,1997 Identifies some of the challenges that lie ahead in managing transportation s long term environmental effects and the kinds of research and preparations that are needed to inform policy and meet these challenges Although the report does not recommend specific policies to pursue it identifies some of the issues and uncertainties that will need to be addressed in evaluating them *Cato Handbook for Congress* Cato Institute,1999 The 50 plus chapters in this volume contain hundreds of recommendations to radically reduce the size and scope of the federal government and return it to the limits envisioned by the Founding Fathers

Glycosyl Hydrolases for Biomass Conversion Michael E. Himmel,2001 This book provides an up to date review of hydrolase structure and function relationships and the means by which these important enzymes can be better utilized There is a focus on understanding cellulase and hemicellulase action a strategy based in macromolecular modeling site directed mutagenesis active site mapping heterologous expression and classical kinetic characterization Discussions of new information about cellulase enzymes and systems highlight recent accomplishments and trends in the field of glycosyl hydrolase biochemistry such as several new crystallographic structures of important cellulase and methods for improving activity by protein engineers **Sustainable Regional Development** Michael P. Clair,2023-08-16 Many communities and regions are being left behind in the new economic order The book starts with the premise that in today s knowledge based economy innovation is key but that only seems to happen in larger urban centres It seems that smaller centres and peripheral regions can only look forward to decline and eventual irrelevance but this need not be the case Wherever there are people

there is the potential to innovate This book demonstrates that innovators are not limited to inventors and entrepreneurs Each innovation starts with an idea that is nurtured by its creator and incubated by the larger community The book identifies different categories of creators such that many readers will recognize themselves as being in fact creators And it identifies different ways of coming up with ideas which may validate how creators spend their time It identifies ways to judge whether ideas should be pursued or not and looks at the steps required to turn an idea into an innovation Many declining communities and regions around the world have resuscitated themselves by being creative and innovative sometimes in startling ways This book will provide some ideas to help any region reinvent itself But having a few individuals with good ideas is not sufficient to revive a region This book also shows how effective leaders are needed to help stimulate more creative activity and just as importantly to coordinate the necessary resources to turn creative ideas into innovations The book will appeal to students scholars and researchers of economic regional social and sustainable development innovation public policy and economic geography as well as practitioners and policymakers concerned with regional development and regional innovation policies

Petroleum and the Environment William E. Harrison, Stephen M. Testa, 2003 *Fuels and Chemicals from Biomass* Badal C. Saha, 1997 Written for a wide variety of biotechnologists this book provides a major review of the state of the art in bioethanol production technologies enzymatic biomass conversion and biodiesel It also provides a detailed explanation of a breakthrough in photosynthetic water splitting which could result in a doubling of the efficiency of solar energy conversion by green plants The book covers production of lactic acid succinic acid 1 3 propanediol 2 3 butanediol and polyhydroxybutyrate and xylitol It also includes a chapter on synthesis gas fermentation
