Religion And Advanced Industrial Society:

Religion and Advanced Industrial Society James A. Beckford, 2019-03-19 This book first published in 1989 demonstrates that sociologists have much to gain from a strengthening of the connections between general theories about the changing character of modern western societies and specific studies of religion It combines an exegesis of sociological classics in the study of religion and a history of their influence upon the subject's development a criticism of Talcott Parson's attempt to synthesise classical viewpoints into a single theory of modernity a discussion of post-Parsonian theories of religion's declining importance and an argument that some quasi-Marxist thinkers may offer fresh insights into the place of religion in capitalist societies

The Problem of Invented Religions Steven J. Sutcliffe,Carole M Cusack,2017-08-15 Invented religions have been described as modern religions which advertise their invented status and reject traditional strategies of authorisation But what does it mean for a religious formation to be made up and how might this status affect perceptions of its legitimacy or authenticity in wider society Based in original fieldwork and archival sources and in the secondary literature on invented and constructed formations this volume explores the allure of as well as the limits of the invention of religion Through a series of case studies the contributors discuss strategies of mobilization and legitimation for new traditions at their point of emergence as well as taking issue with simplistic interpretations of the phenomenon which neglect wider cultural and political dimensions This book was originally published as a special issue of Culture and Religion **Democracy and Human Rights in Multicultural Societies** Matthias Koenig,Paul F. A. Guchteneire,2007 Published in association with UNESCO this volume examines the political governance of cultural diversity Interdisciplinary to comparative social sciences it assesses public policy responses to ethnic linguistic and religious diversity and addresses the conditions forms and consequences of democratic and human rights based governance of multi ethnic multi lingual and multi faith societies

Democracy and Human Rights in Multicultural Societies Paul de Guchteneire,2017-07-05 Published in association with UNESCO Democracy and Human Rights in Multicultural Societies examines the political governance of cultural diversity specifically how public policy making has dealt with the claims for cultural recognition that have increasingly been expressed by ethno national movements language groups religious minorities indigenous peoples and migrant communities Its principle

aim is to understand explain and assess public policy responses to ethnic linguistic and religious diversity Adopting interdisciplinary perspectives of comparative social sciences the contributors address the conditions forms and consequences of democratic and human rights based governance of multi ethnic multi lingual and multi faith societies New Religions and Globalization Armin Geertz, Margit Warburg, 2008-08-01 Globalization is a predominant theme in contemporary educational and political circles Research on globalization has become a political priority because the world has become a single place as Roland Robertson formulated it where events in any particular part of the world can and often do have political economical and military consequences for the rest of the world Discourse on globalization however has generally ignored the cultural consequences Recent waves of violence that seem to be religiously fueled if not motivated among immigrants and refugees in Europe and their home regions in the Middle East have demonstrated that we can only ignore culture values and religion at our own peril Globalization and new religions is the theme of this book It is argued here that studying new religions in a globalization perspective offers theoretical and methodological advantages both for the general study of religion and the general study of globalization Religions are often cosmopolitan and universal in their overall message yet they may at the same time be utterly immersed in local interactions This is often clearly expressed among minority religions The contrast of the local and the global is accentuated by globalization and in particular many new religions have followed suit This book draws together a selection of top quality papers given at a conference held in Aarhus in 2002 under the auspices of the Research Network on New Religions RENNER The papers which have been edited and updated represent the work of leading scholars in the history of religions sociology of religion psychology of religion and other disciplines They address questions that are vital for everyone in the modern world whether approached as a reflection of world economy and power dynamics new possibilities of communication and cultural exchange in the light of mass media and technology increased cultural plurality in the wake of migration or as a combination of any of these globalization challenges the academic study of religion to renewed theoretical and methodological reflection *The Centrality of Religion in Social Life* Eileen Barker, 2021-11-18 James A Beckford's work is internationally acclaimed not only in the sociology of religion but also in other fields of the social sciences Beckford has long been arguing that the barriers that have grown up between the different sub disciplines should be broken down with those specialising in religion becoming more cognisant of new theoretical developments and sociologists in general becoming more aware of the significance of developments in the religious scene This book is a collection of essays written in Beckford's honour drawing on a number of religious themes that have been central to Beckford's interests whilst also offering a significant contribution to our understanding of the wider society A central theme is modernity and its relation to the post modern and how religion affects and is affected by the dynamics of contemporary society with the primary focus of many of the chapters being a concern with how society copes with the minority religions that have become visible with the globalising tendencies of contemporary society The contributors

who come from America Asia and various parts of Europe are all internationally renowned scholars Beckford's most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson

Young People's Attitudes to Religious Diversity Elisabeth Arweck, 2016-07-01 Investigating the hitherto unexplored topic of how young people understand and relate to religious diversity in the social context in which they are growing up this book makes a significant contribution to the existing body of literature on religious diversity and multiculturalism It closes a gap in knowledge about young people's attitudes to religious diversity and reports data gathered across the whole of the UK as well as comparative chapters on Canada USA and continental Europe Reporting findings from both qualitative and quantitative research which reveal for example the importance of the particular social and geographical context within which young people are embedded the volume addresses young people's attitudes towards the range of world religions as well as non religious stances and offers an interdisciplinary approach through the different analytical perspectives of the contributors

Sociology of Religion Roberto Cipriani, 2015-06-01 Sociology of Religion represents a documented introduction to the history of sociological thought as applied to religious phenomena It examines both the substantive and functional definitions of religion that are more open pluralistic and not inscribed in a single explanatory horizon or within a single confessional perspective The contributors' concerns are carefully written to show all sides of the argument Roberto Cipriani argues for the simple definition that the sociology of religion is an application of sociological theories and methods to religious phenomena Historically close ties between sociology and the sociology of religion exist The slow and uneven development of theory and methods affects the sociology of religion's development but the latter has also benefited from increasing precision and scientific validity Other sociological writers agree and disagree about different approaches Some assume it is a militantly confessional or anti confessional others remain neutral within their work

Taking 'Religion' Seriously: Essays on the Discursive Study of Religion Teemu Taira, 2022-03-16 This book demonstrates

through methodological reflections and carefully chosen case studies a new way to conduct study of religion It focuses on how social actors negotiate what counts as religion and how discourses on religion are part of the way in which contemporary societies organise themselves The present volume draws on examples from judicial processes media discourses and scholarly debates related to Wiccans Druids and Jedi knights among others By analysing discourses on religion and building on rather than rejecting genealogical critiques of religion Teemu Taira argues that the study of religion can be constructive and socially relevant *Alternative Religions Among European Youth* Luigi Tomasi, 2018-08-17 First published in 1999 this book provides an overview of various non conventional notions of what is sacred currently held among European young people It analyses the growing estrangement between traditional religious doctrines and current beliefs among young people in the following countries France Austria Holland England Germany Poland Russia and Iceland Using first hand statistical support and a well established theoretical approach the book examines new religious movements and sects analysing and interpreting the reasons for their growth and spread among young people The distinctive features of the book are its investigation of diverse religious phenomena and its verification of whether this spread of alternative religiosity is due to the reluctance of a growing section of the European population to accept traditional religious beliefs The result of eight separate empirical surveys the book is original in its content and innovative in its theoretical approach Overall it provides a detailed and documented analysis of the increasing number of young Europeans now attracted by alternative religions

Research Handbook on the Sociology of Law Jiří Přibáň, 2020-12-25 This unique Research Handbook maps the historical theoretical and methodological concepts in sociology of law exploring the rich and complex nature of this area of research It argues that sociology of law flourishes due to its strong capacity for interdisciplinary engagement and links to other scientific concepts methodologies and research fields A Constructive Critique of Religion Mia Lövheim, Mikael Stenmark, 2020-02-06 Why do some strategies for critique of religion seem to be more beneficial for constructive engagement whereas others increase intolerance polarization and conflict Through an analysis of the reasons underpinning a critique of religion in institutional contexts of secular democratic societies *A Constructive Critique of Religion* explores how constructive interaction and critique can be developed across diverse interests It shows how social and cultural conditions shaping these institutions enable and structure a critical and constructive engagement across diverging worldviews A key argument running through the book is that to develop constructive forms of critique a more thorough and systematic investigation of resources for criticism located within religious worldviews themselves is needed Chapters also address how critique of Islam and Christianity in particular is expressed in areas such as academia the law politics media education and parenting with a focus on Northern Europe and North America The interdisciplinary approach which combines theoretical perspectives with empirical case studies contributes to advancing studies of the complex and contentious character of religion in contemporary society
