**Prioritizing Academic Programs and Services** Robert C. Dickeson,2009-12-15 Prioritizing Academic Programs and Services REVISED AND UPDATED Increasing economic concerns make the new edition of this best selling classic an invaluable resource for those who want and need to implement a proven step by step approach to reallocating resources in tough times Thoroughly revised and updated Prioritizing Academic Programs and Services includes new recommendations from the field communication strategies for more successful campus implementation a new section on the sources of hidden costs and a Prioritization Process and Implementation workbook designed to help administrators avoid costly mistakes This book includes access to additional content online including models for prioritization from a variety of campuses Based on the author s extensive consulting experience this necessary and timely resource offers the best advice for addressing the current economic concerns affecting most colleges and universities Praise for Prioritizing Academic Programs and Services For more than a decade higher education leaders have turned to Dickeson s practical guide to academic program assessment These newly expanded approaches are just in time for today s competitive environment SUZANNE SHIPLEY president Shepherd University Dickeson provides a compelling rationale for program prioritization as well as a practical planning structure that promotes alignment between programs resources and university mission Presidents and provosts can use his approach to frame campus discussions around the future of the institution and away from legacy programs whose time has passed KYLE R CARTER provost and senior vice chancellor Western Carolina

University Dickeson's approach ensures that critical decisions regarding academic programs and resource allocation are aligned with strategic goals and institutional mission. As one of the early adopters of the process that he proposes, I am convinced that it is a powerful and practical tool for any college or university committed to remaining focused, resilient, vital, and relevant in a dynamic and increasingly challenging environment. DAVID MAXWELL, president, Drake University

**Schools and Societies** Steven G. Brint, 2006 Abstract [http://www3.openup.ac.uk/ouweb/owal/new\\_books1/book\\_desc\\_in\\_mis\\_cat/111625](http://www3.openup.ac.uk/ouweb/owal/new_books1/book_desc_in_mis_cat/111625)

**Reinventing Higher Education** Ben Wildavsky, Andrew P. Kelly, Kevin Carey, 2011-04-01 The inspiration for this timely book is the pressing need for fresh ideas and innovations in U.S. higher education. At the heart of the volume is the realization that higher education must evolve in fundamental ways if it is to respond to changing professional, economic, and technological circumstances and if it is to successfully reach and prepare a vast population of students, traditional and nontraditional alike, for success in the coming decades. This collection of provocative articles by leading scholars, writers, innovators, and university administrators examines the current higher education environment and its chronic resistance to change, the rise of for-profit universities, the potential future role of community colleges in a significantly revised higher education realm, and the emergence of online learning as a means to reshape teaching and learning and to reach new consumers of higher education. Combining trenchant critiques of current conditions with thought-provoking analyses of possible reforms and new directions, *Reinventing Higher Education* is an ambitious exploration of possible future directions for revitalized American colleges and universities.

**Reinventing the University** Sandra L. Johnson, Sean C. Rush, 1995-05-29 Change has dramatically confronted higher education in the last decade, challenging it to its very roots. Colleges and universities have been rocked by a volatile economy, changing demographic trends, weakening public opinion, lagging state and federal support, and other forces. Leaders from the most highly respected institutions in the country have examined the important issues facing higher education today, and this book offers their insights on restructuring administrative operations, new revenue opportunities, debt management, capital renewal, endowment management, and more.

