Nurses Counselling The View From The Practitioners:

Nurses Counselling Philip Burnard, Ian Hulatt, 1996 How is counselling in nursing actually done There are many excellent texts on the theory and practice of counselling but this is the first nursing book to explore in detail what happens during the process The text starts with a discussion about the range and breadth of counselling in nursing This is an important chapter and presents a critical evaluation of the problems of counselling practice and of doing research Experienced practitioners have then contributed chapters on counselling in different situations They have written about their own approaches covering both the theory and how actual case examples evolved Pitfalls and problems are highlighted Between them they encompass a range of situations including counselling in crises bereavement counselling of children genetic counselling and racism The overriding message in the book is that there is no single appropriate way in which to counsel people Rather each individual brings something unique to each encounter drawing inspiration and knowledge from many sources The skill lies in finding some way to communicate effectively for each occasion Tobacco and the Clinician, 1994 **Nurse Practitioners and the Expanded Role of the Nurse** United States. Health Resources Administration. Division of Nursing, 1978 *Alcohol Abuse Curriculum Guide for Nurse Practitioner Faculty* Judith Hasselblad, 1984 *Cumulated Index Medicus*, 1999 **New Health Practitioners** John E.
