*Green Public Procurement under WTO Law* Rika Koch, 2020-08-31 This book investigates the strategic use of public procurement as a way to establish buying green as a common practice not only in the EU but all over the world However imposing environmental requirements may affect the conditions of competition between suppliers especially between local and foreign ones This is particularly relevant for signatory states to the Government Procurement Agreement GPA a plurilateral WTO agreement that aims at liberalizing public procurement markets So how can these countries strike a balance between trade concerns and

**Procurement Regulation in Africa** Sue Arrowsmith,Geo Quinot,2013-01-17 This book examines the regulatory rules on public procurement in selected African countries and provides a comparative analysis of key regulatory issues *Fighting Corruption in Public Procurement* Sope Williams-Elegbe,2012-11-06 Anti corruption measures have firmly taken centre stage in the development agenda of international organisations as well as in developed and developing countries One area in which corruption manifests itself is in public procurement and as a result States have adopted various measures to prevent and curb corruption in public procurement One such mechanism for dealing with procurement corruption is to debar or disqualify corrupt suppliers from bidding for or otherwise obtaining government contracts This book examines the issues and challenges raised by the debarment or disqualification of corrupt suppliers from public contracts Implementing a

disqualification mechanism in public procurement raises serious practical and conceptual difficulties which are not always considered by legislative provisions on disqualification. Some of the problems that may arise from the use of disqualifications include determining whether a conviction for corruption ought to be a pre requisite to disqualification bearing in mind that corruption thrives in secret resulting in a dearth of convictions. Another issue is determining how to balance the tension between granting adequate procedural safeguards to a supplier in disqualification proceedings and not delaying the procurement process. A further issue is determining the scope of the disqualification in the sense of determining whether it applies to firms, natural persons, subcontractors, subsidiaries or other persons related to the corrupt firm and whether disqualification will lead to the termination of existing contracts. The book compares and contrasts the legal, practical and institutional approaches to the implementation of the disqualification mechanism in the European Union, the United Kingdom, the United States, the Republic of South Africa and the World Bank.

### **Public Procurement and the EU Competition**

**Rules** Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law. Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. In this process of convergence between competition and public procurement law, the need for this joint study is clearly apparent. As such, the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant. The book moves away from the classical focus of public procurement on the activities of private actors, developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective. The analysis is both legal and economic. Proceeding through a careful assessment of the general rules of competition and public procurement, the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement.

**Public Procurement and Multilateral Development Banks** Sope Williams-Elegbe, 2017-03-23 The multilateral development banks cumulatively channel billions of dollars annually in development assistance to borrower countries. This finance is usually spent through processes that incorporate the public procurement regulations of the banks and it is often a condition of this finance that the funds must be spent using the procurement regulations of the lender institution. This book examines the issues and challenges raised by procurement regulation in the multilateral development banks. The book examines the history of procurement regulation in the banks, the tripartite relationship created between the banks, borrowers and contractors in funded procurements, the procurement documents and procurement cycle as well as how the banks ensure competition and value for money in funded procurements. The book also examines the banks' approach to sustainability.

concerns in public procurement such as environmental social or industrial concerns as well as how the banks address the issue of corruption and fraud in funded contracts Another issue that is addressed by this book is how the banks have implemented the aid effectiveness agenda It will be seen that the development banks have undertaken steps to harmonise their policies and practices increased borrower procurement capacity taken steps to reduce the tying of aid and play an important role in the reform of borrower procurement systems all in an effort to improve the effectiveness of development finance The book also considers the contractual and other remedies that are available to parties that may be aggrieved as a result of a funded procurement The book analyses compares and contrasts the legal practical and institutional approaches to procurement regulation in the World Bank the Inter American Development Bank the African Development Bank the Asian Development Bank and the European Bank for Reconstruction and Development

*An Architect's Guide to Public Procurement* Fin Garvey, 2019-07-25 There is suspicion in the UK and across Europe that the upcoming introduction of new European Directives will encourage a regime of conservatism and legal risk aversion fostering the delivery of mediocre and banal building design This book dispels these myths and instead looks at the genuine impact of EU law on architectural practice Engaging in public sector work requires a broad understanding of this seemingly complex and constantly evolving subject and unlike other texts the book is designed to explore public procurement from the perspective of the architect An easy to follow guide through the complex legal and technical jargon involved in the procurement process the book provides practical tools which will assist architects in developing their own clear procurement strategy Although written with a UK audience in mind the advice will also be applicable to other European jurisdictions It is invaluable reading for existing practitioners wishing to expand their current involvement in the public procurement process as well as those encountering it for the first time

*Reformation or Deformation of the EU Public Procurement Rules* Grith Skovgaard Ølykke, Albert Sanchez-Graells, 2016-11-25 Using an innovative law and political science methodology this timely book carries out a critical assessment of the reform of the EU public procurement rules It provides a rich account of the policy directions and the spaces for national regulatory decisions in the transposition of the 2014 Public Procurement Package as well as areas of uncertainty and indications on how to interpret the rules in order to make them operational in practice Most EU law research focuses on the content of rules and the impact of case law on their interpretation and application It rarely discusses how the CJEU's case law influences the creation of new rules or the way EU law makers enact them issues which conversely are a staple for political scientists By blending both approaches this book finds that political science provides a useful framework to describe the law making process and shows that the influence of the CJEU was significant Though the specific case studies identify many reforms the ultimate assessment is that EU public procurement law was deformed Offering a clear contribution to the emerging scholarship on flexible EU law making this book's novel methodology will appeal to scholars and students of both law and political science Law and policy makers as well as legal practitioners will also find its practical approach
