Regulation Deregulation Casebook 2nd:

Reinsurance Regulation: A Contemporary and Comparative Study Wallace Wang, 2003-01-01 We seem to be living at a time when insurance is strained to the breaking point From hurricanes and earthquakes to terrorist attacks and threats of nuclear devastation enormous risks to life and property and accompanying liabilities proliferate on an unprecedented scale Insurer insolvency is not yet common but it is not unusual either And at the root of such failures often lies the compound failure of uncollectable reinsurance This important book proposes that a significant part of the emerging insurance crisis results from inadequate regulation of reinsurance In a detailed and cogent analysis of what an effective regulatory regime for reinsurance must entail the author examines such factors as the following direct supervision of reinsurers versus supervision of reinsurance policies models from developed countries US UK EU and international organisations Organization for Economic Cooperation and Development International Association of Insurance Supervisors the importance of taking legal and economic differences into account while applying models the problem of local protectionism especially in developing countries the dismantling of trade barriers in the reinsurance industry global harmonization of reinsurance regulation the role of reinsurance intermediaries finite risk reinsurance insurance linked securities The author's concluding chapter presents an essential legal infrastructure that allows for efficiency security and individual market characteristics Professor Wang then applies this framework to the Taiwanese insurance market demonstrating convincingly how his proposed regime can solve specific problems while respecting Taiwan's distinct market environment As a meticulously considered appraisal of and solution to a world problem that is growing quickly and uncontrollably *Reinsurance Regulation* will be of immense value to lawyers professors academics and officials who deal with any facet of economic law

A Casebook on Labour Law Ewan McGaughey, 2018-11-29 A Casebook on Labour Law supports every university labour or employment law course in the UK set within European Union and international law It covers history and theory contract and rights participation equality and job security It also has chapters on essential topics for modern labour policy the right to vote for company boards in work councils and pension funds and laws to achieve full employment by ending underpaid underemployment Each chapter

summarises further reading from noteworthy books and journals and follows a unified conceptual structure This aims to transcend historic divisions between common law or statute private or public and national or international law The book invites the reader to engage in the economic and social evidence about labour law s empirical consequences and political principles *Subject Guide to Books in Print* ,2001 Political Economy of Modern Capitalism Colin Crouch,Wolfgang Streeck,1997-12-22 In the wake of Maastricht neo liberalism and de regulation have come to dominate national and international political economy Political Economy of Modern Capitalism addresses this convergence and provides a comprehensive overview for the future of capitalist diversity **Land Use Regulation** Daniel P. Selmi,James A. Kushner,Edward H. Ziegler,2008 This dynamic casebook focuses on the role of the lawyer in land use regulatory matters and the factors that influence land development decisions It emphasizes the current practice of land use law and cutting edge urban planning and sustainable **Bowker's Law Books and Serials in Print** ,1998 *NASA SP-7500* United States. National Aeronautics and Space Administration, Australian National Bibliography: 1992 National Library of Australia,1988 **European Access** ,2000 *Emissions Trading Schemes* Sanja Bogojevic,2013-07-04 Over the last four decades emissions trading has enjoyed a high profile in environmental law scholarship and in environmental law and policy Much of the discussion is promotional preferring emissions trading above other regulatory strategies without however engaging with legal complexities embedded in conceptualising scrutinising and managing emissions trading regimes The combined effect of these debates is to create a perception that emissions trading is a straightforward regulatory strategy imposable across various jurisdictions and environmental settings This book shows that this view is problematic for at least two reasons First emissions trading responds to distinct environmental and non environmental goals including creating profit centres substituting bureaucratic control of resources and ensuring regulatory compliance This is important as the particular purpose entrusted to a given emissions trading regime has as its corollary a particular governance structure according to which the regime may be constructed and managed and which trusts the emissions market the state and rights in emissions allowances with distinct roles Second the governance structures of emissions trading regimes are culture specific which is a significant reminder of the importance of law in understanding not only how emissions trading schemes function but also what meaning is given to them as regulatory strategies This is shown by deconstructing emissions trading discourses that is by inquiring into the assumptions about emissions trading as featuring in emissions trading scholarship and in debates involving law and policymakers and the judiciary at the EU level Ultimately this book makes a strong argument for reconfiguring the common understanding of emissions trading schemes as regulatory strategies and sets out a framework for analysis to sustain that reconfiguration Law and Policy of Substantial Ownership and Effective Control of Airlines Isabelle Lelieur,2017-03-02 The principle of airline substantial ownership and effective control is one of the biggest impediments to the air transport industry growth Legitimately included in the bilateral agreements since 1946 for national security reasons

States have maintained the principle over the years and used it as a protectionist tool as well as a bargaining chip Today considering that liberalization and globalization concepts are already well established in the biggest industrial sectors and a large number of cross border investments occurs in most of the service sectors through mergers and acquisitions the time is ripe to remove national restrictions on foreign investments from the airline industry This comprehensive book identifies those factors that still justify the imposition of national ownership restrictions on airlines and examines the prospects for change in the current policies and regulatory regimes that support them The readership includes specialists in government departments of transportation civil aviation authorities and agencies international organizations airline executives concerned with general management economic legal and public affairs aviation lawyers airline pilot associations law schools concerned with international aviation law *Current Publications in Legal and Related Fields* ,2004 **The Latin American**

Casebook Juan F. Gonzalez-Bertomeu,Roberto Gargarella,2016-04-20 Traditionally relegated because of political pressure and public expectations courts in Latin America are increasingly asserting a stronger role in public and political discussions This casebook takes account of this phenomenon by offering a rigorous and up to date discussion of constitutional adjudication in Latin America in recent decades Bringing to the forefront the development of constitutional law by Latin American courts in various subject matters the volume aims to highlight a host of creative arguments and solutions that judges in the region have offered The authors review and discuss innovative case law in light of the countries social political and legal context Each chapter is devoted to a discussion of a particular area of judicial review from freedom of expression to social and economic rights from the internalization of human rights law to judicial checks on the economy from gender and reproductive rights to transitional justice The book thus provides a very useful tool to scholars students and litigants alike

Global Business, Local Law Amanda Perry-Kessaris,2016-04-22 This volume establishes a theoretical framework for exploring the role of host state legal systems courts and bureaucracies in mediating relations between foreign investment civil society and government actors It then demonstrates the application of that framework in the context of the south Indian city of Bengaluru formerly Bangalore Drawing on the law and community approach of Roger Cotterrell the volume identifies three mechanisms through which law might in theory ensure that social relations are productive by expressing any mutual trust which may hold actors together by ensuring that actors participate fully in social life and by coordinating the differences that hold actors apart Empirical data reveals that each of these legal mechanisms is at work in Bengaluru However their operation is limited and skewed by the extent to which actors use abuse and or avoid them Furthermore these legal mechanisms are being eroded as a direct result of the World Bank s investment climate discourse which privileges the interests and values of foreign investors over those of other actors **The AALS Directory of Law Teachers** ,1999
