Regulatory Impediments To The Private Industrial Sector Development In Asia:

The Regulatory Impediments to the Private Industrial Sector Development in Asia Deena R. Khatkhate, 1992

Private Sector Development in Low-income Countries, 1995 Annotation Assesses the progress of private sector development in low income countries particularly in Sub Saharan Africa from 1987 to the present The book identifies causes of uneven performance and outlines the main elements of a strategy led by the private sector for accelerated and shared growth to reduce poverty Also available in French ISBN 0 8213 3550 2 Stock No 13550 *Problems and Prospects of Entrepreneurial Development in Small Scale Industry With Special Reference to Chikan Handicraft Industries of Lucknow* Dr. Rasheedul Haque, 2024-02-08 Every human endeavour every achievement every success and every worthwhile effort is based on the invaluable and indispensable support of many individuals known and unknown The credit of the endeavour by and large may go to a single individual but it is implied that it would not have been possible without the various kinds of support provided by others Similarly for this research work I am indebted to many people and with all the humility I accept that words fail me to express gratitude for all their help To acknowledge their invaluable contribution is a humble effort in the direction of expressing the feeling that this research work owes a lot to them and I feel honoured privileged and fortunate for the support

Development of Rural Financial Markets to Sub-Saharan Africa Sabapathy Thillairajah, 1994 World Bank Environment Paper 6 Here is a holistic approach to analyzing the environmental impact of various power systems Unlike standard impact studies that begin at the project level this method calls for environmental assessments that start at the planning stage of a national framework for energy policymaking The framework would take into account the energy needs of Sri Lanka s total economy It also would make it easier to incorporate environmental goals into power sector decisionmaking at the critical investment stage Sri Lanka s development options for the power sector are reviewed in detail Topics include alternative ways to assess the economic value of a power plant s impact on biodiversity human health and air and water pollution The study also assesses which energy planning options work best and recommends ways in which the Ceylon Electricity Board can improve its environmental policies *Korean Industrial Policy* Danny M. Leipziger, Peter A. Petri, 1993 The World Bank is changing the way it does business in the energy sector This Policy Paper is one of two that outlines the Bank s new policies for the sector The review was prompted by concern about the effects of power generation on the environment and on populations that may be resettled to make way for projects Another stimulus was the macroeconomic reality of fewer investment resources in many countries And many developing countries are becoming more receptive to reforming the way energy is produced and consumed This paper credits the public monopoly approach of the last 30 years with facilitating expansion of power supplies capturing technical economies of scale and making effective use of scarce managerial and technical skills Nonetheless it recommends several new policies to improve the performance of the electric power sector in developing countries These reforms will guide future Bank activities in the sector Bank loans for

electric power will go first to countries clearly committed to improving the performance of their power sectors The Bank will also discourage subsidies on energy prices and will encourage private investment in utilities And it will provide financing to help the least developed countries import power where local generation is not practical The efficiency of production and use of electric power in developing countries is examined in a companion paper Energy Efficiency and Conservation in the Developing World The World Bank's Role The World Bank's Role in the Electric Power Sector is also available in Spanish La función del Banco Mundial en el sector de la electricidad Políticas para efectuar una reforma institucional regulatoria y financiera eficaz ISBN 0 8213 2451 9 Stock No 12451 7 95 Price code 007 Spanis

Borrower Ownership of Adjustment Programs and the Political Economy of Reform John H. Johnson, Sulaiman S. Wasty, 1993-01-01 China has done much to reform its price system achieve macroeconomic stability and restore growth Nevertheless price distortions remain in three key areas This study suggests further price reforms for the energy grain and transport sectors It explains why energy price adjustments should have only a modest effect on consumer prices but a highly positive effect on the economy It discusses why China may have to reduce consumer subsidies to achieve the necessary reforms for grain prices The study describes what the government must do to strengthen commodity markets generate competition and make allowances for seasonal price variations China's transport sector has been a critical development bottleneck The paper reviews tariff adjustments and other reforms that would modernize the transport system and help it meet growing demand These reforms also would encourage energy conservation and help integrate the national economy

The Maritime Transport Crisis Hans Jürgen Peters, 1993-01-01 Effective planning and management of urban infrastructure is essential to improving the standard of living in rapidly developing urban areas Deterioration or cessation of services can create health risks limit economic productivity damage public and private property and lead to congestion in transport and communications But effective infrastructure services are impossible without adequate records and maps of municipal facilities particularly those underground The authors review recent developments in the recording and mapping of urban infrastructure The paper identifies the institutional organizational and technological issues involved and explores some strategic options for addressing these pressing issues The options discussed include how best to determine the proper institutional structure develop human resources and make the best use of technology The

authors perceive an urgent need for development of legal frameworks to make recordkeeping more comprehensive and compatible among various utilities localities and governmental bodies They advise that immediate attention be given to a particular organizational issue in many utilities no one department is responsible for collecting and processing data and even when such responsibility is designated the methods to be used are unclear or the resources are inadequate The paper offers case studies and concludes that improvements in utility mapping and recordkeeping are cost effective enhance the efficiency of the utility and improve the overall quality of urban life

FDI in China Yasheng Huang,1998 China is the largest recipient of foreign direct investment FDI among developing countries This study compares China's FDI performance with a number of other Asian countries and focuses on the policy and institutional factors that lead to a large demand for FDI in China The policy and institutional factors include import substitution excess investment demand and features of China's FDI regulatory system The study shows that there are costs associated with such a high demand for FDI including overbidding for FDI and the associated loss of Chinese bargaining power large import demand and the structure of the FDI at variance with Chinese official policies This study also briefly discusses the foreign economic policy implications of China's FDI absorption and suggests some future research possibilities

