Reinventing Nasa Human Spaceflight Bureaucracy And Politics:

Reinventing NASA Roger Handberg, 2003-12-30 From its beginnings NASA was convinced that its real mission was to create the opportunity for a much different and better society on Earth namely through human space flight Pursuit of such a goal has led the agency to persist in certain activities even when they conflict with the wishes of Congress and the President Recent changes in the international environment changes that began well before September 11 2001 have brought the military back into the field of human space flight a situation that holds certain hazards for NASA since the military is more powerful politically Dramatic changes could be in store changes that could severely damage NASA s capacity for continuing what it sees as its primary objective While most analyses see the agency as riddled with incompetence Handberg argues that NASA s troubles are a product of its internal values He begins with an historical overview of the major themes in NASA s history followed by chapters on specific areas of concentration such as the space station space transportation space science and internal reforms He also discusses the long term future of the agency and human space flight in general both domestically and internationally

Space Law Francis Lyall, Paul B. Larsen, 2017-12-14 Francis Lyall and Paul B Larsen have been involved in teaching and researching space law for over 50 years This new edition of their well received text gathers together their knowledge and experience in readable form and covers developments in all space applications including space tourism telecommunications the ITU and finance With an extensive citation of the literature the discussion provides an excellent source for both students and practitioners

Organizational Learning at NASA Julianne G. Mahler, 2009-03-27 Just after 9 00 a m on February 1 2003 the space shuttle Columbia broke apart and was lost over Texas This tragic event led as the Challenger accident had 17 years earlier to an intensive government investigation of the technological and organizational causes of the accident The investigation found chilling similarities between the two accidents leading the Columbia Accident Investigation Board to conclude that NASA failed to learn from its earlier tragedy Despite the frequency with which organizations are encouraged to adopt learning practices organizational learning especially in public organizations is not well understood and deserves to be studied in more detail This book fills that gap with a thorough examination of NASA s loss of the two shuttles After offering an account of the processes that constitute organizational learning Julianne G Mahler focuses on what NASA did to address problems revealed by Challenger and its uneven efforts to institutionalize its own findings She also suggests factors overlooked by both accident commissions and proposes broadly applicable hypotheses about learning in public organizations

Into the Extreme Valerie Olson, 2018-05-22 The first book length in depth ethnography of U S human spaceflight What if outer space is not outside the human environment but rather defines it This is the unusual starting point of Valerie Olson s Into the Extreme revealing how outer space contributes to making what counts as the scope and scale of today s natural and social environments With unprecedented access to spaceflight worksites ranging from astronaut training programs to life science labs and architecture

studios Olson examines how U S experts work within the solar system as the container of life and as a vast site for new forms of technical and political environmental control Olson s book shifts our attention from space s political geography to its political ecology showing how scientists physicians and engineers across North America collaborate to build the conceptual and nuts and bolts systems that connect Earth to a specifically ecosystemic cosmos This cosmos is being redefined as a competitive space for potential economic resources social relations and political strategies Showing how contemporary U S environmental power is bound up with the production of national technical and scientific access to outer space Into the Extreme brings important new insights to our understanding of modern environmental history and politics At a time when the boundaries of global ecologies and economies extend far below and above Earth s surface Olson s new analytic frameworks help us understand how varieties of outlying spaces are known made and organized as kinds of environments whether terrestrial or beyond Global Space Governance: An International Study Ram S. Jakhu, Joseph N.

Pelton, 2017-09-12 This book is based on the findings conclusions and recommendations of the Global Space Governance study commissioned by the 2014 Montreal Declaration that called upon civil society academics governments the private sector and other stakeholders to undertake an international interdisciplinary study The study took three years to complete It examines the drivers of space regulations and standards key regulatory problems and especially addresses possible improvements in global space governance The world s leading experts led the drafting of chapters with input from academics and knowledgeable professionals in the public and private sectors intergovernmental organizations and nongovernmental organizations from all the regions of the world with over 80 total participants This book and areas identified for priority action are to be presented to the UN Committee on the Peaceful Uses of Outer Space and it is hoped will be considered directly or indirectly at the UNISPACE 50 event in Vienna Austria in 2018 The report a collective work of all the contributors includes objective analysis and frank statements expressed without pressure of political national and occupational concerns or interest It is peer reviewed and carefully edited to ensure its accuracy preciseness and readability It is expected that the study and derivative recommendations will form the basis for deliberations and decisions at international conferences and meetings around the world on the theme of global space governance This will hopefully include future discussion at the UN Committee on the Peaceful Uses of Outer Space Space Enterprise Phillip Harris, 2009-12-29 In Space Enterprise Living and Working Offworld Dr Philip Harris provides the vision and rationale as to why humanity is leaving its cradle Earth to use space resources as well as pursuing lunar industrialization and establishing offworld settlements As a management space psychologist Dr Harris presents a behavioral science perspective on space exploration and enterprise In this his 45th book Phil has completely revised and updated the two previous editions of this classic placing new emphasis on the need for more synergy and participation by the private sector He not only provides a critical review of what is happening in the global space community but offers specific strategies for lunar economic development The author analyzes the human factors in

contemporary and future space developments especially relative to the deployment of people aloft This user friendly volume offers numerous photographs diagrams exhibits and case studies **Through Astronaut Eyes** Jennifer K.

