The Art of Ancient Music David Walter Leinweber, 2020-10-28 From the very beginning, music has helped us create our world: everything from language to technology to philosophy and religion. The Art of Ancient Music discusses the important role music has played in shaping human development. While emphasizing shared human themes, the text has a special focus on the rise of Western music in the ancient Near East, the Bible, and the Classical worlds. A final chapter provides a discussion of the way music helped bridge the gap between the ancient world and the Middle Ages, especially in the guise of Church music.

Cosmopsychology Gene F. Collins Jr. Ph.D., 2009-11-21 Cosmopsychology: The Psychology of Humans as Spiritual Beings. Cosmopsychology assumes that human beings are essentially spiritual beings who are multi-dimensional, composed of many parts and connected to many dimensions of the Cosmos. It has been defined as astrology as the study of psychospiritual development and as the psychology of extraterrestrial beings. Cosmopsychology is the study of the relationship between the mind and the Cosmos. Cosmopsychology refers both to the correspondences between the human mind and the external universe and to the growth or evolution of the mind as it moves to higher forms of consciousness. It examines those parts, links, and dimensions that are not found in traditional academic psychology. Cosmopsychology provides insights into your personality and your destiny through the contributions of astrology, numerology, the I Ching, Jung's Analytical psychology, Hartmann's Ego psychology, Bernes Transactional Analysis, Assagioli's Psychosynthesis, Hermeticism, Idealism, New Thought, and the Perennial Philosophy. The mysteries of karma are laid out as they are found in the ancient Indian philosophy of Vedanta. Psychology was built on classical physics; Cosmopsychology is built on quantum physics, the holographic universe, string theory, M-theory, and F-theory. Physics has come full circle, returning to the science of vibrations and the philosophy of idealism as taught by Pythagoras, Socrates, and Plato. Everything is connected, both spatially and temporally. At this deep level of Being, consciousness, choices, what manifests, Cosmopsychology encompasses the nature of consciousness, meditation, karma, and rebirth, and examines their roles in Individuation, Self-Actualization, and Self-Realization.

In-Between: Architectural Drawing and Imaginative Knowledge in Islamic and Western Traditions Hooman Koliji, 2016-03-09 Contemporary technical

architectural drawings in establishing a direct relationship between the drawing and its object tend to privilege the visible physical world at the expense of the invisible intangible ideas and concepts including that of the designer's imagination. As a result, drawing may become a utilitarian tool for documentation devoid of any meaningful value in terms of a kind of knowledge that could potentially link the visible and invisible. This book argues that design drawings should be recognized as intermediaries mediating between the world of ideas and the world of things spanning the intangible and tangible. The notion of the Imaginal as an intermediary between the invisible and visible is discussed, showing how architectural drawings lend themselves to this notion by performing as creative agents contributing not only to the physical world but also penetrating the realm of concepts. The book argues that this in-between quality to architectural drawing is essential and that it is critical to perceive drawings as subtle bodies that hold physical attributes for example form, proportion, color, highly evocative yet with no matter. Focusing on Islamic geometric architectural drawings both historical and contemporary, it draws on key philosophical and conceptual notions of imagination from the Islamic tradition as these relate to the creative act. In doing so, this book not only makes important insights into the design process and act of architectural representation but more broadly it adds to debates on philosophies of the imagination linking both Western and Islamic traditions.

Music and Trance Gilbert Rouget, 1985-12-15 Ritual trance has always been closely associated with music, but why and how? Gilbert Rouget offers an extended analysis of music and trance, concluding that no universal law can explain the relations between music and trance; they vary greatly and depend on the system of meaning of their cultural context. Rouget rigorously examines a worldwide corpus of data from ethnographic literature, but he also draws on the Bible, his own fieldwork in West Africa and the writings of Plato, Ghazzali and Rousseau. To organize this immense store of information, he develops a typology of trance based on symbolism and external manifestations. He outlines the fundamental distinctions between trance and ecstasy, shamanism and spirit possession, and communal and emotional trance. Music is analyzed in terms of performers, practices, instruments and associations with dance. Each kind of trance draws strength from music in different ways at different points in a ritual. Rouget concludes: In possession trance, music induces the adept to identify himself with his deity and allows him to express this identification through dance. Forcefully rejecting pseudo-science and reductionism, Rouget demystifies the so-called theory of the neurophysiological effects of drumming on trance. He concludes that music's physiological and emotional effects are inseparable from patterns of collective representations and behavior and that music and trance are linked in as many ways as there are cultural structures.

Dionysos Rising E. Michael Jones, 1994 This book reveals how major figures connected with modern music projected their own immorality into the field of music, which has been the main vehicle of cultural revolution in the West. For the first time
