Technological Innovation in Legacy Sectors

William B. Bonvillian,Charles Weiss,2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don t head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of

advanced manufacturing the production ecosystem can be recreated to reverse jobless innovation and add manufacturing led innovation to the U S s still strong research oriented innovation system American Mythos Robert Wuthnow,2009-02-09

America was built on stories tales of grateful immigrants arriving at Ellis Island Horatio Alger style transformations self made men and the Protestant work ethic In this new book renowned sociologist Robert Wuthnow examines these most American of stories narratives about individualism immigration success religion and ethnicity through the eyes of recent immigrants In doing so he demonstrates how the American mythos has both legitimized American society and prevented it from fully realizing its ideals This magisterial work is a reflection and meditation on the national consciousness It details how Americans have traditionally relied on narratives to address what it means to be strong morally responsible individuals and to explain why some people are more successful than others in short to help us make sense of our lives But it argues that these narratives have done little to help us confront new challenges We pass laws to end racial discrimination yet lack the resolve to create a more equitable society We welcome the idea of pluralism in religion and values yet we are shaken by the difficulties immigration presents We champion prosperity for all but live in a country where families are still homeless

American Mythos aptly documents this disconnect between the stories we tell and the reality we face Examining how cultural narratives may not and often do not reflect the reality of today s society it challenges readers to become more reflective about what it means to live up to the American ideal The Splintering of the American Mind William Egginton,2018-08-28

A timely provocative necessary look at how identity politics has come to dominate college campuses and higher education in America at the expense of a more essential commitment to equality Thirty years after the culture wars identity politics is now the norm on college campuses and it hasn t been an unalloyed good for our education system or the country Though the civil rights movement feminism and gay pride led to profoundly positive social changes William Egginton argues that our culture s increasingly narrow focus on individual rights puts us in a dangerous place The goal of our education system and particularly the liberal arts was originally to strengthen community but the exclusive focus on individualism has led to a new kind of intolerance degrades our civic discourse and fatally distracts progressive politics from its commitment to equality Egginton argues that our colleges and universities have become exclusive expensive clubs for the cultural and economic elite instead of a national publicly funded project for the betterment of the country Only a return to the goals of community and the egalitarian values underlying a liberal arts education can head off the further fracturing of the body politic and the splintering of the American mind With lively on the ground reporting and trenchant analysis The Splintering of the American Mind is a powerful book that is guaranteed to be controversial within academia and beyond At this critical juncture the book challenges higher education and every American to reengage with our history and its contexts and to imagine our nation in new and more inclusive ways A History of Evangelism in North America Thomas P. Johnston,2021-07-27

Vulnerable Communities James J. Connolly,Dagney G. Faulk,Emily J. Wornell,2022-02-15 *Vulnerable Communities* examines the struggles of smaller cities in the United States those with populations between 20 000 and 200 000 Like many larger metropolitan centers these places are confronting change within a globalized economic and cultural order Many of them have lost their identities as industrial or commercial centers and face a complex and distinctive mix of economic social and civic challenges Small cities have not only fewer resources but different strengths and weaknesses all of which differentiate their experiences from those of larger communities *Vulnerable Communities* draws together scholars from a broad range of disciplines to consider the present condition and future prospects of smaller American cities Contributors offer a mix of ground level analyses and examinations of broader developments that have impacted economically weakened communities and provide concrete ideas for local leaders engaged in redevelopment work The essays remind policy makers and academics alike that it is necessary to consider cultural tensions and place specific conflicts that can derail even the most well crafted redevelopment strategies prescribed for these communities
