CONSUMER ACTIVISM

We have, so far, learnt that there are three different Forums, one each at the National, State and District level and these are classified on the basis of territory and pecuniary value of the complaint.

Alia lives in East Delhi and therefore, she can file a complaint in the Delhi Consumer Court situated in East Delhi. If she is not satisfied with the judgement, she can go to the next higher level i.e., State Commission located in Delhi. The next appeal can go to the National Forum. Most of the small cases are decided at the district level itself and, therefore, preferring an appeal may not be required. All the awareness about consumer goods and services creates a check on the unscrupulous tradesmen and the defective products which we do not want and which we never purchased.

OBJECTIVES

After studying this lesson, you will be able to:

- understand the meaning of the term 'Consumer Activism';
- appreciate the significance of Consumer Movement in India;
- define the Objectives, Goals and Tactics of Consumer Movement in India;
- learn how to file a Complaint Petition for defective goods; and
- know how to file a Complaint Petition for deficient services;

31.1 WHAT IS CONSUMER ACTIVISM?

The 'Consumer Movement' in India as a social force originated with the necessity of protecting and promoting the interests of consumers against unethical and 'unfair trade practices'. Rampant food shortages, hoarding and the like gave birth to the 'Consumer Movement' in an organised form in the year 1960.

Nurturing Consumer Activism Sanjay Kaptan,2003 *Activism and the Policy Process* Anna Yeatman,2020-07-29

Activists protecting rainforests demanding increased childcare developing local community housing campaigning for AIDS funding or protecting consumers are as much part of the political landscape as the media parliament peak industry groups political parties or trade unions This collection explores the idea of policy activism and its relationship to the processes that not only set but implement and deliver the policy agenda Policy activists operate both inside and outside government They include community based organisers activist bureaucrats service providers and professionals Policy activism has been barely explored in existing literature This collection puts the idea on the map It is an innovative contribution to the literature using case studies across a broad range of policy areas This volume opens the window on an aspect of the policy process that rarely receives attention from students of politics or policy anywhere across the globe The framework presented and the cases included in these pages provide a glimpse of the workings of a complex democracy describing a range of actors responding creatively to the dynamics of social political and economic change It is fascinating to see how policy functions and social values appear to be more important to these processes than the formal structures of the government in which they are placed

geographical changes of the last two decades and on which also to build a new kind of industrial geography Issues covered include the retheorization of the geography of industrial districts the analysis of institutional thickness and the economic geographical effects of institutional rigidity and sclerosis the economic geographical consequences of new regulatory bodies and policies and the geographically situated character of institutions and regulatory frameworks and the effects of separating them from their originating context the development of new strategies for achieving more equitable forms of regional development

Economy Ron Martin, 2017-11-30 Economic geographers have always argued that space is key to understanding the economy that the processes of economic growth and development do not occur uniformly across geographic space but rather differ in degree and form as between different nations regions cities and localities with major implications for the geographies of wealth and welfare This was true in the industrial phase of global capitalism and is no less true in the contemporary era of post industrial knowledge driven global capitalism Indeed the marked changes occurring in the structure and operation of the economy in the sources of wealth creation in the organisation of the firm in the nature of work in the boundaries between market and state and in the regulation of the socio economy have stimulated an unprecedented wave of theoretical conceptual and empirical enquiry by economic geographers Even economists who traditionally have viewed the economy in non spatial terms as existing on the head of the proverbial pin are increasingly recognising the importance of space place and location to understanding economic growth technological innovation competitiveness and globalisation This collection of previously published work though containing but a fraction of the huge explosion in research and publication that has occurred over the past two decades seeks to convey a sense of this exciting phase in the intellectual development of the discipline and its importance in grasping the spatialities of contemporary economic life

and students in anthropology and food studies Rethinking the Market Economy J. Lambin, 2014-03-14 This book explores the changing socio economic and technological landscape of the 21 century and what it means It adopts an industrial economic approach whilst proposing a road map leading to the adoption of a societal market economy model as an appealing and politically acceptable third way between capitalism and socialism Consuming the Inedible Jeremy M. MacClancy, C. J. K. Henry, Helen Macbeth, 2009-10 Everyday millions of people eat earth clay nasal mucus and similar substances Yet food practices like these are strikingly understudied in a sustained interdisciplinary manner This book aims to correct this neglect Contributors utilizing anthropological nutritional biochemical psychological and health related perspectives examine in a rigorously comparative manner the consumption of foods conventionally regarded as inedible by most Westerners This book is both timely and significant because nutritionists and health care professionals are seldom aware of anthropological information on these food practices and vice versa Ranging across diversity of disciplines Consuming the Inedible surveys scientific and local views about the consequences biological mineral social or spiritual of these food practices and probes to what extent we can generalize about them **The Far East and Australasia 2003** Europa Publications, 2002 A unique survey of each country in the region It includes an extensive collection of facts statistics analysis and directory information in one accessible volume **Encyclopedia of the Environment in American Literature** Geoff Hamilton, Brian Jones, 2014-01-10 This encyclopedia introduces readers to American poetry fiction and nonfiction with a focus on the environment broadly defined as humanity s natural surroundings from the discovery of America through the present The work includes biographical and literary entries on material from early explorers and colonists such as Columbus Bartolome de Las Casas and Thomas Harriot Native American creation myths canonical 18th and 19th century works of Jefferson Emerson Thoreau Whitman Hawthorne Twain Dickinson and others to more recent figures such as Jack London Ernest Hemingway Norman Mailer Stanley Cavell Rachel Carson Jon Krakauer and Al Gore It is meant to provide a synoptic appreciation of how the very concept of the environment has changed over the past five centuries offering both a general introduction to the topic and a valuable resource for high school and university courses focused on environmental issues **The Christian Science Monitor Index** , 2002 **Social Innovation in the Service of Social and Ecological Transformation** Olivier De Schutter, Tom Dedeurwaerdere, 2021-10-14 This book explores how the State can play a role as an enabler of citizens led social innovations to accelerate the shift to sustainable and socially just lifestyles To meet the twin challenges of environmental degradation and the rise of inequalities societal transformation is urgent Most theories of social change focus either on the role of the State on the magic of the market or on the power of technological innovation This book explores instead how local communities given the freedom to experiment can design solutions that can have a transformative impact Change cannot rely only on central ordering by government nor on corporations suddenly acting as responsible citizens Societal transformation at the speed and scope required also should be based on the reconstitution of social capital

and on new forms of democracy emerging from collective action at the local level The State matters of course for the provision of both public services and of social protection and to discipline the market but it should also act as an enabler of citizen led experimentation and it should set up an institutional apparatus to ensure that collective learning spreads across jurisdictions Corporations themselves can ensure that society taps the full potential of citizens led social innovations they can put their know how their access to finance and their control of logistical chains in the service of such innovations rather than focusing on shaping consumers tastes or even adapting to consumers shifting expectations With this aim in mind this book provides empirical evidence of how social innovations typically developed within niches initially at a relatively small scale can have society wide impacts It also examines the nature of the activism deployed by social innovators and the emergence of a do it yourself form of democracy This book will appeal to all those interested in driving societal change and social innovation to ensure a sustainable and socially just future for all
