Relativist Absolutist The Early Neocla:

Convention, 1500-1750 Lawrence Manley, 1980 A major reinterpretation of the development of European literary theory this wide ranging study offers a new approach to ways of thinking about man's work in general This book is a history of the idea of convention the roles it played in the formative stages of English and Continental literary theory and in the development of modern thought *The Intellectual Revolution of the Seventeenth Century (Routledge Revivals)* Charles Webster, 2012-10-12 Intellectual history and early modern history have always occupied an important place in Past and Present First published in 1974 this volume is a collection of original articles and debates published in the journal between 1953 and May 1973 dealing with many aspects of the intellectual history of the seventeenth century Several of the contributions have been extremely influential and the debates represent major standpoints in controversies over genesis of modern ideas Although England is the focus of attention for most of the contributors their themes have wider significance Among the topics covered in the collection are the political thought of the Levellers and of James Harrington radical social movements of the Puritan Revolution the ideological context of physiological theories associated with William Harvey the relationship between science and religion and the social relations of science and the function of millenarianism and eschatology in the seventeenth century The editor's Introduction indicates the context in which the articles were composed and provides valuable bibliographical information about the subjects discussed **Sociable Criticism in England, 1625-1725** Paul Trolander, Zeynep Tenger, 2007 Sociable Criticism in England explores how from 1625 to 1725 cultural practices and discourses of sociability rules for small group discussion friendship discourse and patron client relationships determined the venues within which critical judgments were rendered disseminated and received It establishes how individuals operating in small groups were authorized to circulate critical judgments and commentary why certain modes of critical exchange were treated as beyond the ken of good social manners and how such expectations were subverted or manipulated to avoid the imputation that individuals had violated the standards for offering public criticism Philips George Villiers John Dryden Lady Margaret Cavendish John Dennis and Joseph Addison this study argues that seventeenth and early eighteenth century criticism could circulate either orally in manuscript or in print so long as it appeared to originate in interpersonal encounters considered appropriate to critical discussion **The Historical Revolution (Routledge Revivals)** Frank Smith Fussner, 2010-10-04 First published in 1962 Frank Smith Fussner's introduction to the revolution in English historical writing and thought during the period of the renaissance and reformation 1580-1640 is an influential and thoroughly researched work It offers an introduction not only to the context of the period and the important English historians of the era but also provides a thorough historiographical approach which deals with the purpose method content style and significance of these historians within the framework of this historical revolution [The Cultural Milieu of Addison's Literary Criticism](#) Lee Andrew Elioseff, 2014-07-03 The whole history of literary criticism is illuminated by this

analysis of one English critic's work. It is in effect a literary case study presented as a partial answer to the complicated question: what cultural conditions are conducive to the development of a particular theory of literature? Initially, Lee Andrew Elioseff defines four difficult responsibilities of the historian of criticism: the interpretation of his material in terms of all the cultural circumstances that produced it; elimination of the purely chance elements such as private feuds and unimportant personal tastes; consideration of those aspects of criticism that best indicate the dominant critical opinions of the age and the principles that are leading it; and illumination of the present critical situation. Concentrating upon the first three of these obligations, Elioseff seeks the sources of modern literary criticism in the works of Joseph Addison and his contemporaries, analyzing with great care and accuracy their responses to problems both literary and nonliterary in their culture. From the analysis, Addison emerges as a very significant figure: a critic who moved from Renaissance and neoclassical humanism and became one of the most important predecessors of romantic criticism; a formulator of what was to become the emotive strain in literary criticism; an essayist who raised many problems shared by the modern psychological critic whose immediate concern is the effect of the literature upon its audience. Drawing abundantly from a wide knowledge of philosophy, literature, and history, and exercising an incisive critical acumen, Elioseff discusses Addison's criticism in three aspects: **The Critical Milieu**, an interpretation of Addison's relation to his age as it influenced his views on tragedy, epic poetry, and ballads; **Addison and Eighteenth Century England**, a consideration of contemporary political thought, morals, and theology; and **The Empirical Tradition**, an analysis of Addison's critical views as expressed in *The Pleasures of the Imagination*. **Samuel Johnson and Neoclassical Dramatic Theory** Robert D. Stock, 1973 **Dryden's Classical Theory of Literature** Edward Pechter, 1975-03-20 Professor Pechter's book attempts to describe the consistent structure of both style and method within which Dryden examines, orders, and evaluates literary experience. This mode permits Dryden to recognize the real differences between French and English drama: Virgilian and Ovidian style, judgement and fancy, to take some of the more familiar from among Dryden's typical conjunctive pairs, without either merging their differences into some grand synthesis or transforming them into mutually exclusive antitheses. Dryden's is above all a comprehensive theory of literature which aims at responding to a broad range of various literary styles, genres, faculties, and effects. Dryden's balance is classical, the poise of the golden mean, and Professor Pechter endeavours to give fresh life to classical as an epithet often previously applied to Dryden. Ranging among writers in ancient Greece and Rome and among Dryden's contemporaries in England and France, the author outlines a rich literary tradition within which Dryden's criticism is more easily appreciated and better understood.

