization using econometric analysis and controlled case comparisons and shows how governments play a critical role in allowing the spread of exciting new technologies and access to the broader world The Economics of Antitrust and Regulation in Telecommunications Pierre A. Buigues,Patrick Rey,2004-01-01

Contributing to a convergence of legal and economic approaches The Economics of Antitrust and Regulation in Telecommunications integrates economic theory into current EU antitrust policy within the sector The book addresses the role of competition and regulatory policies on a number of key issues in telecommunications such as market definition collective dominance access to networks and allocation of scarce resources **National Communications Infrastructure** United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and Finance,1994

Telecommunications Law and Practice in Nigeria Enyia, Jacob Otu,2019-07-22 Telecommunications Law and Practice in Nigeria Perspectives on Consumer Protection is intended primarily to provide an indigenous source of information on the theoretical and legal framework of the regulation of telecommunications in Nigeria with respect to how such legal framework assists in addressing the consumers problems in the field of telecommunications The book covers the evolution of telecommunications the world over and its variant in Nigeria a variety of issues including the early controlling organs regulatory regimes the deregulation era interconnectivity and privacy law telecommunications and intellectual property international trade and drafting of international trade contracts encryption technology and privacy in telecommunications The book should be an invaluable companion on the Nigerian telecommunications law and practice with perspectives on consumer protection **Spectrum Auctions and**

Competition in Telecommunications Gerhard Illing,Ulrich Klüh,2003-12-23 Leading experts in industrial organization and auction theory examine the recent European telecommunication license auction experience In 2000 and 2001 several European countries carried out auctions for third generation technologies or universal mobile telephone services UMTS communication licenses These spectrum auctions inaugurated yet another era in an industry that has already been transformed by a combination of staggering technological innovation and substantial regulatory change Because of their spectacular but often puzzling outcomes these spectrum auctions attracted enormous attention and invited new research on the interplay of auctions industry dynamics and regulation This book collects essays on this topic by leading analysts of telecommunications and the European auction experience all but one presented at a November 2001 CESifo conference comments and responses are included as well to preserve some of the controversy and atmosphere of give and take at the conference The essays show the interconnectedness of two important and productive areas of modern economics auction theory and industrial organization Because spectrum auctions are embedded in a dynamic interaction of consumers firms

legislation and regulation a multidimensional approach yields important insights The first essays discuss strategies of stimulating new competition and the complex interplay of the political process regulation and competition The later essays focus on specific spectrum auctions Combining the empirical data these auctions provide with recent advances in microeconomic theory they examine questions of auction design and efficiency and convincingly explain the enormous variation of revenues in different auctions

Global Telecommunications Market Access Jennifer A. Manner,2002

Global Telecommunications Market Access offers you a solid understanding of the regulatory economic business public policy and other considerations associated with entry into global telecommunications markets from a commercial governmental and legal perspective The primary focus of this book is on the global telecommunications regulatory environment and how it impacts market access strategies and implementation of these strategies You are presented with case studies and a global view of the progression of telecommunications to help you better see how global markets are evolving from being dominated by monopoly service providers to one where choice has become a reality for consumers

Act of 1934 United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications, 1979 *OECD Reviews of Regulatory Reform: Regulatory Reform in Hungary 2000* OECD, 2000-07-20
 OECD's 2000 review of regulatory reform in Hungary **China's Telecommunications Reforms** Scott Yunxiang Guan, 2003 In the early 1990s China started to reform its telecommunications regime by removing barriers to foreign and private investment and encouraging competition This text applies the Public Choice Plus theory developed in the study of economics to the analysis of the policymaking process of China's telecommunications reforms Guan is a senior fellow at the Centre for Innovation Law and Policy at the U of Toronto **OECD Reviews of Regulatory Reform: Regulatory Reform in Greece 2001** OECD, 2001-05-30 This review of regulatory reform in Greece presents an integrated assessment of areas such as the quality of the public sector competition policy and enforcement and market openness It also contains chapters on sectors such as telecommunications electricity domestic ferries and trucking *Controlling Market Power in Telecommunications* Damien Geradin, Michel Kerf, 2003 Controlling market power is a crucial issue in liberalised telecommunications markets By comparatively analysing five countries this book explores how the regulatory framework should be designed **Dynamic Regulation and Entry in Telecommunications Markets** Paul de Bijl, 2005 We analyze a repeated setting of an asymmetric differentiated telecommunications market with an incumbent and an entrant The entrant may roll out its own network or use parts of the incumbent's network The incumbent is established in the market while the entrant gradually builds up a track record for quality We investigate different entry strategies and regulatory policies and discuss entrants incentives to invest in network depending on regulatory choices **The Telecoms Trade War** Mark Naftel, Lawrence J Spiwak, 2001-01-15 If one were to believe the politicians and pundits in the trade press the world is in midst of a telecoms revolution resulting from the deregulation and new competitive opportunities represented by the 1997 World Trade Organisation Agreement on Basic Telecommunications Services This may be true Unfortunately however the actions of many regulators and industry participants more accurately reveal not a telecoms revolution but instead a growing telecoms trade war that is dangerously close to spiralling out of hand In this book Naftel and Spiwak review U S and European competition and regulatory initiatives post WTO and provide both a useful roadmap to today's U S EU and WTO telecoms regulation and an examination of various case studies to illustrate their points In so doing the authors discover unfortunately the sad reality that despite the political rhetoric regulators on both sides of the Atlantic have eschewed innovative and indeed productive solutions to create a market structure conducive to long term competitive rivalry Instead the authors demonstrate that current policies reveal a growing cynicism towards the maximisation of consumer welfare that will be difficult if not outright impossible to remove *Regulatory Reform in the Netherlands* Organisation for Economic Co-operation and Development, The Dutch experience in regulatory reform has vital lessons about the modernisation of the European welfare state and its integration into the European single market Regulatory reform is the most recent element in

the reshaping of the Dutch model Following reforms to labour markets and the social welfare system in the 1980s Dutch governments in the 1990s have sought a new balance between protection and dynamism based on competition policy regulatory reform and market openness Today the Netherlands ranks among the top OECD countries by many measures of economic performance including employment growth Though still in its early phases regulatory reform has already produced major gains for the Netherlands in terms of competitiveness flexibility and consumer benefits Yet major challenges are still to be faced Some important reforms have been slow indicating that the balance between domestic consensus building and policy responsiveness is still being adjusted in the modern Dutch model Further reforms in many areas will bring important gains in boosting the employment rate improving sectoral performance and providing social protection at lower cost The Netherlands is one of the first OECD countries to request a broad review by the OECD of its national regulatory practices and domestic regulatory reforms This report the result of intensive assessment by the OECD and review by its Member countries is unique in that it presents an integrated assessment of regulatory reform in framework areas such as the macroeconomic context the quality of the public sector competition policy and enforcement and integration of market openness principles in regulatory processes and in sectors such as electricity and telecommunications The policy recommendations present a balanced plan of action for both short and longer term based on best international regulatory practices
