

Public interest theory

- Regulation put in place to benefit society as a whole rather than vested interests
- Regulatory body considered to represent interests of the society in which it operates, rather than private interests of the regulators
- Assumes that government is a neutral arbiter

Regulation Values And The Public Interest:

The Cambridge Handbook of Health Research Regulation Graeme Laurie,Edward Dove,Agomoni Ganguli-Mitra,Catriona McMillan,Emily Postan,Nayha Sethi,Annie Sorbie,2021-06-09 The definitive reference guide to designing scientifically sound and ethically robust medical research considering legal ethical and practical issues **Code of Federal Regulations** ,2009 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries **The Code of Federal Regulations of the United States of America** ,1986 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government The Oxford Handbook of Regulation Robert Baldwin,Martin Cave,Martin Lodge,2010-09-09 This Handbook provides a clear and authoritative discussion of the major trends and issues in regulation over the last thirty years together with an outline of prospective developments It brings together contributions from leading scholars from a range of disciplines and countries **Federal Register** ,2012-05 **Rome Convention - Rome I Regulation** Alexander J. Belohlávek,2011-01-01 As of 17 December 2010 the Rome I Regulation EU Regulation 593/2008 on the law applicable to contractual obligations is directly applicable in all EU Member States with the exception of Denmark The Rome I Regulation replaces the Rome Convention of 1980 in the EU Member States and will apply to all contracts concluded as of 17 December 2010 However and herein lies the utility and great importance of this work the Rome Convention and the Rome I Regulation will be applied in parallel for a significant time to come the author himself anticipates a ten to fifteen year period in the latter case to contracts made after 17 December 2010 This is why this commentary takes into account both sources of law in their mutual interaction and broader context The comprehensiveness of the Rome Convention Rome I Regulation is clearly apparent but one of the great achievements of the author is his amassing of over 1 800 judicial decisions most of which are furnished with a detailed commentary where these decisions apply national laws the latter are cited both in the original and in translation For a number of rulings the commentary include not only a case summary of the facts and an analysis of the conclusions drawn by the court but also takes them as models to hypothesize what conclusions would be reached if the Rome I Regulation were to be applied **Amendments to the Communications Act of 1934** United States. Universal Service in WTO and EU law Olga Batura,2015-10-07 This book is a systematic comparative study of WTO and EU law relevant for universal service provision and a timely contribution to the ongoing scholarly and policy debates about the concept and scope of universal service Universal service is one of the most significant regulatory issues worldwide and it is likely to remain so The central question dealt with by the author is how the technologically intensive sector of telecommunications services can be regulated in a socially fair way in the light of liberalisation and the immense importance

of ICTs in the Information Society The author investigates whether the legal frameworks of WTO and EU can meet the challenges of the rapid and dramatic technological and social change and formulates relevant policy recommendations The book is of interest to both scholars and practitioners in several disciplines such as EU and WTO law telecommunications law and regulation political science regarding market regulation and governance as well as European integration and WTO Olga Batura is affiliated to the Leuphana Law School University of Lüneburg Germany and to the European Humanities University in Vilnius Lithuania *The Political Economy of the Company* John Parkinson,Gavin Kelly,Andrew Gamble,2001-03-30 Theoretical writing on the company and company law has been dominated in recent years by economics This collection of essays by a distinguished team of authors drawn from a variety of disciplines seeks to build on the insights of this economic analysis and broaden understanding by examining the company in a wider historical legal political and sociological context Issues discussed include the attitudes of political parties in the UK to the company the rise of the non executive director institutional activism and stakeholder protection and the evolution of the nexus of contracts theory of the company There is also a strong comparative theme with discussions of the political and sociological context of corporate governance in France Germany and Japan together with developments at the European level *Regulating Tobacco, Alcohol and Unhealthy Foods* Tania Voon,Andrew Mitchell,Jonathan Liberman,2014-07-25 The need to reduce disability and premature deaths from non communicable diseases NCDs is increasingly engaging international organisations and national and sub national governments In this book experts from a range of backgrounds provide insights into the legal implications of regulating tobacco alcohol and unhealthy foods all of which are risk factors for NCDs As individual countries and the international community move to increase targeting of these risk factors affected industries are turning to national and international law to challenge the resulting regulations This book explores how the effective regulation of tobacco alcohol and unhealthy foods can be achieved within the context of international health law international trade and investment law international human rights law international intellectual property law and domestic laws on constitutional and other matters Its contributors consider the various tensions that arise in regulating NCD risk factors as well as offering an original analysis of the relationship between evidence and health regulation Covering a range of geographical areas including the Americas the European Union Africa and Oceania the book offers lessons for health and policy practitioners and scholars in navigating the complex legal fields in which the regulation of tobacco alcohol and unhealthy foods takes place Climate Change and Political Strategy Hugh Compston,2013-09-13 Although the science of climate change is well established and there are well known policy instruments that could significantly reduce greenhouse gas GHG emissions without prohibitive economic costs political obstacles to more determined action remain despite heightened concern among mainstream politicians and the public This book analyses the political dynamics of climate policy in affluent democracies from a number of different theoretical angles in order to improve our understanding of which political strategies would be likely to enable national