Rhetorical Renaissance Kathy Eden, 2023-01-06 Kathy Eden reveals the unexplored classical rhetorical theory at the heart of iconic Renaissance literary works. Kathy Eden explores the intersection of early modern literary theory and practice. She considers the rebirth of the rhetorical art resulting from the rediscovery of complete manuscripts of high profile ancient texts about rhetoric by Plato, Aristotle, Cicero, Quintilian, and Tacitus, all unavailable before the early fifteenth century and the

impact of this art on early modern European literary production This profound influence of key principles and practices on the most widely taught early modern literary texts remains largely and surprisingly unexplored Devoting four chapters to these practices on status refutation similitude and style Eden connects the architecture of the most widely read classical rhetorical manuals to the structures of such major Renaissance works as Petrarch's *Secret* Castiglione's *Book of the Courtier* Erasmus's *Antibarbarians* and Cicero's *De Officiis* and Montaigne's *Essays* Eden concludes by showing how these rhetorical practices were understood to work together to form a literary masterwork with important implications for how we read these texts today

The Just and the Lively Michael Werth Gelber, 2002 Recognition is often considered a means to de-escalate conflicts and promote peaceful social interactions This volume explores the forms that social recognition and its withholding may take in asymmetric armed conflicts examining the risks and opportunities that arise when local state and transnational actors recognise misrecognise or deny recognition of armed non state actors By studying key asymmetric conflicts through the prism of recognition it offers an innovative perspective on the interactions between armed non state actors and state actors In what contexts does granting recognition to armed non state actors foster conflict transformation What happens when governments withhold recognition or label armed non state actors in ways they perceive as misrecognition The authors examine the ambivalence of recognition processes in violent conflicts and their sometimes unintended consequences The volume shows that while non recognition prevents conflict transformation the recognition of armed non state actors may produce counterproductive precedents and new modes of exclusion in intra state and transnational politics

The Meaning of Literature Timothy J. Reiss, 2018-10-18 In this searching and wide ranging book Timothy J. Reiss seeks to explain how the concept of literature that we accept today first took shape between the mid sixteenth century and the early seventeenth a time of cultural transformation Drawing on literary political and philosophical texts from Central and Western Europe Reiss maintains that by the early eighteenth century divergent views concerning gender politics science taste and the role of the writer had consolidated and literature came to be regarded as an embodiment of universal values During the second half of the

sixteenth century Reiss asserts conceptual consensus was breaking down and many Western Europeans found themselves overwhelmed by a sense of social decay A key element of this feeling of catastrophe Reiss points out was the assumption that thought and letters could not affect worldly reality Demonstrating that a political discourse replaced the no longer viable discourse of theology he looks closely at the functions that letters served in the reestablishment of order He traces the development of the idea of literature in texts by Montaigne Spenser Sidney Shakespeare Lope de Vega and Cervantes among others through seventeenth century writings by such authors as Davenant Boileau Dryden Rymer Anne Dacier Astell and Leibniz to eighteenth century works including those of Addison Pope Batteux and Hutcheson Burke Lessing Kant and Wollstonecraft Reiss follows key strands of the tradition particularly the concept of the sublime into the nineteenth century through a reading of Hegel s Aesthetics The Meaning of Literature will contribute to current debates concerning cultural dominance and multiculturalism It will be welcomed by anyone interested in literature and in cultural studies including literary theorists and historians comparatists intellectual historians historical sociologists and philosophers

Value Theory and Economic Progress: The Institutional Economics of J. Fagg Foster Marc R. Tool, 2012-12-06 J Fagg Foster 1907 1985 was one of the most significant creators of institutionalist economic theory in the twentieth century He wrote and taught in the American intellectual tradition of Thorstein Veblen John R Commons John Dewey and Clarence E Ayres This tradition shares purpose and philosophy with the European contributors Gunnar Myrdal and K William Kapp Because little of Foster s scholarly work was formally published professional knowledge of his extraordinary contribution is quite limited beyond the circle of his students and colleagues Value Theory and Economic Progress attempts to correct that deficiency by providing an extended characterization of this missing and crucial component of the development of American heterodox economic thought Its purpose is to demonstrate the timely relevance and significance of this model of inquiry in political economy In addition this volume explains that contemporary problem solving means changing what is into what ought to be through institutional adjustments such a demonstration is at the heart of Foster s contribution to institutional thought

The Making of the English Literary Canon Trevor Thornton Ross, 1998 It is widely accepted among literary scholars that canon formation began in the eighteenth century when scholarly editions and critical treatments of older works designed to educate readers about the national

literary heritage appeared for the first time In *The Making of the English Literary Canon* Trevor Ross challenges this assumption arguing that canon formation was going on well before the eighteenth century but was based on a very different set of literary and cultural values Covering a period that extends from the Middle Ages to the institutionalisation of literature in the eighteenth century Ross s comprehensive history traces the evolution of cultural attitudes toward literature in English society highlighting the diverse interests and assumptions that defined and shaped the literary canon An indigenous canon of letters Ross argues had been both the hope and aim of English authors since the Middle Ages Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture habits that were gradually displaced by an emergent rationalist understanding of literary value He shows that beginning in the late seventeenth century canon makers became less concerned with how English literature was produced than with how it was read and received By showing that canon formation has served different functions in the past *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated promoted and preserved It is widely accepted among literary scholars that canon formation began in the eighteenth century when scholarly editions and critical treatments of older works designed to educate readers about the national literary heritage appeared for the first time In *The Making of the English Literary Canon* Trevor Ross challenges this assumption arguing that canon formation was going on well before the eighteenth century but was based on a very different set of literary and cultural values Covering a period that extends from the Middle Ages to the institutionalisation of literature in the eighteenth century Ross s comprehensive history traces the evolution of cultural attitudes toward literature in English society highlighting the diverse interests and assumptions that defined and shaped the literary canon An indigenous canon of letters Ross argues had been both the hope and aim of English authors since the Middle Ages Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture habits that were gradually displaced by an emergent rationalist understanding of literary value He shows that beginning in the late seventeenth century canon makers became less concerned with how English literature was produced than with how it was read and received By showing that canon formation has served different functions in the past *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated promoted and preserved
