Relativity Today Proceeding Of The Fifth Hungarian Relativity Workshop:

Relativity Today C. A. Hoenselaers, Hungarian Relativity Workshop, Zoltán Perjés, 1997-01-01 The volume contains the lectures presented at the Fifth Hungarian Relativity Workshop These triennial events provide a forum for discussions by internationally recognized experts by surveying developing directions in general relativity The material is arranged in sections reflecting on the prevalent research fields and following the layout of the previous volumes General relativity remains an intensively researched area of theoretical physics In the past decades the theory has been enriched by deep new ideas The physics of black holes has become a well established part of relativity The canonical approach to gravitation has undergone a period of vigorous development With the spectacular evolution of observational techniques cosmological theories have diversified at a breath taking pace New initiatives have stemmed from particle theory such as the physics of supersymmetric fields gravitational monopoles and solitons

Relativity Today C. A. Hoenselaers, Zoltán Perjés, 2002 This book presents recent advances in the theory of general relativity The first part contains a detailed review of the equivalence problem and its solution The key issue here is whether or not two solutions of Einstein's gravitational equations describe identical space times The ideas reviewed are useful for classifying space times in general relativity and for construction of new solutions of the Einstein equations The second part of the volume is devoted to vacuum and perfect fluid space times The third part contains results on gravitational waves and on the asymptotic behavior of the field of bounded sources
