Nursing Quality Assurance:

Quality Assurance in Nursing National Nursing and Midwifery Consultative Committee. Working Group on Quality Assurance in Nursing, Scottish Home and Health Department, Jennifer Ross, Scottish Health Service Planning Council, 1988

We have attempted to achieve two basic but essential objectives to initiate wide discussion of the issue of quality in the nursing profession in Scotland and to provide nurses at all levels with the core of the information they will need to establish the systems of quality assurance In order to facilitate the development of standards at the local level the following model statement of standards is proposed for adoption nationally

- 1 Philosophy The nurse subscribes to a philosophy of nursing which defines a distinct goal for nursing and enables her to recognise her role as a health professional
- 2 Practice The nurse adopts the systematic approach to nursing practice and documents the care she provides
- 3 Patient Care The nurse accepts responsibility for initiating maintaining and terminating the caring relationship with her patient
- 4 Professionalism The nurse practices in accordance with the statutes policies and codes of conduct governing nursing

This statement will require to be discussed extensively throughout the professional and managerial structures of nursing in Scotland

The wide ranging changes currently taking place in health care provision have resulted in an increased awareness of the concepts methods and application of quality assurance This book deals with all of these aspects of the topic and will have particular relevance for those involved in the delivery of health care including practising nurses managers and students at both diploma and undergraduate level The first part of the book deals with the concept of quality in nursing and with methods of evaluating improving and assuring quality The approach is unit based and practitioner led and the learning outcomes and study activities given in the text can be used to stimulate reflection and discussion when the book is used in a teaching situation The second part illustrates the methods in practical use through a series of factual experiences These examples show how groups can evaluate nursing practice by using a dynamic approach setting standards and evaluating criteria They are included here to demonstrate how programmes of quality assurance can be applied to
