Hermeneutics, Politics, and the History of Religions Christian Wedemeyer,Wendy Doniger,2010-03-08 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach s death and the centennial of Mircea Eliade s birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach s death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people s minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men s writings and their lives and in Eliade s case the relationship between his political commitments and his writings in fiction history of religions and autobiography Both men s contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars legacies Law and Religion

The Spirit of Contradiction in Christianity and Buddhism Hugh Nicholson, 2016-03-01 The cognitive science of religion has shown that abstract religious concepts within many established religious traditions often fail to correspond to the beliefs of the vast majority of those religions adherents And yet while the cognitive approach to religion has explained why these theologically correct doctrines have difficulty taking root in popular religious thought it is largely silent on the question of how they developed in the first place Hugh Nicholson aims to fill this gap by arguing that such doctrines can be understood as developing out of social identity processes He focuses on the historical development of the Christian doctrine of Consubstantiality the claim that the Son is of the same substance as the Father and the Buddhist doctrine of No self the claim that the personality is reducible to its impersonal physical and psychological constituents Both doctrines are maximally counterintuitive in the sense that they violate the default expectations that human beings spontaneously make about the basic categories of things in the world Nicholson argues that that these doctrines were each the products of intra and inter religious rivalry in which one faction tried to get the upper hand over its ingroup rivals by maximizing the contrast with the dominant outgroup Thus the pro Nicene theologians of the fourth century developed the concept of Consubstantiality in the context of an effort to maximize against their Arian rivals the contrast with Christianity s archetypal other Judaism Similarly the No self doctrine stemmed from an effort to maximize against the so called Personalist schools of Buddhism the contrast with Brahmanical Hinduism with its doctrine of an unchanging and eternal self In this way Nicholson shows how religious traditions to the extent that their development is driven by social identity processes can back themselves into doctrinal

positions that they must then retrospectively justify

Interrelatedness in Chinese Religious Traditions

Diana Arghirescu, 2022-11-17 The study of religions is essential for understanding other cultures building a sense of belonging in a multicultural world and fostering a global intercultural dialogue Exploring Chinese religions as one interlocutor in this dialogue Diana Arghirescu engages with Song dynasty Confucian and Buddhist theoretical developments through a detailed study of the original texts of the Chan scholar monk Qisong 1007 1072 and the Neo Confucian master Zhu Xi 1130 1200 Starting with these figures she builds an interpretive theory focusing on ethical interrelatedness and proposes it as a theoretical tool for the study of the Chinese religious traditions By actively engaging with other contemporary theories of religion and refusing to approach Chinese religions with Western frameworks Arghirescu's comparative perspective makes it possible to uncover differences between the various Western and Chinese cultural presuppositions upon which these theories are built As such this book breaks new ground in the methodology of religious studies comparative philosophy and furthers our understanding of the Confucian Buddhist interaction

Redescribing the Gospel of Mark

Barry S. Crawford, Merrill P. Miller, 2017-06-16 A collaborative project with a variety of critical essays This final volume of studies by members of the Society of Biblical Literature's consultation and later seminar on Ancient Myths and Modern Theories of Christian Origins focuses on Mark As with previous volumes the provocative proposals on Christian origins offered by Burton L Mack are tested by applying Jonathan Z Smith's distinctive social theorizing and comparative method Essays examine Mark as an author's writing in a book culture a writing that responded to situations arising out of the first Roman Judean war after the destruction of the Jerusalem temple in 70 CE Contributors William E Arnal Barry S Crawford Burton L Mack Christopher R Matthews Merrill P Miller Jonathan Z Smith and Robyn Faith Walsh explore the southern Levant as a plausible provenance of the Gospel of Mark and provide a detailed analysis of the construction of Mark as a narrative composed without access to prior narrative sources about Jesus A concluding retrospective follows the work of the seminar its developing discourse and debates and the continuing work of successor groups in the field Features A thorough examination of the relation between structure and event in social and anthropological theory that provides conceptual tools for representing the project of the author of Mark An exploration of the southern Levant as a plausible provenance of the Gospel a permanent site of successive imperial regimes and culturally related peoples A detailed analysis of the construction of Mark as a narrative composed without access to prior narrative sources about Jesus

The Sacred Is the Profane

William Arnal, Russell T. McCutcheon, 2013 The Sacred Is the Profane collects nine essays written over several years by William Arnal and Russell T McCutcheon that share a convergent perspective not simply that both the category and concept religion is a construct something that we cannot assume to be natural or universal but also that the ability to think and act religiously is quite specifically a modern political category in its origins and effects the mere by product of the modern state These collected essays substantially rewritten for this volume advance current scholarly debates on secularism debates which the authors

argue insufficiently theorize the sacred secular church state and private public binaries by presupposing religion often under the guise of such terms as religiosity faith or spirituality to historically precede the nation state The essays return again and again to the question of what religion word and concept accomplishes now for those who employ it whether at the popular political or scholarly level The focus here for two writers from seemingly different fields is on the efficacy costs and the tactical work carried out by dividing the world between religious and political church and state sacred and profane

