Relativity And Consciousness A New Approach To Evolution:

Relativity and Consciousness Kate Flores,1985-01-01 The Transmission of Affect Teresa Brennan,2014-02-15 The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar. Indeed, phrases that capture this notion abound in the popular vernacular: negative energy dumping, you could cut the tension with a knife. The Transmission of Affect deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another. The ability to borrow or share states of mind, once historically and culturally assumed, is now pathologized, as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life. To neglect the mechanism by which affect is transmitted, the author claims, has serious consequences for science and medical research. Brennan's theory of affect is based on constant communication between individuals and their physical and social environments. Her important book details the relationships among affect, energy, and new maladies of the soul, including attention deficit disorder, chronic fatigue syndrome, codependency, and fibromyalgia.

Einstein's Relativity And Beyond: New Symmetry Approaches Hsin-i Chang, Jong-ping Hsu, 2000-07-20 The purposes of this book are 1) to explore and expound relativity physics and four-dimensional symmetry from the logically simplest viewpoint by making one single postulate instead of two, and 2) to indicate the simplest generalization of the Lorentz transformation in order to cope with frames with constant linear accelerations. The fundamentally new ideas of the first purpose are developed on the basis of the term paper of a Harvard physics undergraduate. They lead to an unexpected affirmative answer to the long-standing question of whether it is possible to construct a relativity theory without postulating the constancy of the speed of light and retaining only the first postulate of special relativity. This question was discussed in the early years following the discovery of special relativity by many physicists, including Ritz, Tolman, Kunz, Comstock, and Pauli, all of whom obtained negative answers. Furthermore, the new theory of relativity indicates the truly universal and fundamental constants in physics and provides a broad view of relativistic physics beyond special relativity. It substantiates the view and sheds light on the understanding that the four-dimensional symmetry framework can accommodate many different concepts of physical time, including common time and Reichenbach's general concept of time. This logically simplest viewpoint of relativity allows a natural extension of the physics of particles and fields from inertial frames to noninertial frames in which the speed of light is not constant. New predictions in physics resulting from this new viewpoint are discussed. The book is based on papers by the author and his collaborators in *Physics Letters A*, *Nuovo Cimento B*, and *Physical Review A* and *D*.

Martha E. Rogers Martha E. Rogers, 1994 A towering figure in modern nursing, Rogers (1914-1994) died during the final preparation of this collection of writings by and about her. They cover her role in the development of nursing science, the influences that shaped her life, education, and research, professional and political issues, her *Science of Unitary Human Beings*, her ideas about nursing in space, and salutes to her on her 75th birthday. A New Approach to Kant Zehou Li, 2018-05-21 Originally written during the Cultural Revolution this book introduces and interprets Kant's critical philosophy through the lens of its author Li Zehou's own philosophical approach anthropological historical ontology Li argues that the process of human development begins with and is shaped by the practical material activities associated with making and using tools in primitive societies Over millions of years these ever evolving practices accumulate and become sedimented into archetypical forms that shape history social relationships and human psychology Li's views draw upon Marx's theory of practice and as those familiar with his work will recognize his reinterpretation of Confucian thought with its emphasis on material life and worldly existence Beginning with the assumption that the question at heart of Kant's philosophy is What is the human being Li offers a highly original answer by arguing that the root of Kant's transcendental knowledge universal forms moral autonomy and aesthetics can be found in the practical and social activities associated with tool making Li offers a new reading not only of Kant but of modern European philosophy including Hegel and Marx that forces us to rethink our understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our shared human future