Raising the Productivity of Women Farmers in Sub-Saharan Africa Katrine Anderson Saito,Hailu Mekonnen,Daphne Spurling,1994 World Bank Discussion Paper 230 Based on four country studies and extensive household surveys this paper documents the breakdown of traditional farming systems in Sub Saharan Africa and its implications for the role of women in agriculture

The Contributions of Infrastructure to Economic Development Christine Kessides,1993-01-01 This paper reviews the linkages between infrastructure and economic development based on both formal empirical research and informal case studies The main thesis is that economic benefits result from investments in infrastructure only to the extent that they generate a sustainable flow of services valued by consumers Thus an analysis of infrastructures contributions to growth must look at the impacts of services as actually perceived not at indirect indicators that measure only aggregate provision of infrastructure capital The paper notes that macro and industry level research although having its limitations suggest a positive and statistically significant relationship between infrastructure and economic output However the conclusions derived from this research most of which derives from developed countries provide little specific guidance for policy To gain more practical insights about how infrastructure contributes to economic growth and to improved quality of life and to understand the welfare costs of inadequate or unreliable infrastructure it is necessary to look at microeconomic evidence Particularly interesting illustrations of these relationships are to be found in developing countries where there is wide variance in the availability and quality of infrastructure

Developing Effective Employment Services David Fretwell,Susan Goldberg,1993-01-01 Employment services promote the efficient allocation of labor by among other things promoting labor mobility and improving productivity This paper assesses the cost effectiveness of services designed to expedite the exchange of labor between job seekers and

employers The authors find that the benefits of employment services are not uniform Benefits may be reduced in small countries with a large informal sector or when the economy is stagnant and the demand for labor is depressed even though the need for the services may be greater under such conditions The authors advocate a balance between public and private sector delivery of employment services They favor opening the private market for what they term support services which increase productivity and include income support and retraining Such support services are distinct from what the authors call core services provision of which they believe is properly left to the public sector Core services to assist job seekers include job placement services relocation assistance counseling and skills assessment The authors find that core services are cost effective and that public sector providers can ensure that such services are delivered to unemployed low skilled or semiskilled workers whose needs may not be met by the private sector The paper reviews the justification for and development of employment services over time and compares various approaches to the provision of such services It reviews the various types of employment services and examines the differences between public and private sector delivery

Population Growth, Shifting Cultivation, and Unsustainable Agricultural Development Andrew Keck,Narendra P. Sharma,Gershon Feder,1994-01-01 World Bank Discussion Paper 234 This study of a microregion of Madagascar illustrates the important relationships between population growth unsustainable agriculture and natural resource decline It shows how agricultural development has been ha *The Reform of Public Expenditures for Agriculture* Bonni J. Van Blarcom,Odin Knudsen,John Nash,1993-01-01 Evolving Legal Frameworks for Private Sector Development in Central and Eastern Europe Cheryl Williamson Gray,1993 From Macroeconomic Correction to Public Sector Reform Eduardo Wiesner Durán,1993-01-01 This paper explains why tough public sector reform and a sound macroeconomy are essential to sustained growth It provides a strategy to help countries evaluate how well their governments policies work Decisionmakers will learn ways to build an evaluations program that can make governments more accountable and improve their performance Some options could include making central banks independent eliminating earmarked funds and balancing the national budget The author suggests which government offices should oversee and develop evaluation policies to get the best results and explains why evaluation results must be linked with all budget decisions He describes the political and economic environment that allows the evaluation process to develop freely Also discussed is the role that the World Bank and other institutions should play in supporting evaluation programs The study examines how sound evaluation can lead to more consistent international policies and better international governance *Information Technology in World Bank Lending* Nagy Hanna,Sandor Boyson,1993-01-01 This study describes a strategy to reduce poverty by boosting labor productivity and economic growth It focuses on Uganda s two key sectors agriculture and industry The strategy seeks to make Uganda a self sufficient food producer and a major crop exporter It also advocates policies that would make the nation less dependent on imports and better at marketing its own products Some suggestions include ways to improve labor markets raise agricultural output and

broaden the tax base Other recommendations discuss ways to develop the financial sector and spur savings and investment Also examined are the government's economic adjustment policies and their effects on the poor Analysts point out the different ways that poverty affects men and women The study also discusses how to increase public funds for social services that would improve the labor force It recommends policies that will help women become full partners in Uganda's development Tables and other illustrations throughout the text provide detailed statistics on Uganda's economic status Topics include crop yields poverty indicators gross domestic product and public sector expenses

Proceedings of a Conference on Currency Substitution and Currency Boards Nissan Liviatan, 1993-01-01 Eighteen well known policymakers and economists discuss the rising use of currency substitution in Latin America They examine the effects of currency boards on substitute currencies and on national stabilization programs Latin American countries including Argentina Bolivia Peru and Uruguay increasingly use dollars as a substitute for domestic currency The experts debate whether the region should encourage or resist this trend Topics include the effects of substitution on inflation liquidity and exchange rates The discussions on Argentina Peru and Brazil focus on the ways in which currency boards have affected stabilization in these countries They consider whether such boards can strengthen fiscal discipline and speed economic adjustment A currency board issues money that is converted into a foreign reserve currency at a fixed exchange rate This independent institution takes over the central bank's role as the sole issuer of base money It also manages the exchange rate to keep the currency stable and convertible
