Cosmoipolitan Justice Jonathan Bowman, 2015-01-12 This book assesses the rapid transformation of the political agency of religious groups within transnational civil society under the conditions of globalization that have weakened the sovereign nation state It offers a comprehensive synthesis of the parallel resurgences of Jasper s axial thesis from the distinct lines of research initiated by Eisenstadt Habermas Taylor Bellah and others It explores the concept of cosmoipolitanism from the combined perspectives of sociology of religion critical theory secularization theory and evolutionary cultural anthropology At the theoretical level cosmoipolitanism prescribes how local national transnational global and virtual spaces ought publically to engage in transcivilizational discourse without presuming secular assumptions tied to cosmopolitanism As a transnational extension of the moral ethical universality of the great Axial Age traditions cosmoipolitanism provides an ideal description of empirical data Employing the insights of critical theory this book offers a micro level analysis of the pragmatics of discourse of each of the major axial traditions producing a genealogy in iterated stages of the dialectics of secularization as a multi faceted narrative of the role of religion in alternative modernities While circumscribing the particular historical limits of each tradition the book extends their internal claims to species universality in light of the potential for boundless communication Jaspers saw as initiated with the Axial Age In Jon Bowman s novel and important work he rethinks the challenges of global justice Bowman is not just concerned with global justice in the modern world but with a genealogy that begins with a better understanding of the Axial age one that is also the unique signature of cosmoi political institutions Arguing with depth and precision Bowman challenges Kantian and Rawlsian universalism His argument provides a new interpretation of cosmopolitan justice as he explores the deeper roots of

cosmopolitan justice James Bohman Saint Louis University Jon Bowman's Cosmopolitan Justice is an important innovative and timely work. Construing globality in terms of pervasive conditions of worldwide interdependence, Bowman advances a decidedly pluralistic account of cosmopolitanism, one uniquely shaped by recent theories of multiple modernities. His analysis is sustained by a highly informed appropriation of such diverse thinkers as Theodor Adorno, Abudullah An Naim, Talad Asad, Schmu'el Eisenstadt, Jürgen Habermas, Karl Jaspers, John Rawls, Amartya Sen, and Charles Taylor. One special feature is the book's synthesis of research on global governance with that on post-secularity and the place of religion in the public sphere. On this basis, Bowman presents a distinctive account of the world's axial religions, one underwriting a multi-polar intercultural global public realm able to address social, political, and economic issues confronting the global community today. This book should be of great interest to students and scholars in philosophy, political theory, international relations, sociology, and religious studies. Poststructuralism and Critical Theory's Second Generation Alan D. Schrift, 2014-09-11 Poststructuralism and Critical Theory's Second Generation analyses the major themes and developments in a period that brought continental philosophy to the forefront of scholarship in a variety of humanities and social science disciplines and that set the agenda for philosophical thought on the continent and elsewhere from the 1960s to the present. Focusing on the years 1960-1984, the volume examines the major figures associated with poststructuralism and the second generation of critical theory, the two dominant movements that emerged in the 1960s: Althusser, Foucault, Deleuze, Derrida, Lyotard, Irigaray, and Habermas. Influential thinkers such as Serres, Bourdieu, and Rorty, who are not easily placed in standard histories of the period, are also covered. Beyond this thematic, essays engage with issues as diverse as the Nietzschean legacy, the linguistic turn in continental thinking, the phenomenological inheritance of Gadamer and Ricoeur, the influence of psychoanalysis, the emergence of feminist thought, and a philosophy of sexual difference, the renewal of the critical theory tradition, and the importation of continental philosophy into literary theory.

Volume 14: Kierkegaard's Influence on Social-Political Thought Jon Stewart, 2016-12-05 While scholars have long recognized Kierkegaard's important contributions to fields such as ethics, aesthetics, philosophy of religion, philosophical psychology, and hermeneutics, it was usually thought that he had nothing meaningful to say about society or politics. Kierkegaard has been traditionally characterized as a Christian writer who placed supreme importance on the inward religious life of each individual believer. His radical view seemed to many to undermine any meaningful conception of the community, society, or the state. In recent years, however, scholars have begun to correct this image of Kierkegaard as an apolitical thinker. The present volume attempts to document the use of Kierkegaard by later thinkers in the context of social-political thought. It shows how his ideas have been employed by very different kinds of writers and activists with very different political goals and agendas. Many of the articles show that although Kierkegaard has been criticized for his reactionary views on some social and political questions, he has been appropriated as a source of

insight and inspiration by a number of later thinkers with very progressive indeed visionary political views Divine Action and Providence Zondervan, 2019-11-26 Thinking Clearly and Deeply about the Theology of God's Intervention in the World

The claim that God acts in the world is surely a basic theological claim but it's one that has been understood in a wide variety of ways in the Christian theological tradition. In some accounts God appears as the largest first and most powerful agent. In others God is portrayed as the transcendent ground of all finite agency while never acting on the same plane as other agents. Divine Action and Providence represents the proceedings of the seventh annual Los Angeles Theology Conference which invited theologians across Christian traditions to contribute their constructive accounts and proposals to the theology of God's relation to and intervention in the world. The eleven diverse essays in this collection include discussions on The particularity and detail of divine action Recovering the identity of the God of providence The theological meaning of the course of history The nature of omnipotence. Each of the essays collected in this volume engage with Scripture as well as with others in the field theologians both past and present from different confessions in order to provide constructive resources for contemporary systematic theology and to forge a theology for the future.
