Austerity is forcing millions into poverty and many more into precarious work while the left remains trapped in stagnant
political practices that offer no respite Inventing the Future is a bold new manifesto for life after capitalism Against the
confused understanding of our high tech world by both the right and the left this book claims that the emancipatory and
future oriented possibilities of our society can be reclaimed Instead of running from a complex future Nick Srnicek and Alex
Williams demand a postcapitalist economy capable of advancing standards liberating humanity from work and developing
technologies that expand our freedoms This new edition includes a new chapter where they respond to their various critics