After World Religions Christopher R Cotter, David G. Robertson, 2016-02-05 The World Religions Paradigm has been the subject of critique and controversy in Religious Studies for many years After World Religions provides a rationale for overhauling the World Religions curriculum as well as a roadmap for doing so The volume offers concise and practical introductions to cutting edge Religious Studies method and theory introducing a wide range of pedagogical situations and innovative solutions An international team of scholars addresses the challenges presented in their different departmental institutional and geographical contexts Instructors developing syllabi will find supplementary reading lists and specific suggestions to help guide their teaching Students at all levels will find the book an invaluable entry point into an area of ongoing scholarly debate

The Origins of Early Christian Literature Robyn Faith Walsh, 2021-01-28 Conventional approaches to the Synoptic gospels argue that the gospel authors acted as literate spokespersons for their religious communities Whether described as documenting intra group oral traditions or preserving the collective perspectives of their fellow Christ followers these writers are treated as something akin to the Romantic poet speaking for their Volk a questionable framework inherited from nineteenth century German Romanticism In this book Robyn Faith Walsh argues that the Synoptic gospels were written by elite cultural producers working within a dynamic cadre of literate specialists including persons who may or may not have been professed Christians Comparing a range of ancient literature her ground breaking study demonstrates that the gospels are creative works produced by educated elites interested in Judean teachings practices and paradoxographical subjects in the aftermath of the Jewish War and in dialogue with the literature of their age Walsh s study thus bridges the artificial divide between research on the Synoptic gospels and Classics

Faith from a Positive Psychology Perspective Cindy Miller-Perrin, Elizabeth Krumrei Mancuso, 2014-10-01 This book highlights religious faith from a positive psychology perspective examining the relationship between religious faith and optimal psychological functioning It takes a perspective of religious diversity that incorporates international and cross cultural work The empirical literature on the role of faith and cognition faith and emotion and faith and behaviour is addressed including how these topics relate to individuals mental health well being strength and resilience Information on how these faith concepts are relevant to the broader context of relational functioning in families friendships and communities is also incorporated Psychologists have traditionally focused on the treatment of mental illness from a perspective of repairing damaged habits damaged drives damaged childhoods and damaged brains In recent years however many psychological researchers and practitioners have attempted to re focus the

field away from the study of human weakness and damage toward the promotion of a positive psychology of well being among individuals families and communities One domain within the field of positive psychology is the study of religious faith as a human strength that has the potential to enhance individuals optimal existence and well being *Printing Religion after the Enlightenment* Timothy Stanley, 2022-07-26 Over the course of the seventeenth to eighteenth centuries an interior private notion of religion gained wide public recognition It then spread through settler colonial contexts around the world It has since been criticized for its abstract immaterial nature as well as its irrelevance to traditions beyond the European context However such critiques obscure the contradiction between religion s definition as a matter of interior privacy and its public visibility in various printed publications Timothy Stanley responds by re evaluating the cultural impact of the exterior forms in which religious texts were printed such as pamphlets broadsheets books and journals He also applies that evidence to critical studies of religion shaped by the crisis of representation in the human sciences While Jacques Derrida is oft cited as a progenitor of that crisis the opposite case is made Additionally Stanley draws on Derrida s thought to reframe the relation between a religious text s internal hermeneutic interests and its external forms In sum this book provides a new model of how people printed religion in ways that can be compared to other material cultures around the world **Imagine No Religion** Carlin A. Barton, Daniel Boyarin, 2021-05-20 Shed s new light on the fascinating transformations of these words religio threskeia in the shadow of Roman imperial power Brent Nongbri award winning author of *God s Library* What do we fail to see when we force other earlier cultures into the Procrustean bed of concepts that organize our contemporary world In *Imagine No Religion* Carlin A Barton and Daniel Boyarin map the myriad meanings of the Latin and Greek words religio and threskeia frequently and reductively mistranslated as religion in order to explore the manifold nuances of their uses within ancient Roman and Greek societies In doing so they reveal how we can conceptualize anew and speak of these cultures without invoking the anachronistic concept of religion From Plautus to Tertullian Herodotus to Josephus *Imagine No Religion* illuminates cultural complexities otherwise obscured by our modern day categories An excellent attempt to approach translational issues with fresh eyes this book presents a fresh methodological challenge to students of the ancient world and especially to scholars interested in the religion of the ancient Mediterranean Reading *Religion* A timely contribution to a growing and important conversation about the inadequacy of our common category religion for the understanding of many practices attitudes emotions and beliefs especially of peoples in other times and contexts Wayne A Meeks author of *In Search of the Early Christians*