Levasseur,2020-06-15 Featuring over seventy images from the heroic age of space exploration Through Astronaut Eyes presents the story of how human daring along with technological ingenuity allowed people to see the Earth and stars as they never had before Photographs from the Mercury Gemini and Apollo programs tell powerful and compelling stories that continue to have cultural resonance to this day not just for what they revealed about the spaceflight experience but also as products of a larger visual rhetoric of exploration The photographs tell us as much about space and the astronauts who took them as their reception within an American culture undergoing radical change throughout the turbulent 1960s This book explores the origins and impact of astronaut still photography from 1962 to 1972 the period when human spaceflight first captured the imagination of people around the world Photographs taken during those three historic programs are much admired and reprinted but rarely seriously studied This book suggests astronaut photography is particularly relevant to American culture based on how easily the images were shared through reproduction and circulation in a very visually oriented society Space photography s impact at the crossroads of cultural studies the history of exploration and technology and public memory illuminates its continuing importance to American identity Unbroken Government Wendy N. Whitman

Cobb,2013-08-20 Unbroken Government demonstrates how institutional and electoral characteristics present since the writing of the Constitution influence policy development Utilizing policy areas as diverse as human spaceflight clean air homeland security and foreign policy this work shows how these patterns manifest themselves in the policymaking process

The New Celebrity Scientists Declan Fahy,2015-03-06 A new cultural icon strode the world stage at the turn of the twenty first century the celebrity scientist as comfortable in Vanity Fair and Vogue as Smithsonian Declan Fahy profiles eight of these eloquent controversial and compelling sellers of science to investigate how they achieved celebrity in the United States and internationally and explores how their ideas influence our understanding of the world Fahy traces the career trajectories of Richard Dawkins Stephen Hawking Steven Pinker Neil deGrasse Tyson Brian Greene Stephen Jay Gould Susan Greenfield and James Lovelock He demonstrates how each scientist embraced the power of promotion and popularization to stimulate thinking impact policy influence research drive controversies and mobilize social movements He also considers critical claims that they speak beyond their expertise and for personal gain The result is a fascinating look into how celebrity scientists help determine what it means to be human the nature of reality and how to prepare for society s uncertain future

Space to Grow Matthew Weinzierl,Brendan Rosseau,2025-02-25 Your guide using the compelling stories of changemakers and the tools of economics to the transformation and future possibilities of the business and economics of space Space is a place of unparalleled possibility for humanity and it s undergoing a revolution A wave of companies led by gutsy entrepreneurs is unlocking opportunities that fire the imagination and open up new business models No it s not hotels

on Mars or day trips to orbit yet but it's an awe inspiring transformation driven by innovative technologies creative approaches hard work and for the first time market forces Above all this revolution is uncovering the simple but unfamiliar truth that space is a place a place where countries markets and each of us can play a vital role in realizing some of our biggest boldest dreams But we won't succeed through dreams alone The space economy is just that an economy governed by the same laws of supply and demand that apply here on Earth The authors who teach a highly popular course on the topic at Harvard Business School bring the revolution in space to life through players you know like SpaceX and Blue Origin and many you may not like Astroscale founded by a Japanese IT executive who quit his job to start a company to clean up space debris They also bring to bear fundamental tools from economics to understand how the market in space is forming how it's fast becoming a source of value for businesses across industries and for society as a whole and how we can best ensure that its growth benefits us all With clarity and rigor Weinzierl and Rosseau get past the breathless hype to explain what's real what's not what comes next and how you can be part of it *Managing the Knowledge Culture* Philip Robert Harris, 2005 *Managing the Knowledge Culture* expertly explores how to overcome one of the biggest challenges 21st century leaders and their followers face functioning effectively in a knowledge culture The thoroughly up to date book will deepen your understanding of the knowledge culture and its management and clearly detail the changing roles For human resource professionals or managers who wants to be on the leading edge of knowledge management this realistic resource is a must

