Religion and Environmental Crisis Eugene C. Hargrove, 1986 **Caring for Creation** Max Oelschlaeger, 1996-01-01
Argues that religion blamed for contributing to the ecological crisis provides an ethical context that will help solve the problem The approach suggests that the environmentally positive aspects in various Western creation stories demonstrate religion Religion and Ecological Crisis Md. Abu Sayem, 2022-09-02 Religion and Ecological Crisis delves into the complex relationship between religions and ecology presenting Christian and Islamic perspectives on ecological issues through the work of John Boswell Cobb and Seyyed Hossein Nasr It examines how faith traditions of the world see and respond to our current unprecedented climate change issues This is the first comparative study of Cobb and Nasr s eco religious understanding and explores how their prescriptions can contribute alternatively to techno scientific initiatives in environmental sustainability Taking Cobb s economism and Nasr s scientism as the key concepts for surveying the roots of the ecological crisis the book offers interdisciplinary and interreligious insights into the debates about ecological equilibrium motivational awareness in human mind and about entanglements between religion and the environment This will be an insightful resource for policy makers faith leaders and for academics working in Environmental Studies and Religious Studies

Religion and Ecological Crisis Todd LeVasseur, Anna Peterson, 2016-07-01 In 1967 Lynn White Jr s seminal article The Historical Roots of Our Ecologic Crisis was published essentially establishing the academic study of religion and nature White argues that religions particularly Western Christianity are a major cause of worldwide ecological crises He then asserts that if we are to halt let alone revert anthropogenic damages to the environment we need to radically transform religious cosmologies White s hugely influential thesis has been cited thousands of times in a variety of disciplines including but not limited to religious studies environmental ethics history ecological science philosophy psychology and anthropology In practical terms the ecological crisis to which White was responding has only worsened in the decades since the article was published This collection of original essays by leading scholars in a variety of interdisciplinary settings including religion and nature environmental ethics animal studies ecofeminism restoration ecology and ecotheology considers the impact of White s arguments offering constructive criticism as well as reflections on the ongoing ever changing scholarly debate about the way religion and culture contribute to both environmental crises and to their possible solutions Religion and Ecological Crisis addresses a wide range of topics related to White s thesis including its significance for environmental ethics and philosophy the response from conservative Christians and evangelicals its importance for Asian religious traditions ecofeminist interpretations of the article and which perspectives might have ultimately been left out of his analysis This book is a timely reflection on the legacy and continuing challenge of White s influential article **A Greener Faith** Roger S. Gottlieb, 2009-10 world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should

Bauman, Richard R. Bohannon, Kevin J. O'Brien, 2011-08-04 Religion and ecology has arrived What was once a niche interest for a few academics concerned with environmental issues and a few environmentalists interested in religion has become an established academic field with classic texts graduate programs regular meetings at academic conferences and growing interest from other academics and the mass media Theologians ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help understand and address environmental problems including the sorts of methodological terminological and substantive debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of religion and ecology each addressing her or his own specialty in light of two questions 1 What have we inherited from the work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next generation of scholarship The aim of this volume is not to lay out a single and clear path forward for the field Rather the authors critically reflect on the field from within outline some of the major issues we face in the academy and offer perspectives that will nurture continued dialogue **Earth & Spirit** Fritz Hull, 1993

Environmental Solidarity Pablo Martínez de Anguita, 2012-05-23 The past few decades have seen the beginnings of a convergence between

religions and ecological movements The environmental crisis has called the religions of the world to respond by finding their voice within the larger Earth community At the same time a certain religiosity has started to emerge in some areas of secular ecological thinking Beyond mere religious utilitarianism rooted in an understanding of the deepest connections between human beings their worldviews and nature itself this book tries to show how religious believers can look at the world through the eyes of faith and find a broader paradigm to sustain sustainability proposing a model for transposing this paradigm into practice so as to develop long term sustainable solutions that can be tested against reality **Earth at Risk** Donald B. Conroy, Rodney L. Petersen, 2000-04 No Marketing Blurb *Church, Cosmovision, and the Environment* Evan Berry, 2018 Though currently only partially understood evolving interactions among Latin American communities of faith governments and civil societies are a key feature of the popular mobilizations and policy debates about environmental issues in the region This edited collection describes and analyses multiple types of religious engagement with environmental concerns and conflicts seen in modern Latin American democracies This volume contributes to scholarship on the intersections of religion with environmental conflict in a number of ways Firstly it provides comparative analysis of the manner in which diverse religious actors are currently participating in transnational national and local advocacy in places such as Peru Argentina Brazil Bolivia Ecuador Guatemala and Mexico It also considers the diversity of an often plural religious engagement with advocacy including Catholic Evangelical and Pentecostal perspectives alongside the effects of indigenous cosmological ideas Finally this book explores the specific religious sources of seemingly unlikely new alliances and novel articulations of rights social justice and ethics for the environmental concerns of Latin America The relationship between religion and environmental issues is an increasingly important topic in the conversations around ecology and climate change This book is therefore a pertinent and topical work for any academic working in Religious Studies Environmental Studies and Latin American Studies [Nature and the Environment in Contemporary Religious Contexts](#) Thomas Donlin-Smith, Muhammad Shafiq, 2018-06-11 This collection of essays discusses the human relationship with and responsibilities toward the natural environment from the perspective of religions and the social sciences The chapters examine a variety of conditions that have contributed to the contemporary environmental crisis including abuse of power economic greed industrialization deforestation and unplanned waste management They then discuss concepts from several different religious texts and traditions that promote environmental protection as a sacred moral duty for all humanity Religious concepts such as dharma duty toward Mother Earth tikkun Olam repair of the world khalifa people as deputies of God on earth amanah the universe as a trust in human hands and paticca samuppada dependent co arising are employed to argue that all the components of the biosphere are integral to the cosmos each piece with its own value and role in the harmony of the whole The book makes it clear that religions can become more green and play a helpful role in raising our ecological consciousness and supporting preservation of the environment into the future
