The New Template for Recovery Portman, 2010-08. The New Template for Recovery is for people who believe they have the ability to make important changes in their lives, including quitting drinking. It is designed for those who want to succeed at sobriety but want something different than, or in addition to, what standard treatment programs and AA have to offer. If you want to pursue a forward-going approach to recovery and to become excited rather than depressed about life without alcohol, this book may be the place for you to find the motivation, the knowledge, and the pathway to succeed. If you are drawn to the idea of an independent recovery from an alcohol use problem, know that you are not alone and rest assured that millions of people gain lasting sobriety on their own. Indeed, an irrepressible body of research finds that many, possibly most, people in successful recovery manage to quit drinking on their own. The New Template for Recovery provides a clear and practical, self-directed guide to sobriety and a better life by the use of a template for recovery that can be crafted and followed according to each person's needs. Learn: The level of alcohol use problem that you have. How to safely manage alcohol withdrawal. Why you are not to blame. The pros and cons of AA and standard treatment programs. The psychological and physical addiction processes and effects. Discover: The foreword going template model for recovery. How to focus on the life areas of recovery that are important to you. Powerful relapse prevention strategies. The motivation to recreate your life your way.

Addiction Recovery Lore Bellaert, 2022-06-29. This doctoral study focuses on a relational approach to recovery as an addition to the dominant individualized interpretations of addiction recovery. It explores the enabling or disabling role of social networks and broader societal contexts in which recovery processes are embedded, without disregarding the deeply personal nature of addiction recovery in terms of building a meaningful life. This dissertation is based on the Recovery Pathways (REC PATH) research project, a longitudinal and multi-country cohort study designed to map pathways to drug addiction recovery. Rooted in the policy, quantitative, and qualitative research phases of the REC PATH project, this study uncovers contextual dynamics at play in addiction recovery. Grounded in first-person accounts of recovery,

from drug use problems we critically investigate the complex and ambiguous roles that interpersonal relationships life circumstances support services and structural factors might play throughout recovery processes Conceptualizing addiction recovery as a relational process of change has implications for how practice policy and research are organized This dissertation thus provides tools for students practitioners and policymakers who want to contribute to developing recovery supportive environments that include attention to the contextual dimensions of recovery