Critical issues in the history of spaceflight Steven J. Dick, 2018 **Critical Issues in the History of Spaceflight** Stephen J. Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experiences Amazon *Managing Uncertainty in Crisis* Xiaoli Lu, 2017-11-07 This book studies the variety of organizational strategies selected to cope with critical uncertainties during crises This research formulates and applies an institutional sense making model to explain the selection of strategies for coping with uncertainties during crises to answer the question why some organizations select a rule based strategy to cope with uncertainties whereas others pursue a more ad hoc based strategy It finds that the level of institutionalization does not affect strategy selection in the initial phase of responding to crises that three rigidity effects can be identified in the selection of sense making strategies once organizations have faced the failure of their selected strategies that discontinuities in the

feedback loop of sense making do not necessarily move organizations to switch their sense making strategies but interact with institutionalization to contribute to switching sense making strategies This book bridges the gap between institutional thinking and crisis management theorizing A major step forward in the world of crisis management studies Professor Arjen Boin Leiden University the Netherlands In a world of increasingly complex sociotechnical systems interacting in high risk environments Professor Lu s analysis of how organizations manage uncertainty is both timely and profound Professor Louise K Comfort Director Center for Disaster Management University of Pittsburgh USA Prof Lu greatly enhances our understanding of how organizations cope with uncertainty and make sense of their challenges under the pressures of catastrophe Dr Arnold M Howitt Faculty Co Director Program on Crisis Leadership Harvard Kennedy School USA This book provides not only a theory of crisis management but also a key concept around which research and practice can be conducted Professor Naim Kapucu Director of School of Public Administration University of Central Florida USA A generic institutional model for analyzing and managing hazards disasters and crises worldwide Professor Joop Koppenjan Erasmus University Rotterdam the Netherlands This book has done an excellent job in opening the black box of how organizations make sense of the crisis situations they face and develop strategies to respond It should be read by all of us who wish for a peaceful and safe world Professor Lan Xue Dean of School of Public Policy and Management Tsinghua University China **Satellite**

Earth Observations and Their Impact on Society and Policy Masami Onoda,Oran R Young,2017-06-16 The result of a workshop bringing together an international advisory board of experts in science satellite technologies industry innovations and public policy this book addresses the current and future roles of satellite Earth observations in solving large scale environmental problems The book showcases the results of engaging distinct communities to enhance our ability to identify emerging problems and to administer international regimes created to solve them It also reviews the work of the Policy and Earth Observation Innovation Cycle PEOIC project an effort aimed at assessing the impact of satellite observations on environmental policy and to propose a mission going forward that would launch an innovation cycle The achievements of such a mission would feed back to innovations in next generation observation technology thus contributing to global policy demand for policy relevant information This book is open access under a CC BY license *50 Years of Solar System*

Exploration Linda Billings,2021 To commemorate the 50th anniversary of the first successful planetary mission Mariner 2 sent to Venus in 1962 the NASA History Program Office the Division of Space History at the National Air and Space Museum NASA s Science Mission Directorate and the Jet Propulsion Laboratory organized a symposium Solar System Exploration 50 was held in Washington D C on 25-26 October 2012 The purpose of this symposium was to consider over the more than 50 year history of the Space Age what we have learned about the other bodies of the solar system and the processes by which we have learned it Symposium organizers asked authors to address broad topics relating to the history of solar system exploration such as various flight projects the development of space science disciplines the relationship between robotic

exploration and human spaceflight the development of instruments and methodologies for scientific exploration as well as the development of theories about planetary science solar system origins and implications for other worlds The papers in this volume provide a richly textured picture of important developments and some colorful characters in a half century of solar system exploration A comprehensive history of the first 50 years of solar system exploration would fill many volumes What readers will find in this volume is a collection of interesting stories about money politics human resources commitment competition and cooperation and the faster better cheaper era of solar system exploration Yearbook of Transnational History Thomas Adam,2021-05-03 The Yearbook of Transnational History is dedicated to disseminating pioneering research in the field of transnational history This fourth volume is focused to the theme of exile Authors from across the historical discipline provide insights into central aspects of research into the phenomenon of exile in the nineteenth and twentieth century Both centuries have seen large numbers of people fleeing revolutions oppression persecution and extermination This volume is the first publication to provide a comprehensive overview over exiles of various political and ethnic groups beginning with the French Revolution and ending with the transfer of Nazi scientists from post World War II Germany to the United States This volume contains contributions about the refugees created by the French Revolution the Forty Eighters who were forced out of Germany after the failed Revolution of 1848 49 the anarchists Emma Goldman and Alexander Berkman Vietnamese anti colonial activists in France the exiles of Nazi Germany and the transfer of Nazi scientists such as Wernher von Braun to the United States after World War II **Bibliographic Index** ,2004 **The British National Bibliography** Arthur James Wells,2005 *Books in Print Supplement* ,2002