Consciousness Unbound Edward F. Kelly, Paul Marshall, 2021-03-16 Building on the groundbreaking research of Irreducible Mind and Beyond Physicalism Edward Kelly and Paul Marshall gather a cohort of leading scholars to consider the significance of extraordinary experiences for our understanding of reality Currently emerging as a middle ground between warring fundamentalisms of religion and science an expanded science based understanding of nature finally accommodates empirical realities of spiritual sorts while also rejecting rationally untenable overbeliefs The vision sketched here provides an antidote to the prevailing postmodern disenchantment of the world and demeaning of human possibilities It not only more accurately and fully reflects our human condition but engenders hope and encourages ego surpassing forms of human flourishing It offers reasons for us to believe that freedom is real that our human choices matter and that we have barely scratched the surface of our human potentials It also addresses the urgent need for a greater sense of worldwide community and interdependence a sustainable ethos by demonstrating that under the surface we and the world are much more extensively interconnected than previously recognized A Search for Unity in Diversity James Allan Good, 2006-01-01 A Search for Unity in Diversity examines the traditional readings of John Dewey's relationship to Hegel and demonstrates that Dewey's later pragmatism was a development of the historicist humanistic Hegel rather than a turning away from Hegelian philosophy Good argues that Dewey drew upon resources he found in the writings of St Louis Hegelians to fashion a non metaphysical reading of Hegel A Search for Unity in Diversity reasons that Hegel encouraged Dewey to understand philosophy as an exercise in individual and cultural reconstruction Beyond exposing fatal flaws in the traditional reading of Dewey's relationship to Hegel Good shows that Dewey's pragmatism is a development rather than a rejection of Hegel's philosophy This not only explains Dewey's Hegelian deposit it also sheds light on why recent Hegel scholars have found elements of pragmatism in Hegel's thought and provides grounds for rapprochement between American pragmatism and Continental European philosophy *International Handbook of Education for Spirituality, Care and Wellbeing* Marian de Souza, LESLIE J. FRANCIS, James O'Higgins-Norman, Daniel G. Scott, 2009-10-13 Acknowledging and understanding spiritual formation is vital in contemporary education This book explores the dynamic relationship between education and wellbeing It examines the theory underpinning the practice of education in different societies where spirituality and care are believed to

be at the heart of all educational experiences The book recognizes that regardless of the context or type of educational experience education is a caring activity in which the development of the whole person body mind and spirit is a central aim for teachers and educators in both formal and informal learning The chapters in this handbook present and discuss topics that focus on spirituality as an integral part of human experience and consequently essential to educational programs which aim to address personal and communal identity foster resilience empathy and compassion and promote meaning and connectedness

A World Perspective Through 21st Century Eyes R. K. Koslowsky, 2004 As a community of citizens in the twenty first century we are fortunate to have emerged from the biological evolution of the past million years and the cultural evolution of the past ten thousand years We have enjoyed an abundance of time and freedom to explore the why and how things work and continue to push the limits of the present technological evolution *A World Perspective through 21st Century Eyes* is not a history textbook or a science history book It is not a treatise on philosophy or theology Rather it is a book on the major themes in the evolution of man and the impact of science thereto It is a book with the major theme addressing the impact of science on society one in which the technical community has not had time to digest and reflect upon during the past fifty years With the time pressures of the day and in the specializations in which we operate there is precious little surplus energy available to us for leisure activity of our choosing I trust that this treatment will sketch a broad outline that the scientific and technological community has had on society over the past five thousand years and potential areas where further impacts will be made in the next one hundred years To this effort I believe the reader will find his or her surplus energy well spent An engineer to which my life's training was aimed is expected to have a complete and thorough knowledge of some subjects This is true for most of us in the technical community therefore it is also true that most of us choose not to write about many topics of which we are not master I feel this separation of subjects and isolation of scientists and technologists does a disservice to others in other disciplines who look for different views in order to maintain a balanced perspective on the myriad of issues confronting them each day Those of us who have grown up in the Western Culture without a technical education may find this discussion exciting in the different way it is broached Just as an engineer appreciates the beauty of the Golden Gate Bridge and the precision of the clock the inspiration from watching the setting sun reading a biblical passage or viewing a Bouguereau painting can motivate and enlighten that same engineer In this way I aim to provide the reader either technical or non technical with an appreciation of the evolving world from the viewpoint of one who has been technically trained I cannot reproduce the sunset paint or sing to inspire but I hope these insights motivate you to pause and consider your area of expertise with the aim for you to contribute that which has inspired and motivated you

The Human Buddha Aziz Kristof, 2000-01-01 The Message for the New Millennium presents a vision of Awakening which reveals the human face of the Buddha It is essential at this moment in our evolution to return to a more realistic perspective of enlightenment Most seekers cannot relate to the concept of enlightenment for they feel intimidated by the

image of the flawless Buddha Here The Human Buddha is no longer a spiritual superman who denies natural longings desires and human imperfections The Human Buddha is indeed a sensitive being a child of the Beloved like all of us The Human Buddha openly acknowledges the gentle and vulnerable quality of his or her heart *Paperbound Books in Print 1995* Reed Reference Publishing, R5ference Reed, 1995-12