**The Routledge Companion to Reinventing Management Education** Chris Steyaert, Timon Beyes, Martin Parker, 2016-06-17 The position and role of the business school and its educational programmes have become increasingly prominent yet also questioned and contested. What management education entails and how it is enacted has become a matter of profound concern in the field of higher education and more generally for the development of the organized world. Drawing upon the humanities and social sciences, *The Routledge Companion to Reinventing Management Education* imagines a different and better education offered to students of management, entrepreneurship, and organization studies. It is an intervention into the debates on what is taught and how learning takes place, demonstrating both the potential and the limits of what the humanities and social sciences can do for management education. Divided into six sections, the book traces the history and theory of management education, reimagining central educational principles and outlining an emerging

practice based approach With an international cast of authors The Routledge Companion to Reinventing Management Education has been written for contemporary and future educators and for students and scholars who seek to make a difference through their practice

**Balancing Contradictions: the Application and Relationship Between the SCOAPP Campus Master Planning Process and the University of Wisconsin-Madison Governance System** Noel Tomas Radomski,1996

*First Among Equals* James Martin,James E. Samels,1997-10-31 Each chapter of First among Equals explores a different aspect of the chief academic officer's primary responsibilities including relations with the president and the board academic governance curriculum development new instructional technologies financial planning enrollment management legal affairs and faculty development

**Business Practices in Higher Education** Mark A. Kretovics,2011-02-15 Business Practices in Higher Education is a breakthrough guide offering higher education and student affairs professionals an understanding of the fundamental business nature of colleges and universities The author discusses the practical applications of business concepts and models and how these applications can contribute to the overall efficiency and effectiveness of higher education institutions Useful examples from a wide range of institutions including small privates large publics and community colleges illustrate these concepts This professional guide is organized into the following four sections Environment and Structure Finance and Funding People and Processes Perspectives on the Future Business practices pervade the academic student affairs and administrative sides of higher education This book affords readers a greater understanding of the true nature of higher education and an appreciation for how the academy effectively incorporates business practices into everyday work lives

**Handbook of Research in Education Finance and Policy** Helen F. Ladd,Edward B. Fiske,2012-08-21 Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy Because a full understanding of the important contemporary issues requires input from a variety of perspectives the Handbook draws on contributors from a variety of disciplines While many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand

Resources in Education ,1999-10

**REIS - Abril/Junio 2003** , Financing Public Universities Marcel Herbst,2007-05-16 Financing Public Universities addresses newer practices of resource allocation which tie funding to indicators of performance The gist of these efforts is to raise the quality of institutional systems Performance based budgeting and funding of public universities

is part of broader efforts to reform public management and it is being promoted and implemented by various government agencies around the globe. In particular, European universities with their normally strong governmental ties or higher education systems molded on European universities are prime targets of such reforms. Performance funding has made its inroads in attempts to grant university systems managerial autonomy; autonomy was to be granted in exchange for funding modes which are tied to the measurement of performance indicators. Unfortunately, performance based budgeting or funding measures cannot meet the various expectations: they do not raise the quality of teaching or learning, they do not raise research performance, they take back a great deal of managerial autonomy which is commonly judged to be essential for the well being of higher education institutions, in particular research universities, and they act as automata in place of proper governance and management. *Financing Public Universities* addresses policy makers, higher education administrators, scholars, and students of higher education management. After an introduction to the theme and to the book, Chapter 1 *Financing Public Universities* covers the evolution of mass higher education and the associated curtailment of funding. Chapter 2 the public management reform debate, Chapter 3 within which performance based budgeting or funding evolved, Chapter 4 sketches alternative governance and management modes which can be used instead, Chapter 5 and epitomizes inertia or challenges, Chapter 6. Four appendices cover more technical matters such as a comparative exposition of the research performance of universities by nation, Appendix C and examples of funding systems in the UK and in the USA, Appendix D.

*Management Education and Humanities* Barbara Czarniawska-Joerges, 2006. Academics and managers who strive for a humanistic management education usually care for people but they are challenged by sophisticated intellectual subjects and practical problems. The authors' experience, competence, and commitment enables them to present an extensive coverage of important views and an in depth study of these issues. Eduard Bonet, ESADE, Spain. This volume is a timely initiative. It resonates with important questions on globalization and its consequences on the unrelenting quest for efficiency and productivity on recent corporate scandals and on the responsibilities of managers and management education. This book is a manifesto for an intellectual revolution. In a complex and open world, managers often bump into the limits of the decontextualized tools associated with mainstream management knowledge and practice. Managers have to navigate in a world that is not only economic but also political, cultural, shaped by history and ethical traditions and preoccupations, not only as a mark of social capital but really as a way to enhance their managerial skills and efficiency. The role of management education should be to prepare them for that odyssey, and this volume tells us that humanities could be a powerful tool in that sense. This project is served by a highly legitimate international panel of contributors who collectively point towards an alternative for management thinking and management education. Marie Laure Djelic, ESSEC Business School, France.

