Performance Management and Budgeting F Stevens Redburn, Robert J. Shea, Terry F. Buss, David M. Walker, 2015-01-28 This book provides a fresh look at the process by which governments hold themselves accountable to their citizens for performance Unlike the plethora of other books in the field it examines all aspects of the Performance Management and Budgeting issue not only from the federal state and local perspectives but also internationally in both developing and developed countries Covering both conceptual and theoretical frameworks in performance management and budget the book analyzes the effectiveness of different approaches Featuring insights from a group of distinguished contributors it ties current performance management approaches into the century old literature on public sector reform and management and presents arguments for and against performance management as well as recommendations on how to improve the enterprise **Building the Virtual State** Jane E. Fountain, 2004-05-28 The benefits of using technology to remake government seem almost infinite The promise of such programs as user friendly virtual agencies and portals where citizens can access all sections of government from a single website has excited international attention The potential of a digital state cannot be realized however unless the rigid structures of the contemporary bureaucratic state change along with the times *Building the Virtual State* explains how the American public sector must evolve and adapt to exploit the possibilities of digital governance fully and fairly The book finds that many issues involved in integrating technology and government have not been adequately debated or even recognized Drawing from a rich collection of case studies the book argues that the

real challenges lie not in achieving the technical capability of creating a government on the web but rather in overcoming the entrenched organizational and political divisions within the state. Questions such as who pays for new government websites which agencies will maintain the sites and who will ensure that the privacy of citizens is respected reveal the extraordinary obstacles that confront efforts to create a virtual state. These political and structural battles will influence not only how the American state will be remade in the Information Age but also who will be the winners and losers in a digital society.

Outcome-Oriented Public Management Kuno Schedler, Isabella Proeller, 2010-11-01 After the New Public Management had evolved in English speaking countries it became a role model for the reform of public administration all throughout the world. Although there were obvious similarities in terminology used in different countries the model was usually adapted to the cultural and political context in which it had to be embedded. This also resulted in significant conceptual differences so that nowadays there is no one single NPM in the world. In contrast to the original NPM model this version puts emphasis on responsibility rather than accountability of public managers; it is strictly focused on the outcomes of public services rather than the output level and it is grounded on the Rechtsstaat tradition of Continental European countries. Thus the label that has been used in German ever since Wirkungsorientierte Verwaltungsführung is consequently translated into outcome oriented public management OPM. This book is an English version of a German classic teaching book. In its original form it was first published in 2000 and constantly revised according to latest developments in practice. Currently its 4th edition is selling in German speaking countries. Written for students and practitioners in public administration the book describes the OPM model and its roots and it discusses benefits and drawbacks of this model in practice. It is a perfect introduction into the new thinking of outcome orientation in the public sector. Public Management Laurence J. O'Toole, Jr., Kenneth J.

Meier, 2011-04-14 How effective are public managers as they seek to influence how public organizations deliver policy results? How and how much is management related to the performance of public programs? What aspects of management can be distinguished? Can their separable contributions to performance be estimated? The fate of public policies in today's world lies in the hands of public organizations which in turn are often intertwined with others in latticed patterns of governance. Collectively these organizations are expected to generate performance in terms of policy outputs and outcomes. In this book two award winning researchers investigate the effectiveness of management in the public sector. Firstly they develop a systematic theory on how effective public managers are in shaping policy results. The rest of the book then tests this theory against a wide range of evidence including a data set of 1 000 public organizations. **Defining Public Administration** Jay M. Air University Library Index to Military Periodicals, 1997 **Parameters**, 1994 *Analyzing the Operation of Performance-based Accountability Systems for Public Services* Frank A. Camm, Brian M. Stecher, 2010 Empirical evidence of the effects of performance based public management is scarce This report describes a framework used to organize available empirical information on one form of performance based management a performance based accountability system PBAS Such a system identifies individuals or organizations that must change their behavior for the performance of an activity to improve chooses an implicit or explicit incentive structure to motivate these organizations or individuals to change and then chooses performance measures tailored to inform the incentive structure appropriately The study focused on systems in the child care education health care public health emergency preparedness and transportation sectors mainly in the United States Analysts could use this framework to seek empirical information in other sectors and other parts of the world Additional empirical information could help refine existing PBASs and more broadly improve decisions on where to

initiate new PBASs how to implement them and then how to design manage and refine them over time **Air Force Magazine** ,1995 Political Science Quarterly ,1995 Vols 4 38 40 41 include Record of political events Oct 1 1888 Dec 31 1925 issued as a separately paged supplement to no 3 of v 31 38 and to no 1 of v 40 **From Bureaucracy to Hyperarchy in Netcentric and Quick Learning Organizations** Lawrence R. Jones,Fred Thompson,2007-02-01 This book focuses on the inherent contradiction between bureaucracy hierarchy and the vision inspired by the architecture of modern information technology of a more egalitarian culture in public organizations We agree with Evans and Wurster and others who have argued that in the future knowledge based productive relationships will be designed around fluid teambased collaborative communities either within organizations i e deconstructed value chains or in collaborative alliances such as those with amorphous and permeable corporate boundaries characteristic of companies in the Silicon Valley that is deconstructed supply chains In such relationships everyone can communicate richly with everyone else on the basis of shared standards and like the Internet itself these relationships will eliminate the need to channel information thereby eliminating the trade off between information bandwidth and connectivity The possibility or the threat of random access and information symmetry they conclude will destroy all hierarchies whether of logic or power