governments to make deep cuts in GHG emissions while avoiding significant political damage The authors argue that different conceptual and logical theories highlight different features of political situations Describing the politics of climate policy in this way will result in different conceptual logical views of this phenomenon And to some extent the inferences drawn from such differing views about the nature of political obstacles to more vigorous action on climate change and the best ways of overcoming them will also be different Singly and together these analyses reveal a more detailed nuanced view of the political options open to activist governments This book was previously published as a special issue of *Environmental Politics* *Innovative Infrastructure Financing through Value Capture in Indonesia* Asian Development Bank, 2021-05-01

Indonesia needs significant additional infrastructure investment to sustain its economic growth However the COVID 19 pandemic has further limited the fiscal space of the government This report proposes a new method to increase infrastructure investment based on the concept of value capture The report studies how Indonesia s existing policies and regulations can be used to build a value capture framework that ensures the maximization of the social economic and environmental value of infrastructure investments The framework focuses on strategies to deliver infrastructure projects that create greater value and at the same time generate funding for up front investment **Special and Local Laws Affecting Public Interests in the City of New York** New York (N.Y.), 1880 **EU Global Value Chain Regulation** Josephine Norris, 2025-08-07 This practical guide enables practitioners compliance professionals and anyone with an interest in the international dimension of supply chains to navigate the EU s approach to regulating global value chains Global Value Chains a central feature of international trade and the world economy present unique regulatory challenges and opportunities Taking examples of recently adopted EU legal instruments the book examines how the EU is applying environmental and labour standards along supply chains connected to its internal market Covering due diligence requirements new rules tackling deforestation and the EU s landmark carbon border adjustment mechanism CBAM it explores the synergies between these different regulatory tools and draws comparisons with approaches to global value chain regulation in other jurisdictions The emergence of this rapidly expanding regulatory framework is not without controversy Written by a legal practitioner working for the European Commission the book situates the EU s approach to global value chain regulation in the framework of broader discussions on the complex interface between international trade law international environmental law and the UN sustainable development goals Structured as a contextualised accessible guide the book decodes the emerging EU regulatory landscape and offers a perspective on future developments in this legal field **Regulations Pursuant to Geological and Geophysical Explorations of the Outer Continental Shelf** Geological Survey (U.S.), 1976 **Code of Federal Regulations, Title 18, Conservation of Power and Water Resources**, 2011-06-06 **Sports Law and Policy in the European Union** Richard Parrish, 2003-11-08 Investigates the birth of EU sports law and policy by examining the impact of the Bosman ruling and other European Court of Justice decisions the relationship between sport and

EU competition law the organization of sport and the relationship between sport and the EU Treaty **Private Sector-Led Urban Development Projects** Erwin Heurkens, 2012-09-04 Central to Private Sector led Urban Development Projects lays the concept of private sector led urban development projects Such projects involve project developers taking a leading role and local authorities adopting a facilitating role in managing the development of an urban area based on a clear public private role division Such a development strategy is quite common in Anglo Saxon urban development practices but is less known in Continental European practices Nonetheless since the beginning of the millennium such a development strategy also occurred in the Netherlands in the form of concessions However remarkably little empirical knowledge is available about how public and private actors collaborate on and manage private sector led urban development projects Moreover it remains unclear what the effects of such projects are This dissertation provides an understanding of the various characteristics of private sector led urban development projects by conducting empirical case study research in the institutional contexts of the Netherlands and the UK The book provides an answer to the following question What can we learn from private sector led urban development projects in the Netherlands and UK in terms of the collaborative and managerial roles of public and private actors and the effects of their inter actions **Value in a Changing Built Environment** David Lorenz, Peter Dent, Tom Kauko, 2017-11-08 A new framework for understanding the underpinnings of real estate property value and the role it plays in the larger economy Value in a Changing Built Environment examines the professional foundations on which the valuation exercise and the valuation profession rest Written by noted experts in the field the book addresses the often limited understanding of the concept of property value by explaining the intrinsic linkages between economic environmental social and cultural measures and components of property value The book offers a framework that paves the way towards a more holistic approach to property value Value in a Changing Built Environment unwraps many of the traditional assumptions that have underpinned market participants decision making over the last few decades The authors explore the concept that a blindfold application of valuation theories and approaches adopted from finance is unlikely to be able to cope with the nature of property as an economic and public good This vital resource Explains the criteria for making estimates of value that can be applied worldwide Offers an integrated approach to property value and the valuation processes Captures the often illusive intangibles such as environmental performance into valuation Addresses a market failure to account for wider criteria on building performance Value in a Changing Built Environment examines how real estate valuation plays a pivotal role in decision making and how can a new body of knowledge improve the practice in both business and social domains