*Management Education and Humanities* argues that management teachers and researchers seem to be increasingly dissatisfied with the way managers are usually educated in western countries. It claims that educational practices and

methods would greatly benefit from reflection on the implicit assumptions and paradigms behind those practices and debates the role that humanism and humanities might play in the formation of new managerial lites The book examines three themes that have emerged as central to the contemporary debate on management education the profession of management humanism as a philosophy and worldview and the humanities as an academic field where management schools could find new inspirations for curricula All three themes are scrutinized in a frame of reference extended between two different points of view the traditional view with its tendency to idealize and even sometimes romanticize humanism the humanities and management as a social function and the past modern view which is inclined to skepticism and to the deconstruction of social and cultural phenomena Providing a lively account of this ongoing debate and exploring new trends and experiences in management education this book will be invaluable reading for teachers students and researchers of management

management strategy and organizational behaviour      Adoption of an Innovation Phillip G. Knutel,1998      **The Role of Universities in the Europe 2020 Strategy** Alessandra Ricciardelli,2017-10-31 This book provides a unique study of the role of universities as organisation systems in the pursuit of the Europe 2020 strategy While Europe 2020 focuses on creating the basis for the advancement and cohesion of the EU s member states it also has an important role in influencing the development strategies for potential candidate states In this regard the book examines two new member states Slovenia and Croatia and two potential EU candidate states Serbia and Kosovo in the Western Balkans Based on these cases the author argues that the operationalization of the Europe 2020 strategy depends to a great extent of the role and contribution of tertiary organisations such as educational institutions i e public and private universities and therefore requires the formulation of an economic development strategy at the national level that is capable of duly allocating the available financial resources The study suggests that the paradigm shift represented by Europe 2020 has helped to forge a new academic identity adding to the relevance of university organisations as fundamental agents for the promotion of economic development in addition it shows that an intensive learning process involving major structural changes is underway in the four countries discussed as well as many other EU member states      **Transcending New Public Management** Per

Laegreid,2017-03-02 Following on from the success of the editors previous book New Public Management The Transformation of Ideas and Practice which examined the public reform process up to the end of the last decade this new volume draws on the previous knowledge both theoretically and empirically It examines and debates the post new public management reform development in Denmark Norway Sweden Australia and New Zealand The ideal follow up to the previous volume this book includes many of the same contributors in addition to some fresh voices and is a must for anyone looking for an integrated framework of analysis Comprehensive and analytical it is an important contribution to the study of public administration and particularly to the reform of public management      *Handbook on Globalization and Higher Education* Roger King,Simon Marginson,Rajani Naidoo,2011 the Handbook constitutes an essential reference source for

everyone interested in studying the current meaning scope and implications of globalization Strongly recommended Higher Education Review Higher education has entered centre stage in the context of the knowledge economy and has been deployed in the search for economic competitiveness and social development Against this backdrop this highly illuminating Handbook explores worldwide convergences and divergences in national higher education systems resulting from increased global co operation and competition The expert contributors reveal the strategies practices and governance mechanisms developed by international and regional organizations national governments and by higher education institutions themselves They analyse local responses to dominant global templates of higher education and the consequences for knowledge generation social equity economic development and the public good This comprehensive and accessible Handbook will prove an invaluable reference tool for researchers academics and students with an interest in higher education from economics international studies and public policy perspectives as well as for higher education policymakers and funding and governance bodies
